Wife is Trying to Locate W. C. Lloyd, Perhaps Here

Fannie M. Lloyd wrote from Girard, Ala., to the city clerk to inquire whether her husband, W. C. Lloyd, is in Omaha.

"I am in a great deal of trouble and am trying to find my husband. We have two children, ill. My husband is at perfect liberty and will not be molested in any way if he will return to, or will write to me. He will hear news that will interest him," wrote Mrs. Lloyd.

LOWER AUTO BILLS

Knowledge of Their Cars Would Save Motorists Cost of the Repair Money.

EXPERT ON HOW TO DO IT

It is desirable, but true, that for each motorist who really understands his car in its multiple details...

The greatest abuse of the lubricating system, however, does not occur in the motor, but in the other parts of the car...

It is better to use too much grease than too little. Many of the parts will apparently run indefinitely without it...

When the gear box is tight it is rarely necessary to add grease, but it is not safe to assume that the grease will last forever...

When the steering gear uses very little grease, does not mean that it should be neglected, and the grease cup that is located on the housing should be frequently filled and screwed down.

Magнето and starting and belting generator bearings are invariably of the ball type and require very little lubrication. With the former it is sufficient to use two or three drops of light oil...

To run the motor with a lack of oil or with a cooling system out of commission is absolutely suicidal, and the effect in both cases is usually the same—scored pistons and cylinders. It is

not safe to operate the car with the water boiling, and as soon as the boiling point is reached the cause of the trouble should be found. If the circulation is stopped the car, in no case, should be run, nor should it be when the water is very far down in the radiator...

Lack of oil, and cooling difficulties, are usually indicated by knocks or rattling, and at the same time an appreciable loss of power. These danger signals must not be overlooked, in fact, a knock of any sort is usually serious and a thorough investigation of the car should be made before an attempt is made to proceed.

Only the best lubricants should be purchased, and unless you are a specialist on oils and greases it is best to go to the man from whom you purchased your car or to some repair man whom you know is capable of giving you a competent opinion of what lubricants to use...

Announcement has just been made by the Omaha Chandler Co. to the effect they have engaged the services of A. J. Goldings of the Chandler factory.

Goldings is thoroughly versed in the mechanical construction of motor cars, having been put through the regular routine of the factory.

Northrup and Bolton of the Omaha Chandler Co. regard him as a man who will benefit their organization to a great extent, as well as being a man capable of rendering expert service to Chandler owners.

increases. Water may form an emulsion and produce the same effect, while in winter there is always some danger of the water freezing and producing a stoppage of the lubricating system. As many men neglect to fill the oil reservoir often enough, it is a good plan to make a rule of doing it every day...

The moment the sighted fast enough the trouble should be found before the car is run any further. It is not done there is danger of the surfaces going dry and becoming burned out, and scored bearings will be the result...

Parts Neglected. The greatest abuse of the lubricating system, however, does not occur in the motor, but in the other parts of the car...

It is better to use too much grease than too little. Many of the parts will apparently run indefinitely without it, and many owners will form the impression that the grease cups were put on merely for ornament, but they will pay for their neglect in the end...

When the gear box is tight it is rarely necessary to add grease, but it is not safe to assume that the grease will last forever, and a good rule is to inspect it once a month...

OPERATION SAVES MOTHER AND CHILD

Dr. F. J. Schleiter Performs Successful Caesarian Operation on Mrs. S. R. Olson.

BOY WEIGHS EIGHT POUNDS

A successful Caesarian operation, which saved the lives of both mother and child, was performed at the We Memorial hospital Wednesday by Dr. F. J. Schleiter.

Mrs. S. R. Olson, 4827 Pierce street, is the mother upon whom the unusual operation was performed.

Mrs. Olson, who a week ago gave birth to her child, was suddenly seized with convulsions and in a few minutes she was unconscious.

Only the best lubricants should be purchased, and unless you are a specialist on oils and greases it is best to go to the man from whom you purchased your car or to some repair man whom you know is capable of giving you a competent opinion of what lubricants to use...

deported by the British government from Dublin.

The local branch of the socialist party will hold a tag day on September 20 for the benefit of the widows and orphans of Irishmen who were victims of the recent rebellion.

Exciting Movies Cause Youths to Steal, Say Mothers

Exciting motion pictures portraying the getaway of thieves aroused the minds of a trio of youthful burglars who appeared before Judge W. G. Sears in juvenile court...

The boys frankly admitted to Judge Sears that they had each broken into stores, entering through a rear window, while others had pilfered cigarettes, candy and cookies...

Johnny Duncan needs something more than fresh air to cure him of stealing from 10-cent stores and from grocers' wagons, according to the advice of Judge Sears...

SAXON "SIX" A big touring car for five people

It is not difficult to distinguish definite difference between Saxon "Six" and other cars of like price. It is perceptibly easier riding; it clings more closely to the road; runs more sweetly and quietly; accelerates faster; requires less gasoline to the mile; is sparing of oil and easy on tires; develops a smoother power-flow; and is far freer of repairs and adjustments. It is commonly conceded to be the fine car of its price class.

It is very satisfying to feel the eager ease with which Saxon "Six" leaps to full flight in response to the merest pressure of the accelerator. It will go from a standing start to 45 miles per hour in less than 24 seconds if you demand it. And if you desire to just idle along, it will run noiselessly at a mile and a half per hour on high. The motor is of the light-weight, high-speed six-cylinder type, of Saxon design, manufactured to Saxon specifications by the Continental Motor Company. The price of Saxon "Six" is \$815, f. o. b. Detroit.
