NEBRASKA UNITS WILL BE DELAYED

Orders Indicate Men Will Be Held at Lincoln Until Full Regiments Are Ready.

RECRUITING TO MAXIMUM

Lincoln, Neb., June 29.—Dispatches from the Chicago headquarters received at the Nebraska mobilization camp indicate that individual units will not be sent to the front from this state, but that a delay will be made until full regiments are ready for service.

Captain Jess of the signal corps has received orders from Washington to discharge men who failed to pass the physical examination and to recruit up to full strength.

The examination of the Fourth regiment is temporarily delayed on account of the effects of inoculation against typhoid fever. However, it will be taken up again not later than tomorrow noon, according to officials. Half of the regiment has been examined. The mustering in of the Fifth regiment is progressing, and General Hall reports it will be ready by tomorrow night.

The wedding march was played by Miss Hazel Caman, and preceding the ceremony Miss Hazel Sabin sang "All For You." After the ceremony a light uncheon was served, and a four-piece orchestra rendered musical selections during the reception hours which followed. Car Equipped as Wireless Station

Dr. Millener, the Union Pacific electrician, has his wireless service car equipped for the road, laid in on a siding at the Union station and will go out on the lines as soon as he receives orders. It is asserted that this car is the most perfect of its kind that has ever been turned out. It is one of the long passenger coaches of the Union Pacific, (rebuilt and equipped as a wireless telegraph and telephone station. It carries all the equipment of a high grade wireless station and with this equipment it is possible to send or receive wireless telegraph, or wireless telephone messages when it is moving over the lines, or standing at a station or out on the line.

The purpose of Dr. Millener going out with his wireless service car at this time is to demonstrate if it is going to be practical to put a wireless system onto the Union Pacific. It has been demonstrated, so it is asserted, that such a system can be operated successfully, but the only thing standing in the way of installation is the matter of cost. The trip to be taken will demonstrate to a certainty what the probable cost of installation and maintenance will be. If it is decided to introduce the wireless system, stations will be established at Grand Island and North Platte in the near future.

As shown in the picture, except for above the deck, the car has the appearance of an ordinary coach. The wires above the deck go to make up the antenna, the wireless mechanism that gathers up the sound waves and sends them off into space, doing the same offices in gathering sound waves sent from other wireless stations.

AUCTIONEERS WANT SOME LEGISLATION

Favor Going to Capitals in a Body to Insist on More Favorable Laws.

TALK OF METHODS IN USE

H. A. Dunlap of Williamsburg, Ia., an auctioneer attending the convention of the International Association of Auctioneers at the Hotel Castle, is in favor of having the auctioneers go to the legislatures to lobby in a body for that they want. "I can't do anything unless you go with me," said Dunlap to the convention. "And you can't do anything unless you go there with money."

Mr. Dunlap advocated that the delegates at the convention cease talking about different methods of auctioneering and salemanship and get down to the subject of legislation, determine exactly what they want and then go after it with big bodies of auctioneers at the various legislatures. The morning was largely taken up with talks of the various auctioneers

on methods used and on the best methods of salemanship used in various situations. J. L. Dowd of Omaha, Thomas E. Marshall of Madelia, Minn., and W. A. Cauffman of Kenesaw, Neb., were among those who discussed the salemanship problems. Dr. Dunlap had much to say of the young men who come to him from the auctioneering schools and want jobs. He said some of them were all right and others were not. He said he preferred a young man who was willing to come to him and serve an apprenticeship of about five years to learn the business.

Following the banquet at the Hotel Castle Wednesday night the tables were cleared and a dance was enjoyed for a few hours.

Home Celebration of Wonder Interest

The arrival of a baby in the household completely changes the entire aspect of the future. But in the meantime, during the anxious period of expectancy, there is a splendid remedy known as "Mother's Friend" that does wonders. It is for external use, relieves the pains of muscle expansion, soothes and calms the nerves, extends its influence to the internal organs and removes to a great extent the tendency to worry and apprehension. It is a natural treatment, safe for the mother, has no drug effect whatsoever and for this reason exerts a most beneficial influence upon those functions directly connected with motherhood. In a very interesting book the subject is freely discussed and a copy will be mailed free to all expecting mothers by Bradford Regulator Co., 406 Lamar Bldg., Atlanta, Ga. Get a bottle of "Mother's Friend" today of any drugist. Use as directed and you will then know why mothers for nearly half a century have used and recommended this splendid aid to motherhood.
