Does Prohibition Prohibit?

The Testimony of the GOVERNOR OF KANSAS

(Extracts from an article in the St. Louis Post-Dispatch of Jan. 30, 1916.

"Gov. Arthur Capper of Kansas is looking for a man who can develop some method, psychological, mechanical or otherwise, to extract the truth from ordinarily good citizens who are customers of bootleggers."

"What Kansas needs most (said the governor) is someone who will evolve some method of extracting the truth from the patron of a bootlegger. The man who buys booze in Kansas is given to an exaggerated sense of honor."

"It isn't a club or lodge proposition, either. There are ties of fraternity that would cause a man to refuse to divulge the sale or dispensation of liquor in a club house. But there is nothing of this when the liquor is purchased from a bootlegger. In this case a man goes out hunting for liquor and finds it in some drug store, or livery stable, or down on an island, or some other out-of-the-way place where a man has set up a temporary joint."

"But to get information from men as to whom sold the liquor or a description of the place where the bootlegger was operating is next to impossible."

"It is the most remarkable condition I have ever found in Kansas and I did not know it was so general until I received reports from the County Attorneys."

That's what the Governor of Kansas Says about the Failure of Prohibition to Prohibit.
