

### MORE MILKMEN ARE FINED BY JUSTICE

Twenty-Two Pay Up and Promise to Do Better—Caught by State Chemist.

#### OTHER CASES ARE PENDING

Twenty-two milk dealers paid the penalty for selling milk of the chalk water variety instead of the real lactical fluid when they fell into the traps laid by State Chemist W. T. Frisbee and his assistants Friday afternoon. All appeared before Justice of the Peace Kubat, paid their fines, ranging from \$10 to \$20 and costs, and went their way promising to refrain from using the town pump to bolster their business.

Out of 229 samples taken by Inspectors Maloney, Tusa, Morse and Kemble, in conjunction with the state chemist, these twenty-two cases were filed. Others are pending.

The state law provides that milk must test more than 3 per cent butterfat, while cream offered for sale must show 18 per cent or over. According to the complaints filed against the convicted dairymen the milk has averaged from 1 to 2 1/2 per cent butterfat, while the cream proved 10 to 15 per cent.

Country Milk Higher.

Tests made in country towns where there have been no attempts made to dilute the cream show as high as 30 per cent butterfat," said State Chemist Frisbee. "There is no reason for violation of the state law such as has been staged by careless Omaha dairymen."

Those who plead guilty and paid their fines, flooding the top drawer of Judge Kubat's desk with currency and silver, were:

Sam Christianson, Chris Spangard, L. E. Scott, Knud Knudson of the Walnut Hill dairy on two counts, James Milgard, Swendsen & Anderson, H. Sheinin, K. Knudson, C. Mortensen and C. Grasso of the Elite dairy, H. Norgaard, Charles Hansen of the Fairview dairy, Sam Christensen, C. Jensen, H. J. Peterson, Beck & Knudson, Chris Spangard on two counts, Chris Peterson, John Jacobson, P. W. Winter, James Milgard of the Central dairy, Jacobson & Bang of the Keystone Park dairy and W. F. Christianson.

### School Inspection Problem Solved by Appointing Nurse

Charlotte Townsend, who served last year as examining nurse in the public schools, has been appointed supervisor of the staff of school nurses.

This practically disposes of the school medical inspection controversy for the present. There are eight nurses examining children of the public schools. The plan will be that when an unusual situation arises in a school a competent physician will at once be engaged to advise and work with the nurses.

The Board of Education considered the proposition of engaging a physician on half time to have regular charge of the nurses and the school inspection work, but that plan has been abandoned in favor of the selection of a nurse to serve as chief of the examining staff.

A bill covering medical inspection of public schools will be offered to the legislature this winter by the Douglas county delegation. This measure will have the approval of the school officials before it shall be offered for passage. The proposed law will give the school officers specific authority, will provide for the expenditure of adequate funds to care for the children whose backwardness in school is due to adenoids, defective hearing, eyesight and teeth.

## Omaha Masons Have Plans All Laid for Laying of Corner Stone of New Temple

Impressive ceremonies will mark the laying of the cornerstone Wednesday of the new Masonic temple—a temple that will, when completed, represent an outlay of more than a half million dollars and rank as the finest structure of its kind west of Chicago.

Ground was broken for the building last spring, five floors of the skeleton steel framework at Nineteenth and Douglas streets being in place at the present time. There is one more floor of steel framework to be added. The masonry and brickwork has already been started on the first floor.

The laying of the corner stone will take place at 2 o'clock Wednesday afternoon.

The officers of the grand lodge of Nebraska Masons are to be escorted from the old temple, located at Sixteenth street and Capitol avenue, by a procession headed by the Arab patrol of Tangier temple, Nobles of the Mystic Shrine.

Following this body will be the Blue lodges of the city, with a division for the visiting brethren. The Knights Templar, forming a special escort for the officers of the grand lodge, will come next. When the column reaches the new temple the order will be reversed.

The order issued by Fred Rogers, imperial potentate of Tangier temple, requesting Shriners to wear their lezes in the procession to the new temple, has been recalled. Shriners are urged to march either with the Blue lodge or Knights Templar bodies. Shriners who are members of the Knights Templars will be expected to march with that division. Although there will be no assemblage of Scottish Rite Masons in a body they will march with the Knights Templar and the Blue lodges.

The oration will be delivered by Most Worshipful James R. Cain, jr., past grand master of Nebraska Masons.

Past Grand Master Alpha Morgan of Broken Bow, S. T. Davis of Tecumseh, and John Ehrhardt of Stanton will be here for the ceremonies.

It is hoped to have the new temple completed by next spring. The structure will be one of the most imposing homes of Masonry in the country, and naturally an important unit among the finer buildings of Omaha.

The description, "six stories high," does not do justice nor does it give but a faint hint at the true height of the structure. In reality the new Masonic temple will be as lofty as any ten-story building the city. The size of the plot of ground upon which it stands is 110 by 132 feet, situated on the northeast corner of Nineteenth and Douglas streets.

The construction cost of the building alone is \$350,000, \$100,000 having been paid for the lot. With the cost of the furnishings, etc., the total will be brought up to well over a million dollars.

The exterior of the temple will be of Bedford stone, terra cotta and brick. The interior will be finished for the most part in marble and tile, what woodwork there is to be quarter-sawn oak.

The classic lines of the Omaha temple are to be somewhat similar to those of the one in Brooklyn, N. Y., where the local building committee obtained many of its ideas to be incorporated in the structure here. This committee, consisting of L. Pettengill, chairman; M. M. Robertson and James A. Howard, visited the larger cities of the east and inspected the temples in each of them in order to gain ideas as to how the Omaha structure should be built. The Brooklyn temple was regarded as the finest of them all.

The first floor of the Omaha temple will be utilized for store rooms, five facing on Douglas street and one on Nineteenth street. Offices for business and professional men are to be on the second floor.

The banquet room, which is to take up the entire third floor, will be one of the most magnificent in the United States, with lofty ceiling and rich furnishings.

Offices for the Blue lodges and Grand lodge are to be on the fourth floor. Lodge rooms for the Commandery, the Eastern Star and the

OMAHA MASONIC TEMPLE AS IT WILL APPEAR WHEN COMPLETED.

Andrew H. Vile

Most Worshipful Grand Master Grand Lodge of Nebraska, A. F. & A. M.

different chapters will take up all the space on the fifth floor.

The sixth floor will be a huge auditorium, with a twenty-five-foot ceiling, seating 1,800 persons. It is to be used for big Masonic gatherings, balls, and the like. The Shriners will also hold their meetings on this floor. One of the features is to be a gallery extending around the auditorium.

### Big Steamboat is Headed This Way

A big steamboat is on its way down the Missouri river. When it is scheduled to come to Omaha is not known locally, or whether it is destined to Omaha or not. Captain Davy Walters of Decatur, who for a time operated

the Ada Belle between Decatur and Omaha, telephoned the Commercial club recently that he has been asked to go into Dakota and bring down this big boat for the owner there. Captain Walters was not advised as to what operations the boat is to start when it gets into Nebraska waters.

### Laborer, Despondent Over Ill Health, Shoots Himself

Mike Bogen, 35, laborer, of 1152 1/2 North Sixteenth street, shot himself. He was found in the rear of 1106 Douglas street shortly after noon. Despair because of continued ill health is the cause of the act. Attendants at St. Joseph's hospital say his chances for recovery are slight.

### Urges Everyone to Quickly Get on Water Wagon

Drinks glass of hot water before breakfast to wash out poisons.

To see the tinge of healthy bloom in your face, to see your skin get clearer and clearer, to wake up without a headache, backache, coated tongue or nasty breath, in fact to feel your best, day in and day out, just try inside-bathing every morning for one week.

Before breakfast each day drink a glass of real hot water with a teaspoonful of limestone phosphate in it as a harmless means of washing from the stomach, liver, kidneys and bowels the previous day's indigestible waste, sour bile and toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases and acidity and gives one a splendid appetite for breakfast.

A quarter pound of limestone phosphate will cost very little at the drug store, but is sufficient to demonstrate that just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the blood and internal organs. Those who are subject to constipation, bilious attacks, acid stomach, rheumatic twinges, and those whose skin is sallow and complexion pallid, are assured that one week of inside-bathing will have them both looking and feeling better in every way.—Advertisement.

## Low Nuxated Iron helped me to whip Frank Moran

JESS WILLARD TELLS SECRET OF HIS EASY VICTORY. ALSO REVEALS HITHERTO UNTOLD SECRET OF HIS GREAT TRIUMPH OVER JACK JOHNSON; SAYS IRON IS GREATEST OF ALL STRENGTH BUILDERS

Ordinary Nuxated Iron will often increase the strength and endurance of delicate, nervous folks 200 per cent in two weeks' time.

SPECIAL NOTE—Dr. E. Bauer, a well-known physician, who has studied widely in both this country and Europe, has been specially employed to make a thorough investigation into the real secret of the great strength, power and endurance of Jess Willard, and the marvelous value of nuxated iron as a strength builder.

NEW YORK—Upon being interviewed at his apartments in the Colonial Hotel Mr. Willard said, "Yes, I have a chemist with me to study the value of different foods and products as to their power to produce great strength and endurance, both of which are so necessary in the prize ring. On his recommendation I have often taken nuxated iron and I have particularly advocated the free use of iron by all those who wish to obtain great physical and mental power. Without it I am sure that I should never have been able to whip Jack Johnson so completely and easily as I did, and while training for my fight with Frank Moran, I regularly took nuxated iron, and I am certain that it was a most important factor in my winning the fight so easily." Continuing, Dr. Bauer said: "Mr. Willard's case is only one of hundreds which I could cite from my own personal experience, which proves conclusively the astonishing power of nuxated iron to restore strength and vitality even in most complicated chronic conditions."

Not long ago a man came to me who was nearly half a century old, and asked me to give him a preliminary examination for life insurance. I was astonished to find him with the blood pressure of a boy of 20 and as full of vigor, vim and vitality as a young man—in fact a young man he really was, notwithstanding his age. The secret, he said was taking iron—nuxated iron had filled him with renewed life. At 20 he was in had health; at 46 careworn and nearly all in. Now at 60 a miracle of vitality and his face beaming with the buoyancy of youth. As I have said a hundred times over iron is the greatest of all strength builders. If people would only throw away patent medicines and nauseous concoctions and take simple nuxated iron, I am convinced that the lives of thousands of persons might be saved who now die every year from pneumonia, grippe, consumption, kidney, liver and heart trouble, etc. The real and true cause which started their disease was nothing more or less than a weakened condition brought on by lack of iron in the blood. Iron is absolutely necessary to enable your blood to change food into living tissue. Without it, no matter how much or what you eat, your food merely passes through you without doing you any good. You don't get the strength out of it, and as a consequence you become weak, pale and sickly looking, just like a plant trying to grow in soil deficient in iron. If you are not strong or well, you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-thousandths per day after meals for two weeks. Then test your strength again and see for yourself how much you have gained. I have seen dozens of nervous, run-down people who were ailing all the while, double their strength and endurance and entirely get rid of all symptoms of dyspepsia, liver and other troubles in from ten to fourteen days' time simply by taking iron in the proper form. And this after they had in some cases been doctoring for months without obtaining any benefit. But don't take the old forms of reduced iron, iron acetate or tincture of iron simply to save a few cents. You must take iron in a form that can be easily absorbed and assimilated like nuxated iron if you want it to do you any good, otherwise it may prove worse than useless.

Many an athlete or prize fighter has won the day simply because he knew the secret of great strength and endurance and filled his blood with iron before he went into the arena, while many another has gone to the Sherman-McConnell drug stores and all good druggists.

NOTE—Nuxated Iron, recommended above by Dr. Bauer, is not a patent medicine nor secret remedy, but one which is well known to druggists and whose iron constituents are widely prescribed by eminent physicians everywhere. Unlike the older inorganic iron products, it is easily assimilated, does not injure the teeth, make them black, nor upset the stomach; on the contrary, it is a most potent remedy in nearly all forms of indigestion, as well as for nervous, run-down conditions. The manufacturers have such great confidence in Nuxated Iron that they offer to forfeit \$100,000 to any charitable institution if they cannot take any man or woman under 60 who lacks iron and increase their strength 200 per cent or over in four weeks' time, provided they have no serious organic trouble. They also offer to refund your money if it does not at least double your strength and endurance in ten days' time. It is dispensed by Sherman-McConnell drug stores and all good druggists.

Among all the prominent figures of the prize ring probably none is so devoted to family life as Jess Willard. After each engagement the champion hurries to his wife and children and remains at their side until public demand forces him to leave for new encounters. Everything is done to bring up the "Little Willards" with strong healthy bodies. Mr. Willard accounts for his own success by saying:—

"I consider that plenty of iron in my blood is the secret of my great strength, power and endurance."

## Right and Privilege

There is a vast difference between right and privilege. That a manufacturer has a right to make beer is undeniable. That the individual has a right to drink beer—moderately and temperately—is indisputable. It is the sale of and traffic in beer that is a privilege.

Why should the right of the manufacturer and the right of the individual be endangered by the misuse of privilege?

Is it not wiser to better regulate and control privilege than to impair and destroy rights?
