Admission 25 cents, each lecture. Would Preach What Congregation Likes Despite His Unbelief Sheboygan, Wis., Nov. 21.—The question whether a congregation wants a minister to preach what he does not believe, is to be taken up this week by the First Baptist church of Sheboygan, following the resignation and later re-consideration of Rev. Clarence Booth, pastor of the church. Rev. Mr. Booth resigned Saturday. Sunday he returned to the church, withdrew his resignation and asked permission to preach. At an interview today, Mr. Booth stated he had withdrawn the remarks he had made in his sermons on November 5 and 12, when he is alleged to have held, contrary to Baptist teachings, that Jesus was not an equality with God, the Father, which caused the trouble, had made certain concessions and was going to remain in Sheboygan indefinitely. Members of the congregation, however, declared today that the minister had declared his belief in the new doctrine, and was willing to preach the old, and the matter would be taken up officially at the meeting of the congregation on Thursday as to whether the congregation wants a minister to preach that which he does not believe. Will Make Public Earnings of All Roads in 15 Years Louisville, Ky., Nov. 21.—Commissioner C. C. McChord, of the Interstate Commerce commission, said late today that it was his purpose to put in the record of the commission a table of the net and gross earnings of all the railroads of the United States during the last fifteen years. His announcement followed a statement by O. D. Clark, general superintendent of the Grand Trunk lines within the United States, advocating an increase in freight rates, the proceeds to be used by the railroads in the purchase of equipment and making other betterments. At this point Commissioner McChord said: "It has been suggested here by several other witnesses that the remedy for this trouble is to increase freight rates. I am going to have prepared from the annual reports of the carriers a statement showing the net and gross receipts of all carriers and also showing dividends paid and additions to surplus funds and put it into this record, so that it may show just what has been happening during the last fifteen years."

West Leavenworth Club Opposes Light Contract

West Leavenworth Improvers last night at a meeting in Woodmen hall adopted a resolution declaring against the proposed lighting contract for the city and instructing their delegates to the united clubs to vote against the proposition. R. J. Sutton declared the contract was not needed and was unfair and intended to head off municipal ownership. The club members were wrathful in the extreme at the city authorities for collecting for grading the alley between Fifty-second and Fifty-third streets two years ago and not doing the work. Sixty-five members attended the meeting.

Knocks Obstinate Coughs in a Hurry

A Simple Home-Made Remedy that Gets at the Cause. Thousands of people normally healthy in every other respect, are annoyed with a persistent hanging-on bronchial cough year after year, disturbing their sleep and making life disagreeable. It's no needling—there's an old home-made remedy that will end such a cough easily and quickly. Get from any druggist "2 1/2 ounces of Pinex" (50 cents worth), pour it into a pint bottle and fill the bottle with plain granulated sugar syrup. Begin taking it at once. Gradually but surely you will notice the phlegm thin out and then disappear altogether, thus ending a cough that you never thought would end. It also promptly loosens a dry or tight cough, stops the troublesome throat tickle, soothes the irritated membranes that line the throat and bronchial tubes, and relief comes almost immediately. A day's use will usually break up an ordinary throat or chest cold, and for bronchitis, croup, whooping cough and bronchial asthma there is nothing better. It tastes pleasant and keeps perfectly. Pinex is a most valuable concentrated compound of genuine Norway pine extract, combined with gualacool and is used by millions of people every year for throat and chest colds with splendid results. To avoid disappointment, ask your druggist for "2 1/2 ounces of Pinex" with full directions and don't accept anything else. A guarantee of absolute satisfaction or money promptly refunded goes with this preparation. The Pinex Co., Ft. Wayne, Ind.

Kaiser's Second Son Will Be Made King of Lithuania

Paris, Nov. 21.—Germany is about to follow up its declaration of Polish independence with a similar announcement regarding Lithuania, according to dispatches from Switzerland to the morning newspapers. The dispatches say that the new state will probably receive Prince Eitel Friedrich, second son of the emperor, as its sovereign and will form a state of the German empire with a similar status to that of Bavaria or Saxony. As in the case of Poland, the dispatches add, a Lithuanian army will be formed to fight under Field Marshal von Hindenburg. It is estimated that Lithuania could raise 150,000 men.

Wilson Completes Message to Congress

Washington, Nov. 21.—President Wilson practically completed his next annual message to congress today and plans to put the finishing touches on it tomorrow. It will be devoted almost entirely to domestic matters and will deal primarily with legislative questions referred to congress previously and not finally settled.

Kansas Gas Properties Bought by Eastern Firm

Topeka, Kan., Nov. 21.—Certificates authorizing the purchase of the Kansas Natural Gas company by the Doherty interests of New York and allowing the Empire Gas and Pipe Line company the Doherty operating concern in Kansas to do business as a public utility were issued this afternoon by the state public utilities commission. It is expected that the purchase will be closed by Saturday, members of the commission stated.

RIVERS OF STATE AWAIT HARNESS

Prof. G. E. Condra Tells Technical Club of Many Possibilities in Nebraska.

MILLIONS OF WATER POWER

"There is a possibility of discovering oil in Nebraska, but the most promising source of energy is found in the waters of the rivers. I am for conserving the wasted waters of this state. When one thinks that our rivers are capable of generating about 2,000,000 horsepower in energy and that this power is being wasted, it is no wonder that half a hundred hydro-electric projects have been promoted." Prof. G. E. Condra, president of the National Conservation congress, and head of the geography and conservation department at the University of Nebraska, was addressing the members of the Technical club last evening at the Paxton on "The Development of Water Power Resources in Nebraska," when he summed up the state's potent possibilities in the foregoing language. State Commerce Raw. "Nebraska is commerce raw," he added. "Although we raise corn, wheat, alfalfa and some cattle, we do not manufacture the raw material into finished products." With 3,000 feet of film he carried the audience around the state, showing its rivers and power projects, here and there.

State Commerce Raw

The three rivers with greatest resources are the Blue, Niobrara and the Loup, said Prof. Condra. As he navigated the Blue and passed by Milford, Beatrice and Fairbury he showed that this stream had been developed more than the others. The respective towns are using the river for generating electricity and running mills. The cheapest electricity is being generated at Juniata Falls. "The Niobrara is the best water power stream not regarding its nearness to population," continued the speaker. Niobrara Lies Waiting. "It has a constant flow and has a capacity of from 800 to 2,000 second feet. This river has not been utilized yet, but it could furnish power to operate interurbans and electrify its surrounding country. Owing to the fact that it flows through sparsely settled country it is doubtful whether much money would be invested in its development at the present time. "The largest hydro-electric plant in the state has been constructed at Boeina, where the water of the Middle Loup is conducted through a canal to the South Loup thereby developing 2,500 horsepower. "There is abundant work for the engineer," the speaker told club members of his audience.

Remembers in Will Those Befriending Him in Years Agone

Denver, Colo., Nov. 21.—Fifteen thousand dollars for the erection of a memorial in a Denver park and \$5,000 to be expended upon a highway near Prato, Switzerland, his boyhood home, are among the bequests made in the will of John Monti, pioneer Colorado miner, it became known here today, following filing of the document in probate court. Five thousand dollars was left to Anthony and Louise Pozzi, of Prato, who early in Monti's life "cared for me during my sickness and treated me as if I were their own son." The estate is valued at \$150,000. Monti came to Colorado fifty years ago and laid the foundation for his fortune in the early days of Colorado gold mining.

Spend Over Hundred Million Year on Navy

Washington, Nov. 21.—While Secretary Daniels was awarding contracts today for armor plate for the four battleships authorized at the last session of congress, and approving plans for an ammunition ship, the last vessel designed for the 1917 building program, the appropriations subcommittee of the house naval committee began work on the 1918 estimates, the heaviest in American history, to be presented to congress this winter. The Navy department's 1918 figures contemplate construction of half of the ships yet to be built in the great three-year program and show total appropriations of \$379,151,701, or more than \$66,000,000 in excess of the record total appropriated last summer.

North Hill Kin Slain. London, Nov. 21.—Lord Rothney's second son, Lieutenant Vere John Harnsworth, has been killed in action. Lieutenant Harnsworth was a nephew of Lord Northcliffe, owner of the Times Daily Mail and other papers.

NEBRASKA WINS IRRIGATION FIGHT

Federal Court at Denver Rules State Lines Do Not Affect Priority Rights.

COLORADO TO APPEAL CASE

Denver, Colo., Nov. 21.—(Special Telegram.)—A decision affecting Colorado and Nebraska water rights, far reaching in its effect, was handed down today by the United States circuit court of appeals. The decision held that state lines do not affect the question of priority of water rights and the contention of the state of Colorado that junior appropriators in this state have priority over senior appropriators in adjoining states fails. The court of appeals sustained Judge Lewis and upheld every contention made by Edwin H. Park, attorney for the Pioneer Irrigation company, as to state rights in water controversies. The decision says that the filings first in time are first in right regardless of state lines. The Pioneer Irrigation company serves its customers both in Colorado and Nebraska, taking the water from the Republican river, an interstate stream. Colorado insisted that the Nebraska senior claimants for water were not entitled to water until Colorado junior appropriators had been cared for. The decision will have a material effect on the suit now pending between Colorado and Wyoming involving interstate water rights. The Pioneer Irrigation company made the state engineer and the Water commission of Colorado the defendants. The state appeared through Attorney General Farrar. It is likely that the case will be carried to the supreme court of the United States by the state.

Persistence Is the Cardinal Virtue in Advertising.

WE SAVE YOU MONEY. THERE'S A REASON. Raymond's FURNITURE STORE. 1513-1515 Howard St.

Our Every Day Low Prices—in pieces, here and there for the Living Room—will appeal to you. Get them before you buy. It will pay you.
