SAFETY FIRST

The man who coined the slogan, "SAFETY FIRST," was a genius, so was the late H. M. FLAGLER, pioneer of the FLORIDA EAST COAST RAILROAD. After the terrible freeze in Florida in 1895 he sent his associate, MR. J. E. INGRAHAM, on a tour south from ST. AUGUSTINE to find, if possible, a part of FLORIDA unaffected by the freeze, as the rest of the state was then as barren as Vermont in February. Mr. Ingraham found PALM BEACH COUNTY green, luxuriant and beautiful. Citrus trees were not injured, even the fruit was uninjured. Since that time FLAGLER and his associates have poured millions into the "SAFETY FIRST" county of FLORIDA. Be a wise old owl and follow SUCCESS for SAFETY.

Mr. Farmer, While You Are In Omaha Call and See Us-It Will Profit You.

Your success will be in our lands. Twenty acres of our best Truck and Citrus Fruit lands will produce more net profit than 200 acres here in the north. "FIGURE COST," 200 acres, \$40,000; 20 acres of the best Muck Land we own, \$3,000, on easy terms. Fewer farm implements to buy, 365 growing days each year. Fincest climate on the American continent. Why rent farms? If you have a moderate capital you can be positively independent in a few years, close to town, good roads, schools, churches, banks and packing houses. The thirteenth biennial report of the Department of agriculture states that the highest production in Florida is from Palm Beach County lands. of agriculture states that t Palm Beach County lands.

Cur lands in North Florida are real farming and trucking lands, squally schapied to trucking, small farming and stock raising. They are in the famous winter Irish polate district and noar one of the largest risch farms in the country. We are within 16 miles of Jackson-ville, the southern metropolis, with its meat packing plants. Within an hours ride by train or automobile of the ocean beaches. They are on or near the magnificent 8t. John's river and we have the choice of rail or water routes to all the Atlantic cities, thus insuring the best of passenger and freight raise.

The ohmate is free from extremes of heat and celd such as are superienced in the north and central states. We have about 30 inches of rainfail, the ideal amount for the production of crops. We have the lonation. We have the climate. A combination rarely found in any locality. We know of no other place in the country where they are combined in the country where they are combined in the came degree. Our prices are cheap, our terms are sany.

Don't take our word for it. Jein our excursion to leave time had the content.

The greater portion of the decline The greater portion of the decline in wheat came inside of the first hour of the trading period. Prices went off ½ to ¾ of a cent between quotations, and kept going until the bottom was reached. Then there was a reaction of between 2 and 4 cents, after which prices again sagged off, going pretty well down toward the lowest level of the day.

Omaha wheat receipts for the day were thirty-five carloads and price ruled at \$1.54 and \$1.57 per bushel. Corn followed wheat to some ex Corn followed wheat to some ex-tent in the drop, yet the decline was nowhere near so pronounced, it going off ½ to 2 cents, and selling at 84½ and 85½ cents per bushel.
