FARM LIFE REVIVAL

Agricultural Upheaval a Result of War in the British Isles.

PLAN GREAT REFORM

(Correspondence of The Associated Press) London, July 31.—One of the effects of the war will be seen in a great revival of agricultural life in England and the United Kingdom...

The reorganization of the rural districts and allotment of the war office has just completed the exchange of many of the older men who in the earlier days of the war left farm work for the front line...

It is believed that the plan for bringing back soldiers from the front will have the effect of providing sufficient farm labor practically immediately...

Ask Full Cultivation.

"We have asked the farmer to maintain the full cultivation of the soil and the upkeep of his hedges and herds during the course of the war...

means of making the country more nearly self-supporting in foodstuffs. In all of his addresses in recent years he has laid stress on the point...

Reviews Situation.

Just before resigning as president of the Board of Agriculture the other day as a matter of principle due to his views on the Irish question, Lord Selborne consented to review briefly the situation as to agriculture in an interview with a representative of The Associated Press...

These women have taken to the soil enthusiastically and with the intelligence that seems to characterize everything they are undertaking...

"Because of the splendid manner in which the women have risen to the occasion in this respect at a time when farm work is of vital importance to the nation, we feel justified in the belief that we are going to pull agriculture through this crisis in spite of many apparently insuperable difficulties."

"We realize that the problem of making as much progress as we should in war time presents its handicaps. Among these, in addition to the shortage of farm labor already indicated, is the difficulty of obtaining sufficient supplies of fertilizers and modern machinery that are so necessary in farming to the greatest advantage now."

Pay State Grants.

"While we are not as well equipped in the respect of agricultural college as a country of larger rural population like the United States, we are paying state grants to institutions scattered over the entire country that are directing their energies into this vital channel of increasing the people in the art of agriculture..."

New Franklin Car Here

"Success which comes from contenting every effort of a large and efficient manufacturing organization upon one article is exemplified in the announcement of the Series 9 Franklin car," says H. Belmont...

do by compulsion we must accomplish by voluntary and spontaneous effort. And the machine here, therefore, is necessarily slower.

"Production will be continued along the same general line. As in the past, there will be but one chassis. New bodies, meeting various practical needs, have been developed, including a four-passenger roadster, town car, and sedan and brougham with Victoria tops."

"Increased food production during the war is a sacred national duty. The man on a Hampshire farm can strike a blow for England equally with his son in Flanders. The manner in which women have responded to the call of duty in this war should make it impossible for any man to think them less patriotic, less capable of comprehending a great issue, less firm in purpose or less prone to sacrifice than men."

"Millions of pounds were lost, and Bee Want Ads produce best results."

Dramatic Incident In Athens Stadium

(Correspondence of The Associated Press)

Athens, July 25.—A dramatic moment marked a military horse show given recently in the stadium. The jumping and riding exhibitions were over. The white-skirted evzones had marched impressively, past the royal tribune and two regiments of soldiers were drawn up before King Constantine and Queen Sophie to sing Greek folk songs...

Stearns THE ULTIMATE CAR. Knight TYPE MOTOR. You have probably noticed the increasing number of Stearns White line radiators on the road. Just another proof that owners have become tired of cleaning out carbon and grinding valves...

—regarding the Studebaker SIX. Wrote a lawyer to a friend. My dear Mrs. [redacted] :— Armour, S. D. May 29th, 1916. the Studebaker Six. I am just in receipt of your inquiry regarding the matter. We are more than pleased with this car. I gave looking over several different models and investigation, studying and filed with just what I found here I went to Sioux City and examined the different cars there, my preference for the Studebaker "6" remained unshaken; but I thought it would be no time to investigate after buying, so we went on to Chicago and made further investigation there, returning home perfectly satisfied that the Studebaker "6" was what we wanted. Mrs. [redacted] at first objected a little on the ground that it was too large a car for just two of us. This, according to my way of looking at it was no objection, the two extra seats are in the floor of the car, out of sight and out of the way; but very convenient when it is desired to take more than five passengers. The car in reality is not a heavy car, I think it is well proportioned and well built and the fact that it has one of the best companies in the country behind it was one of the strong points in its favor with me. The lines of the car attracted my attention the first time I saw it and I find that wherever I go people seem to admire it. We have driven it now nearly 1000 miles without a moment's trouble or inconvenience or any nature. If I were going to purchase a car to day it would be a Studebaker "6". The car is a portable car to ride in. Now, after COMPARISON: that's the way most Studebakers are bought! THAT'S the way this owner bought his. (Name furnished on request.) That's the way YOU will buy yours. AFTER comparison! Comparison is the BIG reason that Studebaker sales have more than doubled over last year's sales. And this is why: When you set this SERIES 17 Studebaker SIX side by side with any other 6-cylinder car on the market and make comparisons on the essentials of POWER, SIZE and basic QUALITY, you find that any other car that equals it, is priced from \$250 to \$400 HIGHER. You SAVE from \$250 to \$400 by buying a Studebaker—and you don't have to sacrifice one iota of the activity, endurance, luxury and low cost of maintenance that you want in a car. See the car and judge for yourself. You'll see why this letter was written. E. R. Wilson Automobile Co. 2550 Farnam Street, Omaha, Nebraska.

You may not even know what Bearings are in your car — such is the Satisfactory Service of HYATT QUIET BEARINGS
