

LARGEST DISPLAY ROOM IN WORLD

Tools and Farm Implements Shown in Operation for Visitors at John Deere Plow Co.

LUNCHEON TO BE SERVED

Visiting dealers may be surprised to find the John Deere Plow company, corner building at Tenth and Howard streets, occupied by the McCaffrey Motor company, agents for the Ford car. This does not mean that the John Deere Plow company have moved to other quarters, but merely that they have leased this corner building, for which they no longer had any direct use, having discontinued the sale of Velie automobiles about a year ago.

The office of the John Deere Plow company is on the second floor and reached by an entrance in the middle of the block, between Ninth and Tenth on Howard street.

Visitors will be particularly welcome, and special arrangements have been made to take care of them in first-class shape.

Luncheon will be served at noon on Wednesday, Thursday and Friday, according to the custom in the past, and all visitors are cordially welcome.

The John Deere Plow company display room on the eighth floor of the building is the finest and largest room devoted to the display of agricultural implements, wagons and vehicles in the world, and it is worth the time of any implement dealer or farmer to pay a special visit to this room and see the modern, up-to-date tools of all sorts shown here. Wherever possible, tools are shown in operation, giving the visitor an opportunity to see what they will do under working conditions. A large force of factory representatives will be on hand to explain all the details and answer perplexing questions which may have occurred to the user at various times.

In addition to the display on the sample floor, John Deere Plow company will also have a display at the Auditorium, where the Mid-West Retail Implement Dealers' association have exhibitions. The John Deere Plow company display at the Auditorium will consist exclusively of the products of their harvester factory, including grain binders, corn binders, mowers, sulky rakes. A representative will be on hand at the Auditorium, as well as at the office, but visitors will find it more to their advantage to go to the main sample floor, where they can have an opportunity to inspect the full line.

Wallis "Cub" Junior Is Tractor With All The Advantages

The Wallis "Cub" Junior tractor will get a lot of attention at the implement dealers' convention because it embodies all the qualities that make for desirability in a farm tractor. It is built by the same men who made the "Cub" such a big success. It weighs 3,200 pounds, has rear wheels forty-eight inches in diameter, a wheel base of ninety-three inches and a speed of two and a half to three and a half miles an hour. It

OFFICERS OF COMING CONGRESSES—Frank Tannehill, Norfolk, Neb., vice president of the Nebraska Farmers' Congress, will preside in Omaha this week, in the absence of President George Coupland. J. B. Grinnell of Pa-pillion is secretary of the congress. C. E. Gallagher of Coleridge, Neb., is president of the Mid-West Implement Dealers' Association.

is equipped with a power pulley for belt work. The Wallis "Cub" Junior has a rugged compact simple efficient motor that gives it the greatest pulling power of any tractor ever built for its weight. It can make a turn within a radius of its wheel base because of its single front wheel. The motor base, trans-

IMPLEMENT MEN MEET THIS WEEK

Mid-West Association to Hold Convention Here, Beginning Wednesday, at Rome.

EXHIBIT AT AUDITORIUM

The Mid-West Implement Dealers' annual convention is an event that will take place next week in Omaha. This convention has been growing in importance from year to year. Situated, as it is, here in the very heart of the country's greatest agricultural district, it arouses the interest of many thousands.

It will be held December 13, 14 and 15 in the Auditorium, which will be filled with exhibits of all kinds of farm machinery and equipment, including the very latest improvements and inventions for tilling the soil, for harvesting the crops, for raising stock and caring for it, and, in fact, for all departments of agricultural work.

The big firms in this line of manufacture are to be represented with large exhibits. Sessions of the convention will be held at the Rome hotel, beginning Wednesday at 2 p. m. with the address of President C. E. Gallagher and the reports of Secretary James Wallace and Treasurer J. M. Elwell.

Thursday will be "Farmers' day," and at the morning session there will be a number of addresses, while in the afternoon there will be a theater party for the ladies, and the men will inspect the exhibits. The sessions will close Friday morning.

Big Tank Factory Has Grown Up in Omaha
A. N. Eaton of the Nebraska

Iowa Steel Tank company is a self-made man who has built up a very large business from a very small beginning. His big plant is now one of the most completely equipped in the United States, making water tanks, oil barrels, gasoline or oil tanks, grain bins, ash cans and other metal products.

The company has just completed a large government contract for ash cans. The company has the largest truck in the city.

"Easyway" Line of Farm Implements

The Sandwich line of "Easyway" loaders and rakes, engines, shellers, grinders, corn slicers, elevators and hay presses will have a good showing at the implement exhibit in the Auditorium.

This line has attracted great attention because of its splendid construction and the ideas and conveniences incorporated in the construction of the various implements.

They are made by the Sandwich Manufacturing company, 1216 to 1230 South Main street, Council Bluffs, W. E. Dawson, manager.
