WOMEN LISTEN TO REASON

You who suffer, why do you hesitate to try what has removed the sufferings of others? That good old fashioned remedy, made from roots and herbs—Lydia E. Pinkham's Vegetable Compound—has stood the test. It has no rival in overcoming the ailments peculiar to your sex. Why should it not do for you what it has done for others? Give it a chance.—Advertisement.

How to Absorb an Unlovely Complexion

The face which is admired for its beauty must have a satin-smooth skin, pink and white and youthful looking. The only thing known that can make such a complexion out of an aged, faded or discolored one—that is, a natural, not a painted, complexion—is ordinary mercuric wax. This remarkable substance literally absorbs the unsightly cuticle a little each day, the clear healthy, girlish skin beneath gradually peeping out until within a week or so it is wholly in evidence. Of course such blemishes as freckles, moth patches, liver spots, blotches and pimples are discarded with the old skin. If you will procure an ounce of mercuric wax at the drug store, use like cold cream every night, washing this off mornings, you'll find it a veritable wonder-worker. Another valuable natural treatment is a wash lotion to remove wrinkles which can be easily prepared. Dissolve an ounce of powdered salicylic acid in a half pint of witch hazel. Bath the face in this and you'll find it "works like magic"—Advertisement.

John L. Kennedy Speaks on Tariff Issue at Ravenna

Ravenna, Neb., Oct. 2.—(Special).—Preparedness for peace by the adoption of a protective tariff that will protect the products of the Nebraska farm equally with the products of the farms and factories of the southland was the theme of an address delivered in the opera house here Saturday night by John L. Kennedy of Omaha, republican candidate for United States senator.

Mr. Kennedy referred to the prosperity of today as the result of the world war now raging in Europe which has taken 30,000,000 men from the force of producers and put them in the class of consumers only, thereby creating an undue demand for the products of the United States. After the war many will go back to work and for a long time the United States will be the dumping ground for the products of the industry of Europe unless American industry is protected by a tariff such as the republican party always stood for, he said.

He pointed out that the last democratic congress under the control of the southern members had realized the value of a protective tariff and had applied it to their own localities and that the products of the home state of President Wilson are now protected and also the products of the home state of Oscar Underwood, whose name the present tariff measure bears.

Mr. Kennedy said that he was unable to understand how Mr. Hitchcock, his opponent, could vote for a measure which gave protection to the products of the south, but denied it to the products of his own state, Nebraska.

Mr. Kennedy was introduced by Charles G. Goman, pastor of the Methodist church here. In the audience was C. N. Davenport, cousin of William Jennings Bryan. He is one of the active and influential republicans in this vicinity, and while he shares his illustrious cousin's belief on moral questions, he does not agree with him on all economic questions.

Palmer of Clay Center is circulating a petition in Sutton asking the county board to levy a special tax of 5 mills for the purpose of raising funds for the erection of a new court house at Clay Center. The levy will produce about \$40,000 a year, which would pay for the building in three years.

SLOAN DISCUSSES RIGHTS OF HOUSE

Method Used to Force Adamson Bill Through Direct Blow to Free Government.

MEMBERS GIVEN ORDERS

Aurora, Neb., Oct. 2.—(Special).—In his address before the Aurora Young Men's Christian association Sunday afternoon Congressman Charles H. Sloan declared that the implied demand of the four representatives of organized labor for the enactment of the so-called eight-hour law and the enactment of that law by congress in compliance with that demand was the hardest blow representative government has had in a century. Mr. Sloan described the various means whereby the power of the house of representatives has been undermined by presidents, senate and outside influences in the past. He insisted that every blow at the house of representatives is a blow at the liberties of the people.

Mr. Sloan described the present house of representatives and its leaders, referring specifically to Speaker Champ Clark, Democratic Leader Claude Kitchin, Republican Leader James R. Mann, Congressman Fitzgerald and Gillett. These men, he said, are typical. The speaker, he declared, was four square. None doubted his veracity or his integrity. That he would be sized up as a great speaker by deliberate historians, the congressman believed.

Kitchin and Mann are opposites, said Mr. Sloan. Kitchin is fiery in speech and a hater of details, careless of parliamentary procedure. Mann is the greatest detail man in the house. He is one of the best parliamentarians.

Mr. Sloan declared that the liberties of the people will be safest when the representatives shall be free from patronage and from threats of any man or any number of men. The four representatives of organized labor sat in the room of the ways and means committee and held a stop watch on congress, he said. Congressmen became messengers from these four men

MOTHER LOVE AIDS SON IN TRENCHES

It Brings Relief to Boy Standing His Watch Deep in Mud.

Once upon a time, only a few months after this terrible world war had begun, Private Bailey, a soldier in the ranks had stood for days in the trenches "somewhere in France." The cold rains soaked him to the skin; the mud was deep. He had had no rest. Weary and aching with rheumatic pains, he recalled the faith his mother had in Sloan's Liniment. He asked for it in his next letter home. A large bottle was immediately sent him and a few applications killed the pain, once more he was able to stand the severe exposure. He shared this wonderful muscle-soother with his comrades, and they all agreed it was the greatest "reinforcement" that had ever come to their rescue. At your druggist, 25c, 50c and \$1.00 a bottle.

to tell the house what legislation they would accept.

"It was not a question of hours of labor," he said. "It was more a question of higher wages. These men may be entitled to more pay. I do not know. We had no means of finding out in the few hours they gave the house before the date set for the strike. The great question was whether or not any few men or any number of men could go into the house of representatives and command the representatives of all the people to vote blindly for any measure. One group stood for the law on the ground that it would avert a great calamity. Another group opposed it because they would not be forced into the passage of that legislation without knowledge as to its necessity, justice or constitutionality."
