VON HINDENBURG IS CHIEF OF STAFF

Conqueror of Russians on Many Fields Succeeds Von Falkenhayn as Man in Charge.

APPOINTMENT BY KAISER

Berlin, Aug. 30.—(Via London).—The emperor has dismissed General Erich von Falkenhayn and appointed Field Marshal von Hindenburg chief of the general staff.

Copenhagen, Denmark, Aug. 30.—(Via London).—The Ritasava News agency published a dispatch giving the official announcement of General von Falkenhayn's dismissal by the emperor as chief of the general staff and the appointment of Field Marshal von Hindenburg to the post. General von Ludendorff, von Hindenburg's chief of staff, the dispatch adds, has been appointed first quartermaster-general.

The recent appointment of von Hindenburg to the supreme command of the German army on the Russian front came when Roumania was considered on the verge of a decision and German newspapers indicated that it had a political bearing. Ger-

many was credited with the belief that the prestige of Von Hindenburg would favorably impress Roumania. As chief of staff Von Hindenburg doubtless will be withdrawn from the east to Berlin.

Your Baby is in Danger From Cow's Milk

Do you know that in Washington, the Government of the United States has a Public Health Service, that is working day in and day out to find out the best way to keep your baby well?

And this National Government Public Health Service says:

"One reason that each summer sees the slaughter of the innocents is because milk, as ordinarily marketed, is absolutely unfit for human use."

In the face of these words can any mother who loves her baby give him raw cow's milk full of tough indigestible curd? Cow's milk brings summer complaint, the dread scourge that takes so many babies from their mothers' arms each summer.

Nurse your baby—as long as you can, of course. If you can't, wean him on a food as free from sickness as mother's milk itself.

Nestlé's Food

(A complete food—not a milk modifier)

Nestlé's is safe, because no hand touches it and it doesn't sour. Nestlé's is safe because it contains just the right amount of proteins and carbohydrates your baby needs to build a sturdy body and an active brain. Cow's milk is the basis of Nestlé's—but cow's milk from sanitary dairies—purified, with the calf needs modified and the baby's needs added, it comes to you in a powder—packed in an airtight can. You add only fresh water and boil.

Save your baby from the terror of summer complaint.

Send the coupon for a sample can (enough for 12 feedings) and see how Nestlé's makes him happy.
