VIOLENCE SWEEPS STAGY CAPITAL CITY

"Epidemic of Crime" Rages for Night, Many Unlawful Acts Committed.

ONE IS "MEXICAN WAR"

(From a Staff Correspondent.)
Lincoln, July 16.—(Special.)—An epidemic of violence appeared to strike Lincoln last night, an internal Mexican war being a part of it. Two Mexicans in the Rock Island yards got into a fight resulting in one of them being taken to a hospital badly wounded from a knife stab, which extended into the lungs. Who his assailant was is not known, though the victim continually repeated the name of "Belenado Drasso," as he was being taken to the hospital.

Another incident occurred when Margaret Alsted, a 19-year-old employe at the detention home, was attacked by three men near the home, taken into an automobile and carried to a pasture near Electric park and an attempt made to assault. The girl is a husky specimen of womanhood, weighing about 170 pounds, and succeeded in fighting them off. When near the bank of the river she fell in drawing one of the men with her. The others took to their heels.

Discovered by Motorman.
Later in the evening she was discovered by a motorman lying near the car track and taken in an automobile by G. B. Averill, an Omaha newspaperman, and Robert Calvert, a Lincoln man, who chanced to be passing in their car, and carried home.

Jessie E. Barton, a Raymond harness maker, aged about 52 years, shot himself in the right temple in a barn at his home last night, dying instantly. No cause is known for the deed. He had been in Lincoln with his family that day and returned, eating a hearty meal. A few minutes after he left the table a shot was heard in the barn, where he was found dead when the family reached him.

F. M. Clark, an iron worker, was stabbed in the back and left side five times last night and four men, E. L. Mackey, W. G. Gillispie, E. E. Tinable and Tom Stewart, are being held in connection with the affair. Clark's right lung was pierced twice, but City Physician Reynolds believes he will recover. Clark claims to have been asleep at the time the trouble started and two of the others allege that they were only trying to stop the fight.

Tecumseh, Neb., July 16.—(Special.)—The Tecumseh city council, by unanimous vote, decided to vacate Fourth and Fifth streets as to vehicle traffic only, across the Burlington right-of-way in Tecumseh, upon promise of the railroad company to erect a new passenger station between Third and Fourth streets, this year, at a cost of not less than \$20,000. Representatives of the company were in Tecumseh and exhibited blue prints of the proposed new building, and said the company would carry out its part of the agreement. The building is to be of terra cotta brick with a tile roof and floor. It will be steam heated, electric lighted and on the city sewer. There will be one large waiting room, the office rooms, a rest room for women, smoking room, toilets, drinking fountains, etc. There will be long brick platforms, and all trains will pass to the south of the depot, making it possible for the most of the people of the town to go to and from the depot without crossing any tracks. Demand New Infirmary in Merrick County

Central City, Neb., July 16.—(Special.)—The County Board of Supervisors at this time confronted with a public demand that definite steps be taken to provide on the county poor farm a home suitable for the inmates and family of the keeper. A resolution submitted by the Child Conservation league of this city placing the board on record as favoring the erection of a suitable dwelling with all conveniences has been rejected. In the form of a compromise, however, the county farm committee has tendered a report that in their judgment it would be in the best interests of the county in the present tenant system be abandoned, and that of overseer adopted. They all favor the idea of the county stocking the farm as a means of making it less of a financial burden. While the report of the farm committee is not as definite as the resolution tendered and rejected, it appears the board thereby reserved the privilege of assuming the initiative in the matter of bettering conditions at the county farm.

Census of Wool Stockings Taken By the English

(Correspondence of The Associated Press.)

London, July 4.—Since the loss of the last colonial wool auction interesting developments have occurred in the wool trade. The war trade department suddenly decided on taking a census of the wool stocks in Great Britain, and, without publishing the results, announced that no sale or dealings in English-grown wool were to be allowed, consequently all English and Scotch wool fairs were cancelled.

As the clip is about due, traders with contracts arranged were anxious, but they had hardly expressed their surprise and astonishment when the government suddenly announced it would buy the whole of the English, Scotch and Irish output for the season of 1916, at prices on the basis ruled before the war plus 30 per cent. This is considered by farmers to be insufficient to meet the advance in other commodities and deputations are being sent to the war office with a view of getting better terms.

Just what the idea of the authorities is in buying the whole of the clip it is difficult to determine unless it be that they have designs on the Australian clip as well, or to fix the maximum prices for future sales in London and other centers.

A belief prevails that by holding up the English clip (which for 1915 totaled about 122,000 pounds) an increased demand will be experienced for New Zealand crossbred wool and prices at the sales in July will be dearer unless the authorities decide to fix prices in the meantime.

In the manufacturing centers combing charges have again been raised and while top-makers are trying to get an extension of old contract prices the wool-combing employes have come out on strike for more money, thus adding to the existing difficulties of the trade generally. The labor situation is so acute that top-makers have decided to insert a clause in future contracts "that sellers reserve the power to add to contract price according to increased charges made in combing."

As far as the London market is concerned little business is being done in Australian wool in view of the uncertainties existing, but where inquiries have been made for raw material sellers ask higher quotations than those ruling at the beginning of this month.

Best merino 64s tops are being quoted at the high price of 4s 6d per pound, against about 3s 8d this time last year and 2s 5d in June, 1914.

Little Attention Paid to Note on Seizure of Mail

(Correspondence of The Associated Press.)

London, July 4.—Surprisingly little attention has been given in this country to the American note on seizure of the mails. When published in America only brief and rather exaggerated summaries were sent by the British correspondents. The note was published in full only by the Times on June 19, several days after the American papers which printed it had arrived in England. On Saturday the foreign office issued the text as an official paper for publication on Tuesday, June 27.

Almost the only important editorial reference to the note is made by the Economist in its issue of today. It points out that "owing to lack of information the public in this country has failed to understand the constant references by President Wilson and by leading newspapers in the United States to the question of 'Freedom of the Seas.'"

After quoting a large part of the note the Economist says: "It will be seen that a good deal of feeling has been evinced, and that great care and discrimination are required in order not only to meet the susceptibilities of friendly neutrals, but also to avoid the establishment of precedents which, under different circumstances, we should not tolerate ourselves as neutrals in a future naval war. Supposing, for example, there were a war between Spain and Sweden, and the belligerents claimed the right to intercept mails between London and Paris or London and New York, and to open all private letters, would that be very strong. It declares that the rights of neutrals are as sacred as the rights of belligerents, and must be as strictly observed, and concludes: 'Only a radical change in the present British and French policy, restoring to the United States its full rights as a neutral power, will satisfy this government.' Fortunately we have an arbitration treaty with the United States, which Germany has not."
