

BEAUTY DOCTOR TELLS SECRET

Detroit Beauty Doctor Gives Simple Recipe to Darken Gray Hair and Promote Its Growth.

Miss Alice Whitney, a well-known beauty doctor of Detroit, Mich., recently gave out the following statement: "Anyone can prepare a simple mixture at home, at very little cost, that will darken gray hair, promote its growth and make it soft and glossy. To a half pint of water add 1 oz. of bay rum, a small box of Barbo Compound and 1/4 oz. of glycerine. These ingredients can be bought at any drug store at very little cost. Apply to the hair twice a week until the desired shade is obtained. This will make a gray-haired person look twenty years younger. It is also fine to promote the growth of the hair, and relieve itching and dandruff."—Adv.

I AM FREE—YOU CAN BE FREE
My catarrh was filthy and loathsome. It made me ill. It dulled my mind. It undermined my health and was weakening my will. The hawking, coughing, spitting made me obnoxious to all, and my feet breath and disgusting habits made even my loved ones avoid me secretly. My delight in life was dulled and my faculties impaired. I knew that in time it would bring me to an untimely grave, because every moment of the day and night it was slowly yet surely sapping my vitality. But I found a cure, and I am ready to send you an ever night treatment FREE. Write me promptly.

RISK JUST ONE CENT
Send no money. Just your name and address on a postal card. Say: "Dear Sam Katz: Send me your one night treatment for catarrh. That's all you need to say. I will understand, and I will send this one night's treatment to you FREE at once. Do not delay. Send the postal card or write me a letter today. Don't think of turning this page until you have asked for this wonderful treatment. It may be the means of saving for you what it has done for me."

Skin trouble costs many a man his job

No matter how efficient a man may be, if he has an ugly skin-eruption, there are positions in which he cannot be tolerated. He may know that it is not in the least contagious, but other people are afraid, they avoid him, and he must make way for a man with a clear, healthy skin. Why run this risk, when

Resinol

ITALY EAST'S GATE

Wartime Conditions Far Less Filled With Hardship Than Supposed.

WELCOME TO AMERICANS

(Correspondence of The Associated Press.)
Milan, Italy, Nov. 20.—The explanation of the increasing number of American firms settling in Italy, is the realization that Italy is the future gateway to the Orient and to the near east, according to Charles F. Hauss, president of the American Chamber of Commerce for Italy.
"Because of its geographical position, joining the north of Europe to the Orient," said Mr. Hauss to a correspondent of The Associated Press, "Italy offers better business opportunities for Americans, in my estimation, than South America or the far east. It has a fine commercial strategic position and its government and people are actively aware of the fact, and intend to push this advantage of location."
Dividends Are Paid.
"Wartime Italy is far more prosperous than is generally known. The recent declaration of dividends showed earnings higher even than in peace times. It is also not generally known that Italy bought more products in the United States during the past year than in any four other great countries. It bought over \$200,000,000 worth from us, as compared to \$80,000,000 in England, \$50,000,000 in Argentina, \$30,000,000 in France, and \$15,000,000 in Switzerland. It is selling to us something over \$50,000,000 worth a year, which is about its normal yearly sales before the war."
"There is going to be much more business between Italy and the United States, as this big fact of its geographical situation is better appreciated, and when both Italy and the United States increase their number of merchant ships, at present sadly inadequate to handle the cargoes either way. Italy has provided and will continue to provide abundant return cargoes, such as its renowned silks, laces, furniture, alimentary foods, wines, cheese, its beautiful marbles, hematite iron, lead and zinc ores, as well as certain other manufactures in which it excels. Before the war, Italy was laying the ground for a fine national merchant marine and right now during the war, it is continuing that policy."
"I have lived in Italy nearly eight of the seventeen years I have been in Europe, and I can say that Italy has the most liberal government I have ever lived under. Its laws, though severe, are just, and when you get to know Italians and their customs, you will realize what great strides they have made in science, industry and commerce during the last forty years of a United Italy. Milan, with its more than 600,000 inhabitants, the heart of industrial Italy, has a record growth unique in modern European history. Its population has increased fifty per cent in the last ten years, due to the wealth and bustle of its business men."
"All of the American firms now in Italy to my knowledge and belief are prospering, some even more than previous to the war."
"It is no more difficult to organize a separate company here than elsewhere, though it would be well before settling for an American company to first carefully try out the field by actual trial of its goods on the Italian market. Obviously, for some kinds of goods, a separate company is not advisable, as in the case of goods light in weight, of small volume; and of a certain value, such goods may be sea-shipped and easily entered, if the tariff is not high."
"Italian tariffs are not oppressive, and they are always specific, never ad valorem. This, of course, means that the higher the value of the merchandise the easier it is to export to Italy."
"Italy welcomes American initiative, capital and merchandise of all kinds, especially semi-finished products and raw materials."
"The war has opened its eyes to the latent capabilities it possessed financially as well as industrially, and it is going to keep on going ahead."

Germany's Vintage Fine In Quality and Quantity

(Correspondence of The Associated Press.)
Trevres, Germany, Nov. 1.—The wine auctions of the 1915 vintage in the famous Moselle district are soon to begin, with big profits expected.
Last year's wine was not only of remarkably high quality, but also the yield was almost phenomenal. Wine experts have exhausted their vocabulary in trying to find terms to describe it. Following the example of previous years they have adopted a nickname for last year's vintage, and the term selected not only expresses their judgment of wine but also a prediction that Germany will come out of the war victorious; they call the 1915 vintage the "Victorious."
The wine yield of 1915 was so large that the auctions will have to be arranged in series through November and December, while a part will be carried over to the spring auctions. The grape harvest last year was so abundant that many growers did not have casks and other vessels sufficient to accommodate the vintage and many grapes had to be sold. And as for quality, the experts assert that no such wine has been made on the Moselle since the year 1893.

"Mum" Show at Capital Breaks Previous Records

Washington, Nov. 10.—All records were broken at the sixteenth annual chrysanthemum show of the Department of Agriculture, which recently closed with a week's exhibition, and as a result this annual event hereafter will be conducted on a much larger scale. During the exhibition this year nearly 25,000 people visited the government's greenhouses on the all and enjoyed the beauties of the rare collection of prize blooms. At the close of the show the government officials distributed many of the blooms to persons ill at their homes and in the various hospitals of the city. On Sunday, the last day of the show, more than 7,230 inspected the flowers and at times during the day there was a waiting line where some persons remained an hour before gaining admission.

Jap Actress Is Not Coming to United States This Year

(Correspondence of The Associated Press.)
Tokio, Nov. 2.—According to the Japanese press the foreign office has declined to give permission for Sada-yakko Kawakami, Japanese actress, to visit the United States with a troupe of twenty actresses and present the "Oiran Dochu," or procession of the Yoshiwara girls, which has been an ancient custom in Tokio.
It is understood that the decision is the result of the objections raised by the Purity society, of which the president is Saburo Shimada, the chairman of the house of representatives. The Tokio branch of the Salvation Army also opposed the plans of the actors and it was finally decided, according to the Japanese newspapers, that the reproduction of the procession in question would be detrimental to the honor and dignity of the Japanese people. The passports, therefore, were refused.
Sadayakko has been to the United States twice. On her first visit she was accompanied by her husband, Otojiro Kawakami, the man who established the first modern school of acting in Japan. She is also well known to the playgoers of Europe, having toured that continent several years ago. The procession in question was not held in Tokio last year, having been suppressed by the authorities.

Some of the French Airmen Who Receive Mention in Dispatches

(Correspondence of The Associated Press.)
Paris, Nov. 2.—French airmen are not mentioned by name in the official dispatches until after they have brought down their fifth enemy machine. Up till then they remain anonymous. Three Pounds of Sugar Per Month

(Correspondence of The Associated Press.)
Petrograd, Nov. 2.—The population of Petrograd will henceforth obtain sugar by card or ticket. The allowance per person is fixed at three pounds a month.
Sugar has been very scarce for nearly a year past, owing to dislocation of industrial activity and the vast quantities issued to the army. The newspapers assert that much of the difficulty has been due to profiteering maneuvers by speculators, but this allegation is discounted somewhat by the fact that the price of sugar has not risen much.

Denmark Has Designs on Eastern Part of Greenland

(Correspondence of The Associated Press.)
Copenhagen, Nov. 2.—The Danish Greenland society, which includes prominent Danish Arctic explorers, intends to launch a plan for the colonization of uninhabited East Greenland. West Greenland will soon be over-populated, Danish North Greenland already is well-peopled, while in East Greenland the conditions are considered good for supporting a larger population of Eskimos.
Denmark previously has only had nominal possession of the country and other nations will hardly recognize her supremacy until a Danish station has been established, the Danish flag raised, and Danish inhabitants settled.

Holland Merchants Figure On Colony in Dutch Guiana

(Correspondence of The Associated Press.)
The Hague, Netherlands, Nov. 2.—It is announced that a number of Holland's colonial merchant princes have formed a syndicate to inquire into the question of what fresh plantation enterprises can be founded in Dutch Guiana, with a view to helping raise it from its present weak condition, and applying to this struggling South American colony the expert knowledge, energy and capital which have attained such good results in the Dutch East Indies.

War Brings Out Substitute For Milk of the Cow

(Correspondence of The Associated Press.)
London, Nov. 2.—To avoid hardship arising out of the higher price of the milk, the Housewives' War league has put on the market a so-called milk improver. It is a white powder, with the correct combination of bone and flesh-forming constituents. A penny's worth, mixed with a pint of water, is added to a pint of cow's milk, and the housewife has a quart of "just-as-good."

Cholera in Japan Continues to Spread Over the Country

(Correspondence of The Associated Press.)
Tokio, Nov. 2.—Although cool weather has brought a decrease of cholera at Tokio, the malady continues to spread at Osaka. Up to October 10 the cases at Tokio had reached 548; at Osaka, 2,001, with an increase of twenty daily.
At Tokio there have been 151 deaths. The authorities believe that by the end of the month the epidemic will be entirely wiped out here. No foreigner has been attacked by the disease, so far as is known.
The spread of cholera to Korea has had a serious economic effect there, as the authorities have prohibited fishing in a zone extending along 200 miles of coast. Cholera is believed by many physicians to be easily circulated from fish tissue and the fishermen of Korea are said to have failed to comply with sanitary measures ordered by the health department.

More Than One Hundred And Three Millions of Us

Washington, Nov. 1.—The population of continental United States has passed the 103,000,000 mark. Officials of the treasury department, in their monthly money circulation statement, estimate that on November 1 the population of the country was 103,002,000.

United States Is Richer By Half Billion in Gold

Washington, Nov. 14.—Gold in the treasury of the United States amounted to \$2,700,136,976 on November 1, an increase of \$502,023,214, since that date last year.

New Map of the United States Is Now in Making

Washington, Nov. 10.—Rapid progress is being made by the United States in preparing its portion of the huge world map which was agreed upon in 1909 by nearly all the principal countries. By international agreement the authorities began preparing maps of the entire surface of the earth, to be published on a scale one-millionth of actual size, or about one inch to every sixteen miles. All the maps are to be uniform in shape and general appearance and are to have the same conventional signs.
To meet the popular demand in this country for state maps the United States geological survey, which has charge of the making of the American section of the world map, is preparing and publishing maps of each state on a larger scale than the world map sections. These

state maps are twice the size, or about one inch to every eight miles. A map of the entire United States on that scale would cover a sheet measuring twenty feet by thirty-one feet. The survey already has issued such maps for thirty-three states, the latest being that of Florida, which is one of the largest of the series. In compiling the maps every available source of information has been ransacked for material, and many data never before available to the public in any form have been procured, so that the maps exceed in accuracy any heretofore published. The new Florida map measures 44 and one-half inches by sixty-one inches. Copies of the state maps are sold to the public by the government at nominal price.

And Father Pays Bills.
"How is Robert getting on at college?" asked the minister, who was being entertained at dinner.
"Splendidly," said the proud father, who then went on to tell of his son's various social, athletic and scholastic successes and the minister said it was a fine thing to be college bred. That evening little James, who had been an interested listener, said: "Papa, what did Mr. Brown mean by college bred?" "Oh, that," said papa, who had been looking over his son's bills, "is a four-year loaf."—Washington Star.

Speedy and Easy Riding

There's little comfort in most low priced cars. You can't use their speeds. They jostle you—they ride roughly—they don't hold the road.

The \$635 Overland is different. It is not only the speediest of low priced cars—

But you can use the full speed of its powerful motor when you need it.

It has long 42-inch, easy riding, shock absorbing cantilever rear springs. In addition the 75 B Overland is a longer car—104-inch wheelbase. And it has 4-inch tires.

Its smoothness and ease of riding at any speed would do justice to a much larger and heavier car.

Come in and let us demonstrate. That's the best kind of proof.
