

Avoid All Meat If Kidneys and Bladder Bother

Uric Acid in meat excites Kidneys and irritates the Bladder. Take Salts at first sign of Bladder weakness or Kidney-Backache.

Kidney and Bladder weakness result from uric acid, says a noted authority. The kidneys filter this acid from the blood and pass it on to the bladder, where it often remains to irritate and inflame, causing a burning, scalding sensation, or setting up an irritation at the neck of the bladder, obliging you to seek relief two or three times during the night. The sufferer is in constant dread, the water passes sometimes with a scalding sensation and is very profuse; again there is difficulty in voiding it.

Bladder weakness, most folks call it, because they can't control urination. While it is extremely annoying and sometimes very painful, this is really one of the most simple ailments to overcome. Get about four ounces of Jad Salts from your pharmacist and take a tablespoonful in a glass of water before breakfast, continue this for two or three days. This will neutralize the acids in the urine so it no longer is a source of irritation to the bladder and urinary organs which then act normally again.

Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia, and is used by thousands of folks who are subject to urinary disorders caused by uric acid irritation. Jad Salts is splendid for kidneys and causes no bad effects whatever.

Here you have a pleasant, effervescent lithia-water drink which quickly relieves bladder troubles.—Adv.

IS DANDRUFF KILLING YOUR HAIR?

Mr. Hotaling Was Troubled 19 Years and Was Healed by Cuticura.

"I was troubled with dandruff for the last nineteen years. My scalp was so bad that it used to bleed and itch and burn most all the time. My hair fell out so I had to have it clipped all over and the top of my head was all scales. It annoyed me nights so I lost sleep, and my coat collar used to be covered so with dandruff that I used to be ashamed."

"I tried everything that I heard of but nothing seemed to do me any good until I tried a sample of Cuticura Soap and Ointment, and from the first I found relief. I used three large sized cakes of Cuticura Soap and three boxes of Cuticura Ointment before I was healed." (Signed) Earl J. Hotaling, Elba, Mich., Jan. 22, 1916.

Cuticura Soap, to cleanse, purify and beautify, Cuticura Ointment to soften, soothe and heal, have been most successful in the severest forms of skin and scalp troubles, but greater still in preserving clear skins, and preventing little skin troubles becoming serious.

For Trial Free by Return Mail address post-card: "Cuticura, Dept. B, Boston." Sold throughout the world.

SOLDIERS GOT RELIEF FROM SORENESS

Boys on the Border Relieved Their Pains and Aches With Sloan's Liniment.

Once upon a time Norman Jones, serving in the National Guard at El Paso, returned to camp after a strenuous 18-mile hike, foot-sore and leg-weary. He had not been long in active service and his shoulders, back and limbs felt the after-effects of marching. Remembering Sloan's Liniment, Jones applied it to the sore spots and went to bed. He writes: "I arose the next morning feeling fine; in fact, I had entirely forgotten about the hike and went out for a four-hour drill in the sun as spry as ever."

Private Jones passed the experience along, and many a boy on the border relieved the agony of sprains, strains, bruises, insect bites, cramped muscles, rheumatic twinges, etc., by the use of Sloan's Liniment. Readily applied without rubbing. At all drugists, 25c, 50c and \$1.00.

Sloan's Liniment

ADVISES AMERICA TO COURT ITALY

Business Sleuth for Big Corporation Talks of Relative Money Values.

GIVE ITALY MORE CREDIT

(Correspondence of The Associated Press.) Rome, Italy, Nov. 1.—James Francis Case, a civil engineer representing the American International Corporation in Italy and Spain, has just completed his first inspection of business possibilities in Italy. One general conclusion he has drawn is that American firms should do all possible to lower the present high rates of exchange with the conclusion of the war.

Said Mr. Case to a correspondent of the Associated Press: "It has been widely stated that American business in Europe will suffer after the war from the high value of the dollar as compared to other money, forcing these nations to buy from each other or go without what they need. For instance, let us consider a pair of American shoes worth \$4 of our money. Before the war \$4 were worth just over 20 lire, whereas now these \$4 are worth 26 lire. For all that the lire has still the same buying power in Italy, or in Russia, and even more in Austria or Germany, where the mark has depreciated. Naturally, if an Italian can buy a pair of shoes in another country, where his lire has a better value than in the United States, he is going to do so.

We Lack Faith. "The solution of this exchange problem is inducing these countries to send us their goods to increase their trading with us. The reason the exchange is now high is not so much that Europe's credit is bad with us, that we have no faith in her future prosperity; it is because we are not receiving as much goods from her as before the war.

"I have no fear, however, that American business will be seriously handicapped in Europe by our higher exchange. Take Russia. Her ruble has lost a third of its value merely because she cannot get her wheat and other products to market. So soon as the war is over, these goods will go to market and her ruble will go to its old place."

Regarding Italy's business future, Mr. Case said: "Italy does not enjoy the credit she should. She is a wealthy country and my principal reason for making this statement is that any country is bound to be wealthy which has an honest, thrifty, hard working population such as she is blessed with. We Americans do not appreciate the fact that she is in reality a young country; that she has not been united for more than thirty years, though the date of her union runs back to 1870.

"At present I do not find much inclination to consider new business in Italy, because every mind is still preoccupied by the war. But so soon as it is out of the way Italy will become a fine field for Americans, not only for detail business but for big public improvements, like the electrification of railroads to eliminate expensive coal bills, and the establishment of more electric power plants for factories.

The American should find a ready market here and be well received, because, as a rule, the Italians know more about our country and its products than we do about Italy."

German-Bulgarian Club Will Print Newspaper

(Correspondence of The Associated Press.) Berlin, Nov. 1.—For the improvement of relations of all kinds between Germany and Bulgaria, the German-Bulgarian society of Berlin has decided to create and support for the time being a daily newspaper in Sofia. This was decided upon at a recent meeting of the society in a large hotel here, at which Duke Ernst Guenther of Schleswig-Holstein, the president, presided. The prospective newspaper will make a specialty of extended and reliable trade and business sections and reports, for the special benefit of German commercial circles. The paper will also issue a year book for the society, gotten up by prominent statesmen, authors and educationalists in the German and Bulgarian languages.

There will also be a legal section in which there will appear a translation of the Bulgarian legal code. In January of next year the society plans to bring to Germany a number of Bulgarian artists and musicians, who will hold exhibitions and exhibitions here.

The membership of the society has been steadily on the increase ever since Bulgaria entered the war and the organization has been supported and financed by very considerable donations from both German and Bulgarian sources. The money subscribed is sufficient to carry out all of the ambitious plans of the society for next year.

Germans Will Recoin All Gold and Issue New Type

Cologne, Germany, Oct. 30.—A prediction that the government soon will re-coin all of its gold and issue for after-the-war use new type of 10, 20 and 50-mark gold pieces, is contained in an appeal from the mayor of Cambrung-on-the-Saale to the citizens of that city, that in whatever gold pieces they may still be keeping back.

The mayor declares that the old-style gold pieces will soon be placed out of circulation. He even describes the prospective new coins as "allegorical and commemorative of the iron time, extremely artistic and absolutely different from the former style." The re-coinage is to be completed, he says, by the start of 1917.

Baron Kuerthy Is Food Dictator in Hungary

Budapest, Hungary, Nov. 1.—The appointment is announced of Baron Kuerthy to the newly created position of food dictator for Hungary. The new official, whose post is regarded as of almost equal importance to that of a cabinet minister, is practically unknown in the capital. He has held for some time past the position of governor of a northern province, where his work won the admiration of Count Tisza.

Board Votes to Give Visiting Nurses Little Boost in Salary

Five-Dollar Increase in Pay is Granted, Except for the Three Months' Probationary Period.

MANY CASES CARED FOR

A salary increase for Visiting Nurses was voted at the board meeting held in the city hall rooms yesterday. While wages for the first three months' probationary period remain the same—\$60—the balance for the remainder of the year was raised from \$65 to \$70. The second-year's pay was raised from \$70 to \$75.

Thanksgiving baskets will be furnished sixty-five Visiting Nurse cases.

An industrial nurse, whose salary will be paid by the American Smelting and Refining company, among whose employes she shall work, was added to the nurses' staff, raising the number to ten. Mrs. Wheeler was placed in charge of this work. Mrs. Neleen replaces Mrs. Wheeler on the staff.

October's reports, compiled by the superintendent, Miss Bess Randall, show 1,335 calls made on 346 patients during the month. Twenty-seven maternity cases were cared for.

Miss Arthur, one of the nurses, was accepted on her day's round by a little girl who asked her to bring a baby sister to her house.

"I'll have to speak to your mother about it," the nurse told her.

"All right, come on," insisted the little maiden and drew the nurse into the home.

Miss Arthur found the home a very poor one with the stork really expected. This case was cared for by the Visiting Nurse association.

MARINE BUSINESS OF FRANCE FALLING OFF

Loan to Help Build Up the Shipping Industry of Country is Proposed.

SOME FIGURES SUBMITTED

(Correspondence of The Associated Press.) Paris, Nov. 2.—"Lack of outgoing freight was what ailed the French merchant marine before the war," says Maurice Ajam, deputy for the department of the Sarthe and former under-secretary for the merchant marine. "Outgoing freight, heavy for that ailment; the remedy will be furnished by the issue of the war."

"Five million tons of steel and iron from the valley of the Moselle," Ajam said to the Associated Press, "will be added to our exportations, since the least that France will get out of the war will be her old provinces of Alsace and Lorraine, with the iron deposits that Germany took from us in 1871."

"The Frenchman is a stay-at-home," says M. Ajam, "and we can't give to our lines the revenue German ships derive from the emigrant trade. We can and will give them products and manufactures in place of live freight. At least, we can give them a larger proportion of our own current carrying trade that went to foreign ships before the war."

The significance of M. Ajam's reference appears from figures showing that France paid 1,085,000,000 francs to foreign ships and 345,000,000 to French lines in 1915. The balance of 740,000,000 francs has had more weight in the argument for a greater merchant marine than years of propaganda. Both the government and parliament propose immediate action, but they are not yet agreed as to what action.

Marine Business Falls

Statistics collected by the *Moniteur de la Flotte*, the French maritime journal, show that the part of the French marine in the exterior commerce of France had fallen to 30 per cent in 1895 and to 24 per cent in 1913. In the meantime the general freight traffic of the country had gone from 15,000,000 tons in 1880 to 45,000,000 in 1913.

French lines carried more and more freight, but considered in comparison to the development of French foreign trade, its proportionate share became less and less. The unusual circumstances developing from the war changed the situation and increased the part of French bottoms to 31 per cent in 1915, but the *Moniteur de la Flotte* estimates that, as a result of remarkable increases in imports during this year, the share of French ships will have dropped again to about 25 per cent; in other words, foreign ships are bringing to France three-quarters of all the products and manufactures that it imports. France will have expended for the year 1916, at the present rate, 3,000,000,000 francs for ocean transportation, of which 2,500,000,000 will go to foreign bottoms, reducing the share of French lines to 20 per cent.

M. Ajam proposes, in a bill just introduced in the Chamber of Deputies, the construction of merchant ships to the aggregate of 500,000 tons burden. He demands that in view of the magnitude of the task of restoring and developing the merchant fleet, the first initiative be confided to the government and that the ships be put on the stocks at once, to be sold subsequently to steamship lines on the most favorable terms possible.

The merchant marine committee of

For Piles

Pyramid Pile Treatment is Used At Home and Has Saved a Vast Number from the Horror of Operation.

Don't permit a dangerous operation for piles until you have seen what Pyramid Pile Treatment can do for you in the privacy of your own home.

Remember Pyramid—Forget Piles. No case can be called hopeless unless Pyramid Pile Treatment has been tried and has failed. Letters by the score from people who believed their cases hopeless are in our files. They fairly breathe the joy of the writers. Buy Pyramid Pile Treatment yourself. Either get a box-price \$6.00 or your druggist or mail the coupon below right away for a perfectly free trial.

PRINCESS WIELDS AXE FOR EXERCISE

Progressive Member of Grecian Royalty Spends Summer Chopping Down Trees.

IT TEACHES INDEPENDENCE

(Correspondence of The Associated Press.) Villa Mon Repos, Corfu, Greece, Nov. 4.—The Princess Andrew of Greece, who was the English Princess Alice of Battenberg, has spent the last summer chopping down trees to keep herself fit. The Princess Alice is 30, a cousin of the queen of Spain. Shortly she will take her children back to Athens for the winter season and give up felling trees to begin again her work of encouraging the Greek women to earn their own living by home sewing—the Princess Alice's own particular hobby.

The two eldest little girls, Princess Marguerite and Princess Theodora, 11 and 10, respectively, are as brown as their mother and as strong, though they have not been chopping down trees. They have been swimming every day for an hour and a half in the warm, translucent water of the Corfu channel. Prince Andrew's wife herself is a fine, strong swimmer now, but it has not been a long time since Shelton Whitehouse, who was then secretary of the American legation, pulled her out of the water and saved her life when she had gone down three times.

Family's Plight

The villa of Mon Repos, the summer palace of Prince Andrew and the Princess Alice, was the favorite country residence of the late King George, who left it to his third son, but unfortunately he failed to leave the means to keep it up. Prince Andrew is a colonel of a cavalry regiment—not a lucrative employment. Princess Alice, also, is not rich, and the pair, who for royalties are poor as church mice, have four children, all girls, a sad prospect these days when Europe is full of royal girls and short of royal boys to marry them.

Mon Repos is a big and very beautiful palace. Seldom occupied, the property had been let run to seed. The villa itself is in bad repair and has no modern comforts. The casino, built by the British lord high commissioner, Sir Thomas Waitland, in 1816, is almost gone to rack and ruin. But at that it is far more beautifully situated, the house and garden far lovelier than the Achilleon, the villa of the German emperor, now used as a French hospital. The Achilleon is on a height, overlooking the whole Corfu channel and the distant shores of the Epirus; but Mon Repos is at the water's edge, and the back of the place gives on the still and beautiful lagoon of the Kalipopoulos lake.

Princess is Happy

The Princess Alice is very pleased and proud over the improvements she has made on Mon Repos this summer, while her husband has been in England on a diplomatic mission for her royal brother, King Constantine.

Wild Duck Mistakes the Aeroplane for Bad Bird

Kiel, Germany, Nov. 1.—Ornithologists have discovered that the wild duck does not like the aeroplane, apparently taking it for some huge bird of prey. From the North Sea coast of Schleswig-Holstein it is reported that the great flocks of ducks, which in previous years stopped for rest and food on the coastal sands and islands on their flight from the far north to the south, have avoided that region this year. The explanation offered is that they were frightened away by the many aeroplanes that are constantly scouting along the coast.

German Warriors Being Sent Home

German Warriors Being Sent Home

(Correspondence of The Associated Press.) Berlin, Nov. 1.—This autumn is to be another furlough period for a good majority of the soldiers now in the field, for the ministry of war has issued an announcement whereby each troop commander has been instructed to send men home as fast as he possibly can spare them.

The first men to go, many of whom are now on leave, are those who in normal peace times are farmers or are employed on farms. They are needed of course for the second harvest. When they get back to the front men in all sorts of other walks of life will be sent back home, those who are married being given the preference.

The minister of war especially asks commanders to give furloughs wherever possible to men who have been in the field continuously for a year, regardless of their married or single state. The plan, it is believed, will make it possible for almost every soldier to face the coming winter campaign more or less fresh from a rest at home.

Persistence Is the Cardinal Virtue in Advertising.

Have Dark Hair and Look Young

Don't stay gray! Nobody can tell when you darken gray, faded hair with Sage Tea and Sulphur.

Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Tea and Sulphur. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, improved by the addition of other ingredients, all ready to use, for about 50 cents. This simple mixture can be depended upon to restore natural color and beauty to the hair.

A well-known downtown druggist says everybody uses Wyeth's Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and beautiful. This preparation is a delightful toilet requisite. It is not intended for the cure, mitigation or prevention of disease.—Adv.
