### The Heavens in November

By WILLIAM F. RIGGE.  
This is another quiet month in the heavens. The days shorten a whole hour during the month, being 10 hours 25 minutes long on the 1st, 9 hours 53 minutes on the 15th, and 9 hours 25 minutes on the 30th. On the 3d sun time, as shown, as shown by a sun dial, comes nearer to our standard time than on any other day in the year, as then the sun is only 7 1/2 minutes late in crossing the meridian after the blowing of the noon whistle. On the 24th it enters Sagittarius.
