Pr. Traders Show More Willingness to Sell. WHEAT IS FAIRLY ACTIVE Omaha, January 11, 1347. The cash wheat situation was fairly ac-five today and while the receipts were light

and the market was on a decline the seliers were more willing to let go of their sam-ples today than they were on either of the two previous days. The wheat demand to-day seemed to be confined mainly to the hard winter variety, with the No. 1 hard seeling a triffe more readily than the No. 2, the dynamic for No. 1 hard being rather quiet at the high level. No. 1 hard wheat sold around 11.85@1.80. No. 3 hard maged from 51.85 to 5.190 and No. 4 hard brought 51.83@1.18. the market generally showing a decline of 2c to 1c under yesterday's quotations.

The Bank's Workshop

One of the most interesting parts of a modern city bank is the

Transit Department

This is the real workshop of the bank. Here are handled the many thousands of checks which are each day deposited, not only by city patrons, but by many country bank depositors.

How Is It Done?

Many customers wonder how this work is done and will be interested in the actual operation. An inspection of this department will give you an excellent idea of the amount of detail work necessary in handling the business of a big bank.

Any of the officers will be glad to show you through and explain the method.

A cordial welcome to visitors.
