

### EPISCOPALIANS, LAY AND CLERICAL, MEET

#### Triennial Convention of Supreme Body of the Anglican Church Opens in St. Louis.

#### TALK IMPORTANT CHANGE

St. Louis, Mo., Oct. 10.—Protestant Episcopal churches, both lay and clerical, from all parts of the United States, and from mission fields, together with a few from England and Canada, gathered in St. Louis tonight for the opening tomorrow of the triennial convention of the church, the supreme legislative body of the Anglican church in the United States.

The sessions of both houses, the bishops, and the deputies, will be held in Moolah temple, a building recently erected here by the Nobles of the Mystic Shrine. The session of the bishops, comprising all of the diocesan and missionary bishops of the church, will be held behind closed doors, but the meetings of the deputies, comprising lay and clerical delegates, will be open.

Every proposition affecting the constitution, law, and ritual of the church must be approved by both houses to become operative. Prayer book amendments must be approved by both houses of two successive triennial conventions to become effective.

#### Segregate Negroes.

One important constitutional change will come before the general convention, but if approved it cannot become effective unless it also is ratified by the general convention of 1919. The proposed amendment authorizes the creation of dioceses of negro churches and removes the negro parishes from the supervision of the present diocesan bishops. This proposal first was suggested by the southwestern province, comprising the dioceses in Missouri, Arkansas, Kansas, Oklahoma, Texas and New Mexico. If the amendment is adopted, negro bishops will be chosen to preside over negro dioceses. The constitution at present permits the election of negro suffragan bishops in the various dioceses, but none such has been chosen.

One paramount question in church law will come before the general convention—that of divorce. The canon at present permits a clergyman of the Episcopal church to perform the marriage ceremony in the case of the innocent party to a divorce granted on statutory grounds, providing the case first has been submitted to and the marriage authorized by the bishop of the diocese.

The proposed canon, which will become effective, if it is approved by the general convention this year, prohibits a clergyman from performing the marriage ceremony for any divorced person regardless of the ground on which the divorce was obtained. Many changes in the prayer book will be considered, but they cannot become effective, unless they are approved by both the 1916 and 1919 general conventions. Among the suggested changes are the shortening of the Ten Commandments, as read in the communion service; the elimination of the word "obey" and "endow with worldly goods," in the marriage ceremony; and the elimination of specific prayers for the Jews and Turks—the prayer book at present contains a prayer for Jews and Turks in connection with infidels, and it is urged that it is disrespectful toward the Jewish race to class them with infidels, and inaccurate to use the word "Turks," when Mohammedans clearly is meant.

#### Election of Bishop.

Other subjects that probably will come before the convention will be the designation of the presiding bishop by election, instead of by seniority, as at present, and the direct control of the board of missions by the general convention. If it is decided that after the death of Bishop Daniel Sylvester Tuttle of Missouri, now presiding bishop, the presiding bishop shall be designated by election, an attempt will be made to have the presiding bishop become, by virtue of his office, president of the board of missions, president of the board of social service and president of the board of education. It is urged that under such an arrangement the church would have a centralized administration for its aggressive work and that the budgets of the various church boards would be harmonized. Now the board of missions chooses its own president, and the board of education and the board of social service their executives, known as secretaries.

The first assembling of the general convention will be at the communion service at Christ church cathedral at 10:30 Thursday morning, but the formal opening of the convention will take place at Moolah temple. This opening will be preceded by a procession of the bishops who attend the conventions. The service, which will consist of the usual morning prayer ritual, with music furnished by a massed choir of the St. Louis churches, under the direction of Charles Galloway, will be under the general direction of Bishop Tuttle. He will preach the sermon at this service, and in it, it is understood, will review his fifty years in the episcopacy.

#### Women's Offerings.

On Thursday morning, October 12, will be held the "united offering service" of the woman's auxiliary of the board of missions. This will be conducted by Bishop Tuttle, and the sermon will be preached by Bishop Arthur S. Lloyd of New York, president of the board of missions. At this service will be turned over to the board of missions the offerings made by the women's guilds in the parish churches of the country during the last three years.

#### In Connection with the meeting of the general convention will be held the national meetings of the Daugh-

#### An Unfailing Way To Banish Hairs

(Beauty Notes)  
Usly hairy growths can be removed in the privacy of your own home if you get a small original package of delatone and mix into a paste enough of the powder and water to cover the hairy surface. This should be left on the skin about 2 minutes then removed and the skin washed and every trace of hair will have vanished. No harm or inconvenience can result from this treatment, but be sure you buy real delatone.—Advertisement.

ters of the King, a young women's society, and the national assembly of the Woman's guild, which has local branches in practically every parish in this country.

Two fraternal delegates from the Church of England will probably address the gathering. These representatives are Rt. Rev. Huyshe Wolcott Yeatman-Biggs, bishop of Worcester and a member of the British House of Lords, and Bishop Montgomery, who is secretary of the Society for the Propagation of the Gospel in Foreign Parts, the great missionary society of the Church of England.

Two prelates from the Anglican church in Canada also will attend the convention as fraternal delegates—the archbishop of Algoma and the bishop of Huron.

During the convention the house of bishops will choose two missionary bishops—one for South Dakota and one for western Nebraska.

On the night of October 18 a pageant illustrating the history of the church will be given by the parish churches of St. Louis. More than 2,000 persons will participate.

### PARIS AND LONDON ON SUBSEA WAR

(Continued from Page One.)

owing to the sinking of Scandinavian and other neutral ships. They assert that neutrals must feel bound to act, as the navigation of the whole world is affected. The Gaulois says: "Germany is convinced that by extending the field of assassination to American waters it will bring about a peace movement in the United States. It imagines that American merchants and the big trusts, seeing their overseas trade paralyzed, will demand that Washington intervene for peace, or force Great Britain to loosen the blockade. Berlin believes that with the elections approaching President Wilson will give way."

London, Oct. 10.—Under the heading "Germany Flouts the United States," the Daily Mail says the old issues between those countries have been raised in a fresh and graver form. After quoting the protest of the United States to Germany for the sinking of the Lusitania, in which it was stated that it was a breach of the laws to leave the crew of a ship on board a submarine ship "to the mercy of the sea in its small boats," the Daily Mail says this was precisely what was done in the case of the British steamer Stephano.

#### Looks to United States.

"If wholesale murder was not permitted almost within range of American guns," says the newspaper, "it was owing to the action of the United States destroyers which saved hundreds of lives. That the American seamen showed the greatest energy and efficiency in aiding passengers and crews will not surprise the people of this country who know the United States navy has a great service, with splendid traditions."

The Daily Mail predicts prompt action by the United States with regard to the operations of German undersea craft near American shores "because of American communications being cut and American exports being sent to the bottom of the sea." It adds that an attempt by the Germans to establish a submarine base in America "would clearly fall under the rules laid down by the United States government itself in the Alabama arbitration cases."

The Times legal correspondent, dealing with German submarine activity off the American coast, calls it "a long distance blockade of the British isles which is utterly inadmissible in international law."

#### Prepare This for a Bad Cough--It's Fine

Cheaply and E-as'ly M-ds, but Does the Work Quickly.

The finest cough syrup that money can buy, costing only about one-fifth as much as ready-made preparations—can easily be made up at home. The way it takes hold and conquers distressing coughs, throat and chest colds will really make you enthusiastic about it.

Any druggist can supply you with 2 1/2 ounces of Pinex (50 cents worth). Pour this into a pint bottle and fill the bottle with plain granulated sugar syrup. Shake thoroughly and it is ready for use. The total cost is about 54 cents and gives you a full pint—a family supply—of a most effective, pleasant tasting remedy. It keeps perfectly.

It's truly astonishing how quickly it acts, penetrating through every air passage of the throat and lungs—loosens and raises the phlegm, soothes and heals the inflamed or swollen throat membranes, and gradually but surely the annoying throat tickle and dreaded cough will disappear entirely. Nothing better for bronchitis, spasmodic cough, whooping cough or hoarseness.

Pinex is a special and highly concentrated compound of genuine castor-oil extract, combined with guaiac and is known the world over for its prompt healing effect on the throat membranes.

Avoid disappointment by asking your druggist for "2 1/2 ounces of Pinex" with full directions and don't accept anything else. A guarantee of "Pinex" is in the money promptly returned if not satisfactory. The Pinex Co., Ft. Wayne, Ind.

#### Dangers of Constipation and of Usual "Cures"

Stop up for an extended period one of the body's natural outlets and the consequences are serious indeed. Waste matter retained in the intestines, produces poisons which contaminate the entire system. Every organ in time becomes weakened and diseased. Auto-intoxication, dull headaches, mental depression, skin eruptions, inflammation and ulceration of the bowels, piles, appendicitis, cirrhosis of the liver, paralysis, nervous troubles—even insanity—re-are among the results of chronic constiveness. No sufferer can afford to delay correcting such a condition.

But no one can afford to use drastic purgatives or cathartics. Anything which acts violently upon the bowels does more harm than good. It injures the membrane lining, weakens the muscles, and at times absolutely incapacitates it. One dose may afford temporary relief, but soon you are constipated again, and must gradually increase the dose to secure the desired result. More people only know it, there is a harmless product known as "Lax-ola," which really aids Nature in overcoming constipation. Besides its mild, painless, active action it has a beneficial tonic effect. It strengthens, instead of weakening, the intestinal muscles, and is pleasant to take, does not disturb digestion, and must gradually increase the dose to secure the desired result. "Lax-ola" may be obtained from any druggist. A quarter's worth will do.—Home Hygiene.—Advertisement.

### UNCLE SAM WILL NOT ACCEPT THE VIEWS OF ALLIES

(Continued from Page One.)

ments from New York to European ports. There was talk of a revival of a railroad embargo on freight, but no new action was taken. A New York Central official said no attempts are being made to halt freight on the way to steamers, but the road could not bring to New York more freight than the steamers could take away.

American importers are, in part, prepared for an interruption of transatlantic trade which might result from submarine raids, it was learned today. In anticipation of shortage of European goods, they have placed in bonded warehouses on the Atlantic coast foreign merchandise valued at about \$100,000,000. They began to store this supply soon after the outbreak of the war. If the German raids continue the American merchants will draw on this accumulation of stock.

This supply includes, it is estimated, coal tar colors valued at \$500,000; 2,500,000 yards of wool dress goods worth \$500,000; 1,300,000 yards of wool cloths, worth more than \$1,000,000; and about 8,000,000 yards of linens worth \$2,500,000; furs worth \$500,000; several million square yards of foreign cotton goods, and a wide variety of other imported stock worth hundreds of thousands of dollars.

### French Troops Take Village of Bovent

Paris, Oct. 10.—In fighting south of the Somme river today the French troops captured the village of Bovent, to the north and west outskirts of Abbeville, and also the greater part of the Chaulnes wood. Prisoners to the number of 1,200 were taken, according to the official communication issued tonight.

### Noted Sculptor to Talk Before the Drama League

Gutzon Borglum, the noted sculptor, will give a talk on "Art" for Drama League members at the home

of the president, Miss Kate A. McHugh, Wednesday afternoon at 4 o'clock. Mr. Borglum is visiting his sister, Mrs. Alfred Darlow.

### Miss Grace Smith, Injured in Auto Accident, is Dead

Ashland, Neb., Oct. 10.—(Special.)—Miss Grace Smith, injured in an automobile accident about two miles south of Ashland Sunday evening, died yesterday in Yutan.

The car, which was driven by Karl Eikenbary of Ithaca, was on the return from Fremont and was making about thirty-five miles an hour, when it struck a bump that could not be discerned in the darkness and flew over the side of a culvert, throwing five of the occupants into the ditch.

Miss Grace had her tongue cut in two, her jaw bones broken and receiving internal injuries. Her chum, Miss Esther Endicott, suffered a broken collar bone, a broken arm and other injuries. The other occupants of the car, Miss Ora Salmon, Adelbert Stanley, jr., Ora Witaker and the driver, Karl Eikenbary, while badly shaken up, were not seriously injured. The car ploughed through the ditch, through a barbed wire fence into a cornfield, but was not damaged except for a broken windshield.

### SHAW UNCOVERS DEMS' PRETENSE

(Continued from Page One.)

ministration, we averaged to consume annually five and one-half bushels of wheat per capita. I take my data from government statistics. During no year of Mr. Cleveland's administration did we consume five bushels per capita, and the average for the four years was less than four and one-half bushels per capita.

#### Labor Needs Steady Work.

"There is another phase of the question which I want to elucidate. I refer to the extent to which our domestic commerce is dependent upon steady employment and good wages.

A man works today at some productive employment and adds to the wealth of the nation the value of his product, less the material consumed and received, let us say, \$2.50 for the day's work. This he spends for food and clothes. The merchant in turn pays it out to the producer again and clothes, and the producer again pays it out for wages, or he retains it as compensation for himself. Certainly this initial wage is used to buy food and clothes once every month, and the \$2.50 earned today thus adds \$30 to the year's domestic commerce. A million men, therefore, who last year earned an average of \$600 each, or an aggregate of \$600,000,000, if thrown out of employment will reduce our domestic commerce \$7,200,000,000."

#### Chief Concern Is Payroll.

Wahoo, Neb., Oct. 10.—(Special Telegram.)—Leslie M. Shaw of Iowa addressed a large and attentive audience at the court house for two hours and a half this afternoon. He opened his speech with an educational talk defining the differences between the two parties and clearly proved the advantage of positive republican principles as opposed to democratic negative policies. He then analyzed the present prosperity and produced many interesting statistics. He then launched into a strong tariff argument and showed that the republican party's chief concern now is the payroll after the war. He was vigorously applauded throughout.

### Devoe Points Out Discrimination in Underwood Tariff

Minden, Neb., Oct. 10.—(Special.)—Robert W. Devoe, republican candidate for attorney general, delivered an address here. He pointed out the discrimination between northern and southern agricultural products in the

### Tailor Talk

Recently we made a suit for a man who drives a great deal. The easy comfortable fit with our sacrificing style pleased him greatly.

Underwood tariff and said in part: "What sound economic principle is involved in the application of any tariff system whereby wheat is free listed and sugar protected; where corn is free listed and rice protected; where cattle is free listed and tobacco protected; where flax is free listed and cotton protected; where potatoes are free listed and peanuts protected; where wool is free listed and goat hair protected, and where meats are free listed and fruits protected? Is the application of this Underwood tariff a democratic blunder? Is it a mistake? Is it an accident? Is it an oversight? Or is it a deliberate and premeditated act on the part of the solid south, which comprises the democratic majority of this administration, to bring about a condition whereby they sell their southern products in a protective market and purchase our northern grown products in the markets of the world? Let the democrats answer this question."

### Think of the richest glass of milk

you ever drank—the most delicious, the creamiest milk you ever tasted. Then imagine a glass of milk twice as creamy, more than twice as rich in food value, and you have an idea of the goodness of Cottage Milk.

## Cottage MILK

Sterilized Unsweetened

is twice as rich in butter fat as ordinary bottle milk. It is twice as rich in food value. Why?

Simply because bottle milk is 87% water, while Cottage Milk has had most of its moisture removed by evaporation. Nothing is added to Cottage Milk. It is just pure, delicious, rich cow's milk, taken when fresh and most of the moisture removed, hermetically sealed in cans and sterilized.

You won't know satisfaction in evaporated milk until you have tried Cottage Milk. It has no superior for table use, or for cooking. Use it just as you would use bottle milk. It is both economical and convenient.

Your grocer has it.
