Shells as Things of Beauty

Some of the Uses to Which They Have Been Put

Part of a Shell Basket Made by the Indians of Lower California.

By GARRETT P. SERVISS.

Beautiful shells were among the first objects of adornment for his person and his dwelling that were used by man, and their forms and colors furnished some of his earliest lessons in aesthetic education.

Shells were also one of the first kinds of money. For the American Indians wampum beads made from shells took the place of gold.

The ornamental uses of shells, as Mr. L. P. Gratacap shows in the American Museum Journal, are as curious as they are numerous.

Shell basket made by the Indians of Central America, formed of small white oval shells; flowers are made of thin and shallow white and rose-tinted shells and both basket and flowers are constructed with fine wires very cleverly concealed.

alike composed of white and delicately tinted shells, held in shape by fine wires. Flower baskets, made of shells by the Indians of Lower California, although very striking in appearance, are ranked below the Central American products, because glue instead of invisible wiring is employed to hold the work together.

A truly magnificent article is a pair of bonbon dishes, belonging to Mrs. F. A. Constable, and loaned to the museum, which are formed of abalone

shells, supported by seahorses, the latter and the outside of the shells being coated with silver.

Thus at the museum there may be seen a life-size figure of a Tahitian "fire-walker," with his head encircled with a garland of shells which have not been disguised in the form of imitation flowers.

Primitive man in this respect has really shown better taste than civilized man, for among savage tribes shells were not used imitatively, although there were often employed as symbols.

The Fijian chiefs wore the orange cowry as a badge of office, and shells, used simply as shells because they were in themselves beautiful, have been found among the personal adornments of early man in all parts of the world.

Another use of shells more truly aesthetic than their employment to make imitation flowers is the adoption of their forms as suggestions in the arts. Mr. Ruskin thought that he could trace such suggestions, derived from the cockle shell, in some of the ornamental features of European architecture.

A fine adalste shell might afford to any artist fresh ideas in the combination of color tints.

When it was finally finished, she packed it in her portfolio tenderly and took it to the Call, the first magazine she had tried in New York.

And Muriel, forgetful of her teacher's advice, had set to work to make pretty girl heads when her mind was not in her work, and her mind was filled with other things.

At some place she was asked to leave her material, at others she was told that the work was not quite what they wanted.

She didn't blame the editors. But it wasn't until her money was nearly gone that she began to be really frightened and wonder what she would do.

At some place she was asked to leave her material, at others she was told that the work was not quite what they wanted.

Being on Level

BY BEATRICE FAIRFAX.

"Does it pay to be good?" wails Mabel. "I'm honest with people and I always do what seems the right thing.

To a practical question like "Does it pay to be good?" there is only one answer. "No—if you are looking for definite returns on your investment.

Of course, every once in a while some woman who has broken all the rules of society and morality marries a millionaire and is exploited as a ten days' wonder.

Now, if they thought about it sensibly, they would reflect that marrying a millionaire carries with it no guarantee of peace of mind or happiness or even of wealth and assured position for all time to come.

The mills of the gods in their grinding are pretty likely to bruise, or the chaff from the wheat—and the unselfish woman who seems to have managed her life efficiently according to her own likes may not have achieved her ends any more than temporarily.

But that is not the point of view to take. The thing that matters is that a girl who has the instincts of fineness in her nature simply cannot rest them up without tearing the most vital thing out of her life.

A hard, cold unprincipled man or woman may break and defy the laws of society and perhaps "get away with it"—temporarily.

But one has to pay for one's perceptions. Any human being who has within him or herself a feeling that certain things are fine and certain ignoble must either live up to his own vision of right or suffer tortures.

You can compromise with anything in this world but your own nature. That admits of no half measures.

To do things of which you are going to be ashamed, things which you know will bring sorrow to those you love, things for which the real penalty lies in your own miserable sense of not having lived up to the best in yourself is to twist and warp your life out of all semblance of beauty.

In the final analysis there is no happiness where there is no peace of mind. You can't disapprove of yourself and be contented.

There lies the real answer to the question, "Does it pay to be good?" To the man or woman who has a standard of what is good, the price he must pay for deviation from that standard is extortionate.

You simply dare not do evil if you know good; for, however the world judges you, you will have to go about with the acid of your own judgment of yourself eating into and corroding everything in your nature.

It simply doesn't pay to be anything but good.

How to Judge a Woman by Her Hair

There are always the well known and semi-humorous methods, such as saying brunettes are quick-tempered.

But there is real common sense in just noticing whether the hair is well kept to judge a woman's neatness.

If you are one of the few who try to make the most of your hair, remember that it is not advisable to wash the hair with any cleanser made for all purposes, but always use some good preparation, made expressly for shampooing.

You can enjoy the very best by getting some caustic from your druggist and dissolving a teaspoonful in a cup of hot water when your shampoo is all ready.

After its use the hair dries rapidly with uniform color. Dandruff, excess oil and dirt are dissolved and entirely disappear.

Your hair will be so fluffy that it will look much heavier than it is. Its luster and softness will also delight you, while the stimulated scalp gains the health which insures hair growth.
