GERMANS DEFEATED NORTH OF LEMBERG

Ten Thousand Teutons Captured When Brody Falls Before Russians.

BRITISH TAKE DELVILLE

London, July 29.-The Russians have occupied the important railroad junction of Brody, fifty-eight miles northeast of Lemberg, in Galicia; broken through the entire first line of the Teutonic allies west of Lutsk, and driven the Austro-German forces from the line of the Rivers Slonvka and Boldurovka, southern Volbynia according to the official communication issued tonight by the war office. Heavy casualties were inflicted on the Austro-Germans. More than 10,000 men were taken prisoners and a large number of guns were captured. The swiftness of this new Russian stroke was unexpected and may lead to the capture of Lemberg

The Russians, according to a re-port from Petrograd, have broken the whole Austro-German front west of Lutsk. In this success they are re-ported to have captured two gen-erals, 9,000 prisoners and forty-six

guns.

The fall of Brody is a serious threat to Lemberg and the rapid and successful advance of General Sakharoff's forces menace the whole Austro-German line of communications from the north to the south.

Holding German Advance.

Holding German Advance.

For the present, Kovel yields in importance to Lemberg. The position on this portion of the Russian front seems to be that General Kaledines, having driven General von Linsingen's left wing behind the Stokhod river, has suspended his advance toward Kovel and is holding up the great Teutonic forces there, while General Sakharoff is pressing on tow: rd Lemberg, which is defended by the forces of General Boehm-Ermolli.

Petrograd correspondents attribute.

Petrograd correspondents attribute the successes over the Austro-Ger

Petrograd correspondents attribute the successes over the Austro-Germans almost entirely to the overwhelming superiority of the Russian artillery and Russia's apparently endless supplies of ammunition.

Tonight's official report of the British war office shows that the British war office shows that the British are continuing their successful progress. The whole of Longueval now is in their hands as well as the Delville wood, from which they drove the Fifth Brandenburg division. The final capture of Delville wood is very gratifying to the British people. It was first taken July 17, but was afterward abandoned. For many day the wood and the village of Longueval have been the scene of some of the heaviest fighting of the whole campaign. The possession of this wood and of Longueval is expected to facilitate greatly the further progress of the Franco-British forces.

German Stronghold Palls,

The last German stronghold in Longueval has been captured by the British troops, according to the of-ficial statement given out tonight by the war office. Hand-to-hand fightthe war office. Hand-to-hand fight-ing continued throughout the day in the vicinity of Pozieres, the statement

German airships raided the east coast of England last night, accord-ing to an official statement just la-

"The number of raiders," says the statement, "has not yet been estab-lished. The reports as to the raid-ers crossing the coast come from Yorkshire and Lincolnshire. Bombs vere dropped, but details are lack-

ing."

INVENTORY OF U.S. INDUSTRIES MADE

Committee on Industrial Preparedness Completes Survey of the Country.

TASK IS DIFFICULT ONE

Washington, July 29.-The colossal task of making an industrial inventory of the United States, is now virtually completed, according to an announce ment today by Chairman Howard E Coffin of the committee on industrial preparedness of the Naval Consulting Board of the United States, who has the work in charge. Just how plants the country over can adapt their equipment to produce the thousands of things from shells to shaving brushes necessary for the government's use in a national emergency has been worked out with the most has been worked out with the most extreme care through field reports from engineers and chemists who are members of the American Society of Civil Engineers, the American In-stitute of Mining Engineers, the American Society of Mechanical En-gineers, the American Institute of Electrical Engineers and the Ameri-can Chemical society.

Both the inventory and the legisla-tion growing out of it are the result of a remarkable three-months' cam-paign made by a volunteer, unpaid organization of business men and en-gineers. It marks a new era in the regineers. It marks a new era in the relations of the engineer, the manufac-turer and the citizen generally in the safeguarding of the national govern-ment, as well as a much closer co-ordination between various governmental agencies. In many states un developed resources have been classi fied and given publicity and new in dustries are promised as the result of information gathered. Received With Courtesy.

Business men the country over re-ceived the investigators with the greatest courtesy and co-operation. In only a few cases did they refuse to give the desired information, and then usually under a misunderstanding of the committee's plans, which was quickly cleared up. Over 30,000 concerns, each doing an annual business of over \$100,000 were classified, in addition to many smaller plants with equipment peculiarly suited to turn out material for the fighting line. At the time of the Mexican crisis, Chairman Coffin sent out urgent telegrams to the chairmen of all state boards urging all possible haste, and Secregive the desired information, and then urging all possible haste, and Secre-tary of War Baker detailed five reg-ular army officers, two of them mem-bers of the general staff, to the com-mittee headquarters in New York. In-

mittee headquarters in New York. Instances from state reports follow:
Colorado will be greatly benefited by the survey, according to Chairman R. B. Moore, as local industry will be able to develop greater elasticity and many new resources till now unknown will be developed. Chairman Samuel Ferguson of Connecticut reports that manufacturers there at first looked askance at the plan owing to previous unsatisfactory business relations with the government, but that this had been broken down by personal contact.

Canned Goods From Indiana. Canned Goods From Indiana.
Illinois presented one of the heaviest tasks of the survey, for in Chicago alone, over 500 chemical and metal-lurgical plants had to be inventoried. Chairman Frederick K. Copeland spoke enthusiastically of co-operation extended by the Chicago Association of Compares and the lillingia Manuof Commerce and the Illinois Manu-facturers association. Indians, ac-cording to Chairman Barnard, can supply enough canned food for any army that the could ever put into the field. In addition, there are large supplies of meat, hardtack and bis-cuits, as well as acid and automobile plants convertible to munition manu-

A Turkish army estimated at 70,000 strong now is concentrated in the Hungarian plains for the defense of Hungarian plains for the defense of Hungary, says a dispatch to the Exchange Telegraph company from Lausanne, Switzerland. The dispatch adds that the Austrian emperor has gone to Budapest, where intense excitement prevails.

Chairman Wilcox of Iowa, reports that a surprisingly large number of the dispatch army light and the Exchange Telegraph company from the dispatch adds that the Austrian emperor has given Chairman Whitaker very real co-operation. Chairman Horace V. Winchell of Minnages and the company of the survey and has given Chairman Whitaker and has given Chairman Whitaker as surprisingly large number of the defense of t Chairman Wilcox of Iowa, reports citement prevails.

Germans Gain and Lose.

Paris, July 28.—An attack by the Germans against French positions south of Sainte Marie pass, in the Vosges, resulted in their gaining a souri reports through Chairman Philip N. Moore, that its chief contribution will be lead and zinc, together with harness, clothing, flour, bakery and machine shop products. Official maps have been prepared with the location of the plants and their railroad connections. Montana reports through Chairman Mathewson that nearly every town in the state has one or two garages with machine shops that could be of great value, while the horse markets at Miles City and Dillon could supply cavalry troops.

Holdrege. Guns could also be made there, while food, clothing and min-eral supplies are available. Chairman Morris R. Sherred of New Jersey found the work there so heavy that he divided the state into county divisions, with general headquarters in the Newark city hall. The best results were obtained.

Another illustration of how manufacturers with outputs normally totally ungasted to war can swing their

Another illustration of how manufacturers with outputs normally totally unrelated to war can swing their resources to the government in an emergency was shown in the case of a silversmith reported by Chairman J. G. White of New York, who is now making thousands of cartridge cases a day for the French "75s" and bullet jackets at the rate of several millions a week. This firm could also make field gun ammunition if desired. Texas manufacturers in extending the heartiest co-operation to Chairman John B. Hawley, expressed eagerness to receive some of the proposed educational orders.

Utah, in addition to the routine work, supplied Chairman Ebaugh with maps and drawings of great value. Wyoming, with its multitude of undeveloped resources, will be greatly aided by the survey, according to Chairman Nunn, while the great interstate railway repair shops could contribute materially to a mobilization of national resources. Favorable reports were also received from the following chairmen:

Resse, Del. Miller, Ark. Ludlow, N. C. Baston, Idahe. Mason, Ore. Montfort, Ky. Ludlow, N. C. Baston, Idahe. Mason, Ore. Montfort, Ky. H. D. Bharp, R. I. Lockett, La. Riggs, S. C. Jordan, Me. M. Meders, Tenn. Dow, Mich. Robertson, Miss. Preudenburger, New, Powell, Wash, Yer, N. H. Couch, N. D.

Sends Army Bill

Sends Army Bill To Conference

Washington, July 29.-When the army bill was returned to the house from the senate today Representative Buchanan opposed letting it go immediately to conference for adjustment of differences and insisted on delay by sending it back to committee in the same way he blocked immediate consideration of the navy bill a few days ago. Other congress men, however, persuaded him to withdraw his objections and the bill went to conference.

Representative Gardner denounced the bill as inadequate and charged the War department and the Hay reorganization law with responsibility. At the rate the bill appropriates for artillery and ammunition, he said, it would take twelve years to prepare the country for a few months of war.

"In a single day on a single sector."

Federal Court Holds Germans Forfeited Prize Rights When They Entered Port.

SHIP CAPTURED AT SEA

Norfolk, Va., July 29 .- Federal Judge Waddill today decided the libel proceedings for possession of the captured British liner Appam in favor of the English owners and against the German prize crew which brought it

here.
The court held that the German government lost all legal claim to the Appam and its cargo as prizes of war when Lieutenant Berg and his prize crew on last February I brought them into the neutral waters of Hampton Roads with the intention of "laying up" the vessel indefinitely. Prussian Treaty Does Not Apply.

Prussian Treaty Does Not Apply.
The court held further that the Prussian-American treaty of 1799, renewed in 1828, does not apply or control in the case so as to guaranter the prize crew asylum in United States waters.

That the action of the German prize court in declaring Appam a prize while the case was in litigation in the United States courts has no effect on the jurisdiction of the courts.

That the jurisdiction of the United States courts in the case is estabstates courts in the case is estables.

States courts in the case is estab-lished by a long line of precedents, in-cluding several by the supreme court. Violation of Neutrality.

"The court's conclusion," the deci-sion reads, "is that the manner of bringing the Appam into the waters of the United States, as well as its presence in those waters, constitutes a violation of the neutrality of the United States; that it came in without

bidding or permission; that it is here on of the law; that it is un-able to leave for lack of a crew, which it cannot augment or provide without further violation of neutrality; that in further violation of neutrality; that in its present condition it is without a lawful right to be and remain in the waters; that it, as between its captors and owners, to all practical purposes, must be treated as abandoned and stranded upon our shores, and that its owners are entitled to restitution of their property, which this court should award, irrespective of the prize court proceedings of the court of the imperial government of court of the imperial government of the German empire, and it will be so ordered."

Jess Willard Says: "Take Nuxated Iron

If You Want Plenty of 'Stay-There' Strength and Endurance and Health and Muscles Like Mine."

Ordinary Nuxated Iron Will Often Increase the Strength and Endurance of Delicate, Nervous Folks 200 Per Cent in Two Weeks' Time.

SPECIAL NOTE-Dr. E. Sauer, a well known physician who has studied widely in both this country and Europe, has been specially employed to make a thorough investigation into the real secret of the great strength, power and endurance of Jees Willard, and the marvelous value of nuxated iron as a strength builder.

New York.—Upon being interviewed at his apartment in the Colonial hotel, Mr. Wiliard said: "Yes, I have a chemist with me to study the value of different foods and products as to their power to produce great atrength and endurance, both of which are so necessary in the prize ring. On his recomand I have particularly advocated the free use of fron by all those who wish to ob-lain great physical and mental power. Without it I am sure that I would never have been able to whip Jack Johnson so completely and easily as I did, and while training for my bout with Frank Moran, I regularly took nuzated iron, and I am certain that it was a most important factor in my winning so easily." Continuing, Dr. Sauer said: "Mr. Willard's case is only one of hundreds which I could cite from my own personal experience, which proves con-clusively the astonishing power of nuxated from to restore strength and vitality even in most complicated chronic conditions

most complicated chronic conditions."

Not long ago a man came to me who was nearly half a century old, and asked me to give him a preliminary examination for life insurance. I was astonished to find him with the blood pressure of a boy of 20 and as full of vigor, vim and vitality as a young man; in fact a young man he really was, otterithstanding his are. The secret he said was taking iron—nuzated from had filled him with renewed life. At 30 he was all in. New at 50 a miracle of vitality and him with renewed life. At 30 he would have all the miracle of vitality and him. New at 50 a miracle of vitality and him. And have said a hundred times over, from the first people would only throw away patent medi-

A Hitherto Untold Secret of His Great Victories Over Jack Johnson and Frank Moran

cines and nauseous concoctions and take simple nuxated fron, I am convinced that the lives of thousands of persons might be aswed, who how die every year from preumonia, grippe, concumption, kidney, liver and heart trouble, etc. The real and true cause which started their diseases was nothing more nor less than a weakened condition brought on by lack of fron in the blood. Iron is absolutely necessary to enable your blood to change food into living tissue. Without it, no matter how much or what you eat, your food merely passes through you without doing you any good. You don't got the strength out of it and as a consequence you become weak, pale and scikly looking just like a plant trying to grow in a soil deficient in iron. If you are not efrong or well you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-grain tableis of ordinary nuxated iron three times per day after meals for two weeks. Then test your strength again and see fer yourself how much you have gained. I have seen dozens of nervous run-down people who were ailing all the while; double their strength and endurance and entirely gerid of all symptoms of dyspepsia, liver and other troubles in from ten to fifteen days time simply by taking iron in the proper form. And this after they had in some cases been dectoring for months without obtaining any benefit. But don't take the old forms of reduced iron, iron acetate or theture of iron simply to save a few cents. You must take iron in a form that can be casily absorbed and assimilated like nuxated iron if you wish it to do you any good, otherwise it may prove worse than useless.

Many an athlete or prise fighter has won the day simply because he knew the secret of great atrength and endurance and filled his blood with iron before he want into the affray, while many another has gone to inglorious defeat aimply for the lack of iron—E. Sauer, M. D.

NOTE — Nuxated Iron, recommended above by Dr. Sauer is not a patent med

blood is the secret of my great strength, power and endurance.
