

Nebraska FOURTH AND FIFTH MUST FILL FIRST

Army Mustering Officer Says
No Use Enlisting Now for
New Regiment.

GUARD OFFICERS SKILLED

(From a Staff Correspondent.)
Mobilization Camp, Lincoln, July 1.—(Special.)—According to Captain Tapes, the U. S. army officer who has had charge of mustering in the Nebraska National Guard with other officers representing the war department, recruiting of men to fill up the regiments will go on briskly and must be pushed as fast as possible.

The two regiments need men and they do not expect to stop at the sixty-five mark. Other states have shown good progress and there is no reason why Nebraska should mar the record made in the days of '01 and in 1898, of which the state has always been proud. According to official authority, there is no possible chance for a third regiment to get into the service until after the other two have all the men they need. It is possible also that a third regiment may not be needed at all and the men who have been busily engaged in recruiting for that regiment can show no greater service to the state than to turn over the men recruited to the Fourth and Fifth regiments.

Present Officers Skilled.

The impression given out that a regiment commanded by men who saw service in the Philippines would give better service and that the men be cared for better is to be commended if such were a fact. Most of these men, however, have not continued in military experience and at present are out of touch with modern military conditions. The men who command the Fourth and Fifth regiments, also served in the Spanish-American war and in addition have kept in touch by service in the guard since that time.

Records of the Men.

Colonel Eberly saw service in the Philippines and has been connected continuously in some way or other with the government service.

Colonel Paul saw service in the Second Nebraska and has since been constantly connected with the Nebraska guard like Colonel Eberly.

Lieutenant Colonel Baehr was a member of the First Nebraska in the Philippines and has continued in touch with military affairs.

Major I. S. Johnson belonged to the Third United States Cavalry.

Major Robert G. Douglas saw service in the Philippines.

Served with Funston.

Captain Irvin C. Todd of Company C, Omaha, belonged to the celebrated Twentieth Kansas commanded by General Funston.

Captain Frederick A. Abbott of Blair served two enlistments in the regular army.

Captain George H. Holdeman of York was captain of his company in the Philippines.

Captain Herbert H. Smith of Fremont was a surgeon in the regular army for six years.

Lieutenant Colonel Hollingsworth

had service in the Philippines. Lieutenant W. A. Ball of Omaha was in the First Nebraska in the Philippines. Lieutenant Jerome A. Lillie of Omaha, adjutant, was also in the First Nebraska. Captain Fred Thornburg was a member of the First regimental band in the Philippines. Lieutenant Kegworthy of North Platte lived in Mexico several years. Lived in Mexico.

Captain A. A. Clements of Ord also lived in Mexico for some time. And so, all along the line, can be found men in these regiments qualified by experience to command men and take care of them.

Remove the "Tire-Tax" on Gasolene

... ..

EVERY time the Gasolene Tank, on your Car, is filled up—think of this:— If the Tank holds, say, 20 Gallons, and the price is 30 cents per Gallon, reflect that FIVE of these Gallons are consumed, not by the MOTOR, but by your FABRIC TIRES. Of the \$6.00 you pay for 20 Gallons, 25%— (or \$1.50),—is practically poured over your TIRES, instead of into your Tank,—WASTED!

These Five Gallons of Gasolene constitute a sort of "TAX," levied by Circumstance, against the Man who does not live up to his Opportunities,—who fails to investigate Silvertown Cord Tire records.

If he did investigate these Records,—and Test out Results for himself,—he could verify the following Facts, and PROFIT by them:—

TRADE MARK

SILVERTOWN Cord Tires have only TWO Layers. These Two Layers are of giant CORDS, instead of the 5 to 7 Layers of Cotton Cloth in Fabric Tires, or of Cotton Threads in other (so-called) "Cord" Tires.

TWO Layers of Cords BEND 4 times, to 6 times, more FLEXIBLY, than 5 to 7 Layers of Fabric or Thread rubber-cemented together into a stiff, unyielding "Muscle-bound" Carcass.

This wonderful "Flexibility" is what gives such wonderful RESILIENCE,—and such slight Traction-Wave-resistance to Motor-power,—that Silvertown Cord Tires are, through it, enabled to do this:—

- Coast down-hill 30% further and faster.
- Travel 25% further on each Gallon of Gas.
- Add 17% more Speed, to same Motor.
- Ride with 50% less Vibration.
- Be 70% LESS liable to Stone-bruise, Puncture, or Blow-out.

SILVERTOWN'S are the easiest of all Tires to permanently Repair,—the most Luxurious to ride upon,—the most Aristocratic in appearance. You are paying for Silvertowns NOW (without getting them),—in your GASOLENE bills!
