

SEE NEW SIGNS OF CAR ROBBER GANG

Another Stolen Auto Recovered and Man Put Under Arrest.

POLICE PROBING THE CASE

The net thrown around the alleged gang of automobile thieves, to whose possession has been traced many stolen cars, is being tightened by the Omaha police, who are directing the hunt for auto runners throughout Nebraska, Iowa and Minnesota.

One more arrest was made last night, when James Kellogg, operator of a garage near Twenty-fifth and Twenty-sixth streets, was jailed by Detectives Cuger and Brinkman, and the police policeman Charles Pipkin. He is being held for investigation because two automobiles which have been identified as the ones stolen from Thomas Swinn, Shenandoah, Ia., and B. F. Walker, 220 South Sixth street, Council Bluffs, were found in a barn, said to be owned by him at Sixtieth and Woolworth.

Seventh Suspect: His arrest makes the seventh suspect to be taken in Omaha. In Sioux City four persons are held, and in Minneapolis, one man. Another member of the alleged syndicate was killed near St. James, Minn., last Monday, when a stolen machine went into a ditch.

Two stolen cars have already been turned over to the rightful owners; the police have in their possession half a dozen more from which licenses and engine numbers have been removed, indicating that they are stolen cars, though the owners cannot be found.

Find Metal Stamps.

When the police went to the Kellogg barn yesterday, they found sets of dies, such as are used in stamping numbers into metal, in addition to the Buick car, which had been stolen from Mr. Gwinn a week ago. The Ford car was also recovered. From neighbors it was learned that on last Friday four cars were removed from the barn, under cover of darkness, and driven off.

The police have in their possession the location of a about a dozen more autos stolen in Omaha, and sent to other cities, and momentarily are expecting the arrest of men who ran the machines away. According to the authorities, at least a dozen more arrests are to be made.

First Clue Received.

Motorcycle Policeman Pipkin discovered a clue, which pointed to a man named Wiggins, as a member of the gang. Wiggins, who was uncovered in the fatal accident in Minnesota last week, developments followed thick and fast, direction of the crusade being conducted by Chief Dunn and Pipkin in Omaha.

Those Under Arrest.

- Mrs. Louis Ageman, wife of a druggist at 1194 North Sixteenth street, garage keeper.
J. F. Swanson, London hotel, Omaha.
H. F. Godard, 1936 Clark street, Omaha.
D. E. Sullivan, Armour, S. D.
H. E. Barry, Sioux City.
D. C. Morris, Jr., Sioux City.
In the Sioux City jail are the following suspects:
L. Assman, Omaha druggist.
Harry Godard, Council Bluffs.
Bert Wright, Sioux City.
Carl Hoadwood, Sioux City.
County Attorney Magney and Police Magistrate Foster were in conference last night, arranging bonds for the suspects held in jail and discussing various angles of the affair.

Tama Jim Wilson Heads Iowa Hughes Alliance Branch

New York, Oct. 8.—James Wilson, secretary of agriculture in the McKinley, Roosevelt and Taft administrations, has been elected president of the National Hughes alliance branch in Iowa. Among the vice presidents of the Iowa organization are Howard Clark, Casper Schenck, both of Des Moines; C. K. Bratton, Dallas Center; George White, Nevada; Judge Atlee, James; R. E. Bales, Des Moines; is secretary and Gilmer Mackinnon, also of Des Moines, treasurer. This list, containing the names of former progressives like Mr. White and Mr. Schenck, shows how the old division in Iowa has been healed and how both sides are together in support of Hughes.

A Missouri branch of the alliance has been formed, with Dwight F. Davis as president; Forrest Donnell, secretary; and David R. Calhoun, treasurer and chairman of the finance committee. Mr. Davis, who is the donor of the international Davis tennis cup and former tennis champion, is a member of the Harvard board of overseers, a leader in civic affairs in St. Louis, being a member of the Park commission of the City Plan commission, Society for the Prevention of Tuberculosis, many other associations, and is a director in several financial institutions.

Father Claims Wife's Body After She Commits Suicide

Just as Coroner Willis Crosby had despaired of finding relatives of Winifred Smith, the despondent girl-mother who ended her life by taking poison a week ago last night, and was about to give the body to medical students for experimental purposes, Arnot Smith, her husband, walked in and claimed the corpse.

Cured Her Children of Colds.

During the past winter I had occasion to give Chamberlain's Cough Remedy to my two children, who were at the time suffering from severe colds. It proved to be the very medicine they needed," writes Mrs. Myron J. Pickard, Memphis, N. Y. Obtainable everywhere.—Advertisement.

Some of Latest Model Georgette Wraps

What is she thinking about so calculatingly, the lady above? She is thinking she will order another waist like the one she has on. It may be had in navy blue, brown, plum, black or green Georgette crepe, with embroidered dots on the white net, collar and cuffs.

Fashion has come to the parting of the ways once more. The Winter models of the great French dress-makers confirm the straight lines of the earlier models shown in September. Much will be written and said about the change of "line," and to be sure the whimsical, genius-like, and always delightful French designers have given us something new to wear this winter, but, like all coming events, this change from the looped-up hoop-skirt to the straighter silhouette, which is now the smart one, came rather naturally and does not seem particularly radical.

Wool embroidery? Everyone is wearing it this year, and a waist of Georgette crepe with collar and cuffs of white charmeuse gives it a pleasing opportunity. On a navy-blue waist the embroidery is green or copper; on a brown or flesh-colored model it is copper.

rather naturally and does not seem particularly radical. A striking characteristic of the French clothes is a lavish use of embroideries. This is to be found in old silver and old gold, as well as in wool and even in beaded effects. Fashion is always neutral, and Chinese, Japanese, Venetian and ecclesiastical patterns have been used impartially. Braiding is almost as much in evidence as embroidery, and is to be found in close designs, used not only in bandings, but also used in many cases as a very prominent part of the suit or dress itself.

State University

The first steps looking toward the union of the students into one self-governing association, which will plan a building devoted entirely to students' social and recreation needs, were taken when it met with Prof. E. H. Harbo, the general chairman, last week, and began the work of collecting data, which might be used in formulating a university union plan. The committee will meet again this week, and within the month will call for a meeting of all the students to listen to the proposals.

The committee has several definite plans in view for turning the students into one self-governing association, which will plan a building devoted entirely to students' social and recreation needs, were taken when it met with Prof. E. H. Harbo, the general chairman, last week, and began the work of collecting data, which might be used in formulating a university union plan. The committee will meet again this week, and within the month will call for a meeting of all the students to listen to the proposals.

Applications for the next university spring week shows that will tour the state spring vacation, 1917, have already begun to pour into the office of student activities. A number of students have already signed contracts in Lincoln, the first year of the shows, is one of the first to insist that it be given there this year. Five towns in the western part of the state, Oxford, Linden, McCook, Holdrege and Beaver Crossing, have handed themselves over to secure the week. J. J. Saunders is the business manager of the exhibition this year, and he will start the work of contracting for the town soon.

The University Business Women's club and the Business Women's club of the city of Lincoln will co-operate next month in a general survey of the business women's status in Lincoln, with the view of determining women's standing, and possibly getting better representation. The University Business Women's club, at a series of Thursday afternoon meetings, has been addressed by women of the city of Lincoln, who have been successful in the business world.

Dr. Walter G. Hittner, '94, and Mrs. W. G. Hittner, '94, who have been in Lincoln since 1914, have returned to Lincoln for a long furlough. They will lecture to the university students, faculty and student body, at the Temple theater, and Tuesday evening Mrs. Hittner will speak to the university girls at supper services.

The effort to raise money to send the university to Oregon with the foot ball team for the Oregon League game at Portland will be continued this week by a tag day Tuesday for the girls, and a benefit dance at the Temple theater, at which the band will play, and all of the proceeds go into the fund. The Black Mountain girls' society, will tag the university girls. The incentives are behind the dance.

Next Tuesday evening the cadet officers will hold their annual banquet at the Lincoln hotel.

When J. Frank Hanly, prohibition candidate for president, left Lincoln last week he wore the hat belonging to C. A. Soronson, a member of the Lincoln reference bureau. The exchange was made at the meeting, when Mr. Hanly addressed the students. Mr. Soronson introduced him to the audience. The two had hung their hats together, and made the change unobtrusively when they left.

State Normal School

Prof. Wilson has a class of city teachers taking the course in sociology on Wednesday at 7 o'clock.

Prof. Stockdale has been invited to attend the rural school conference at Kearney on October 25 to 28.

Prof. Wilson gave at chapel on Friday a very interesting account of some important laws passed by the recent congress. Excellent music, a charming recitation by Mrs. Elliott and an inspiring talk by President Elliott were features of the occasion.

The reception given to the students of the normal on last Wednesday evening was a very enjoyable affair. A program of excellent music, a charming recitation by Mrs. Elliott and an inspiring talk by President Elliott were features of the occasion.

Miss Madeline Harmon, director of physical training for young women in the normal last year, has a good position in the normal school at La Crosse, Wis.

On Thursday at 4 o'clock Miss Harris is giving instructions to the students in the use of the library. The Dewey system of arranging the use of reference books to the best advantage is used.

The junior class elected Glenn Krumpholtz president; Miss Helen Blich, vice president; Elsie McMillan, secretary; Florence Collins, treasurer; and Emil Benthall, sergeant-at-arms. The speaker is Miss Belmont.

President Elliott is planning a reception for the faculty and the citizens of Chadron and vicinity on October 8 at the normal to give them an opportunity to meet the members of the Normal board, who will be in Chadron for the next regular meeting.

Nebraska Wesleyan University

Rev. E. N. Tompkins of Trinity Methodist church, Lincoln, addressed the men at the chapel Thursday morning.

The Franklin Literary society is starting out the year with a number of new members and a list of three hours were spent in a social way.

A number of faculty members took their luncheon and walked to Bethany Grove Friday evening, where two of three hours were spent in a social way.

Convocation Friday morning was given over to the interests of formal representatives of the debaters, extemporaneous speakers and orators giving short talks. Prof. Venable was in charge.

Grand Island College

The girls will begin their basket ball practice next Tuesday afternoon. Prof. Noel will, for a time at least, act as coach. The students' association has spent considerable time in developing and practicing new yells in preparation for the foot ball season. The executive committee had an interesting session last Tuesday evening. Among the out-of-town members were Messrs. C. P. Shoff, Ed Baker and B. P. Richardson of Hastings and Hanker L. L. Brandt of

FEW DANCERS GO TO THE MASK BALL

Social Leaders and Governors Chaperon Event, Which Was on Elaborate Lines.

NUMBER IS DISAPPOINTING

The mask ball at the Den last night was a pleasant affair, but the attendance might have been much larger without taxing the capacity of the building. In fact, there were only about 150 spectators. There were, possibly, 250 to 300 dancing.

There was a big orchestra and all the beautiful settings of the castle of the king, just as they were the night before when the king was crowned. The mask ball started off, like the coronation ball, with the appearance of sixty dancing girls in flowing robes of green and yellow and red, suggestive of woodland colors. Several of the girls were only 3 to 5 years old and their dancing and pirouetting won great applause.

The evening dress of a number of social leaders blended with the costumes of the other maskers, the nurse, the bad man of the west, the Mexican, Dutch boy, jockey, torador, "rube," lady of the harem, Japanese, convict, Arab and so on.

The Ak-Sar-Ben governors were there also in their evening togs, among those noticed being Messrs. E. Buckingham, L. C. Nash, George Brandeis, and their wives.

The fact that the turnout was a disappointment was not concealed by those in charge of the ball.

Crank at Neligh Draws Good Crowd; Clinches Argument

Neligh, Neb., Oct. 8.—(Special.)—A. L. Crank addressed a large crowd here this afternoon. In spite of the fact the only available public hall of size was in use, Mr. Crank addressed a large crowd from an automobile on the street. His audience paid close attention and on numerous occasions expressed its approval of his remarks.

He devoted his attention largely to a discussion of the need of a protective tariff, which would be imperative at the close of the European war. His remarks on the handling of the Mexican situation were especially well received, especially as he noted the humiliating position in which the administration had placed this country.

His address was particularly strong in that he gave the Wilson administration credit for the good things which it had done, which put an added point to his criticism of other acts which he disapproved.

Platte County Roused Against Democrats

Columbus, Neb., Oct. 8.—(Special Telegram.)—Before an audience of several hundred Germans and their families last Thursday night Rev. Koolen of Leigh delivered a brilliant address in which he took President Wilson and the democratic administration severely to task, alleging flagrant partiality in favor of the allies against the Germans.

The occasion was in the form of a German entertainment and dance given under the auspices of the Columbus lodge of Sons of Herman in the Columbus Maennerchor hall and was in no way a political meeting.

However, Rev. Mr. Koolen, who is a splendid orator, injected this spontaneous chastisement of the Wilson party and it met with hearty applause.

HERE'S A NEW WAY TO MAKE YOUR FEET GLAD

When your feet are sore and with the sores that come of standing or walking long hours, when they burn and throb, when they perspire excessively and grow tender as balls and you wish that you had wondrous relief from their pain, there is a simple, easy method of relieving them. It is a simple, easy method of relieving them. It is a simple, easy method of relieving them.

Delightful for use in bath. Leaves a skin soft and sanitary. If your druggist hasn't Wa-Ne-Ta, send us 10 cents for a sample package and we will mail it to you prepaid. You'll thank us for the suggestion. L. C. London Co., South Bend, Ind. Adv.

CAPITAL IS STIRRED BY U-53'S VISITS

Naval Officials Greatly Interested in Trip of Armed Subsea Across Atlantic.

DISCUSS ITS SIGNIFICANCE

Washington, Oct. 8.—While the flying visit of the German war submarine Newport harbor was the main topic of discussion among navy officers tonight, it was the probable mission of the submarine which interested them rather than the mechanical features of the submersible or the significance of its trip from Germany as it might affect naval warfare.

The distance covered by the submarine from Wilhelmshaven is well within the cruising radius of much smaller vessels than the U-53, including some of the older craft of the American navy. However, it is believed that even the big "U" boats could not carry enough fuel oil for a round trip across the Atlantic as well as for a tour of cruising duty on this side.

For this reason many officers appeared to believe that the purpose of the U-53 must have been more to give a demonstration of the possibilities of submarine warfare than actually to lie in wait for British or Canadian vessels plying across the Atlantic.

Much Greater Sensation. The merchant submarine Deutschland crossed the Atlantic and returned, but it is realized that the appearance of an armed naval underwater boat will create a much more profound impression, particularly upon the public mind in this country.

It was expected that the visit would revive immediate rumors of a German submarine base on the north Atlantic coast and of secret radio stations maintained along the American coast by German interests for the purpose of communicating with the undersea boats.

For a submarine patrol off American or Canadian ports, provision would have to be made to supply the fuel, torpedoes and food supply. The average submarine carries not more than ten or twelve torpedoes at most and since the chances are that several of these would be fired for every hit recorded, it would seem necessary that a reserve supply be kept close at hand.

Women Held Not Guilty Of Shooting Her Husband

Sioux Falls, S. D., Oct. 8.—(Special Telegram.)—Ruth Coles, a negro, who, with her husband, formerly resided at Omaha, was acquitted by a jury in the circuit court here this evening of the charge of murdering her husband, James Coles, at their apartments in this city, in July.

TURN GRAY HAIRS Mildly and Healthfully

Mary T. Goldman's Gray Hair Color Restorer is the original preparation for safety and quickly restoring the natural color to gray, faded and bleached hair in a few days. Leaves the hair clean, fluffy and natural.

Free Trial Package and special comb. Test it on a lock of hair. This test will prove more than anything we could say in an advertisement. Write now and be sure to tell the original color before it turned gray. Was it black, dark brown, medium brown or light brown? Regular \$1.00 size at your druggist's, or I will fill your order direct. Clear instructions, not being able to imitate the preparation itself, have copied our labels almost word for word. To be sure, remember the name, Mary T. Goldman, 21 Goldman Bldg., St. Paul, Minn.

The Old Ant Lion Gives a Few Lessons

(All the incidents described have actually occurred in the pits of ant-lions, but as far as the writer knows two of the insects never really associated in any such way as he has described. The ant-lion, when it makes pits, is in the larval stage. It is afterward transformed into a winged insect.)

By GARRETT P. SEVIER.

A large and vigorous ant-lion (it was only half an inch long, but big enough for its world), stood, as if hesitating, in the midst of a sunny sand plain, several yards square, across which a crazy-seeming ant now and then ran a crooked course in search of something it could not find, while once a glided chrysochalcid, better, a dazzling, living emerald, golden green above and purple green below, alighted for an instant, only to disappear in a flash of jeweled fire.

The ant-lion regarded the ants, and perhaps the brilliant beetle, with satisfaction. Their appearance seemed to put an end to its hesitation. It stretched wide its long, forceps-shaped mandibles just once, as a tiger will unheath his teeth at sight of his prey, and then it set itself in motion, going backwards, after the immemorial fashion of its ancestors.

It was an ugly beast, with its large, square head, and its oval, dull gray, warty body shaped like a wood louse, and its movements were slow and deliberate, so much so, indeed, that an onlooker might have wondered what danger could threaten such agile creatures as ants from so cumbersome an enemy as this.

The ant-lion had hardly taken its first backward step when another of its kind, evidently young and inexperienced, approached from the shelter of a neighboring grass tuft, and immediately the big fellow, as naturally as if he had been a two-legged hoer of corn, stopped, and, metaphorically leaning on his hoe, fell into conversation with his visitor.

"Good day," he said. "It's good weather for ants and there are lots of them about here. They're good eating, too. Have you come to learn how to catch them? If so, now is your chance, for nobody understands that business better than I do."

"I suppose I ought to know by nature," replied the youngster, "but I'm willing to learn from such an old head as you."

The old fellow thereupon resumed his scarcely begun labor, and his new companion followed all his motions with curiosity. Thrusting the end of his abdomen into the soft sand, the worker plowed backward with all the strength of his six stout, hairy legs, and with a geometrical instinct rivaling that of a bee marked out a perfect circle about nine and half inches in circumference, or three inches across.

"There!" he exclaimed when the circle was finished. "That's done, and you'll never see a better."

If he had been familiar with human history (which no doubt he would have despised as a pack of yarns about absurd giants) he might have compared his feat with that of Romulus when he plowed the outlines of his coming city.

The next proceeding of the ant-lion would have been a lesson to canal builders. He placed himself at the inner edge of the circular furrow and, moving slowly backward,

while keeping as accurately to the curve as if his body had been the tracing point of a pair of compasses, he made a scoop-shovel of one of his legs, with which he continually heaped loads of displaced sand upon his broad head and jerked them, with powerful exertions of the neck muscles, to a distance of several inches beyond the outer limits of the circle.

The young ant-lion looked on with admiration, and would have clapped his hands if he had had any, while he watched this living combination of excavator and dredger, reinforced with the ejecting powers of a catapult, sweep slowly round the circle, regularly widening and deepening the original furrow on the inner side. Round and round went the wonderful insect, making circle within circle, each at a lower level, because, with an instinct to which science could have taught nothing, he always could have lagged nothing, he always could have dug an outside one.

Thus, when at length he reached the center, he was at the bottom of a conical excavation in the sand, all of the material that had filled the space having been thrown outside the circumference of the bounding circle. The depth of the excavation was about two inches, so that the sandy walls were as steep as they could be made without caving in.

During this triumphant exhibition of the highest skill and knowledge of his race, the younger ant-lion remained at the brink of the circular cavity, peering down with increasing interest and receiving frequent warnings from the busy worker below to keep out of the way and to stop rolling sand down. Presently, provoked by the awkwardness of the visitor, who incautiously sent an avalanche down into the pit, the excavator muttered: "I'll fix you, young fellow!"

He had just come upon a pebble in the sand half as big as himself. With astonishing strength and skill, he worked it upon his head and, exerting all his force, he hurled it with unerring aim, taking the disturber full under the jaws, like an uppercut in the prize ring, lifting him from his feet and rolling him over. But he was tough—ant-lions, naturally are—and no bones, or their equivalents, were broken. "My work's finished. Slide down and do as I tell you. Bury yourself in the sand by my side, so that only your jaws show. We'll lie in wait, and sooner or later some curious ant or other toothsome insect will put his feet on the crumbling brink and come down with a rush of sand, then we'll have a real feast. You see what it is to be a skilful trapper."

"Oh, grandma," exclaimed little Doris, who had been rummaging through an old bureau-drawer in the attic, "what a curious looking bug this is!"

"Yes, dear," replied grandmother. "That was your grandfather's catchpenny. And you keep it in memory of the old days!"

"My dear, in memory of the old days," Philadelphia Ledger.

Why Bread Prices Must Advance

A year ago we could make the 5c loaf at a small profit. Flour was then \$4.50 per bbl. Now it's \$8.00. Milk was \$4.55 per 100 lbs. Now it's \$5.65. Lard was \$9.00. Now \$14.70. Vegetable oil was 46 1/2 c a gallon. Now 88 2-3c. Sugar was \$5.20 per 100 lbs. Now \$7.00. Wrapping paper was \$1.38 per 1,000. Now \$3.00. Gasoline (for delivery), is double, fuel oil up 70 per cent, horse feed 25 per cent, machinery 25 per cent to 50 per cent.

Now, we must either materially reduce the weight of 5c and 10c loaves, or eliminate 5c loaves and reduce the 10c loaf only slightly.

Which do you prefer? You'll ALWAYS get more and better bread for your money in 10c loaves than in 5c loaves.

Won't you cast your vote by refusing to buy 5c loaves in the future!
