Society Notes by Mellifera January 15.

A reversion to colonial days was the novel feature of the fashionable Blackstone dinner-dance Saturday evening, when dancing by candle light proved to be a decided success.

Guests approaching were mystified by the medieval darkness which enveloped this exclusive hostelry. The only means of illumination greeting the arrivals was a tiny taper which struggled against the sweeping blasts of Aeolus and threatened its fragile life at the opening of the door.

On the eighth floor, where the tables were set in the sun room and in the enclosed roof garden, hundreds of white tapers decorating the dinner tables as well as the ball room, lent a festive atmosphere to the occasion, and cast a most effective glow over the beautiful gowns of the women, which seemed to be of more varied hues than usual.

Science of Linguistology

By DOROTHY DIX. The request to "put out your tongue" doesn't mean the same thing now that it used to in the good old days when the family doctor took that means of ascertaining the state of your liver and stomach.

There is the sharp tongue with the razor edge that cuts to the quick at every pass. This tongue is also found oftener in a woman's mouth than a man's. It indicates a mean and cruel disposition, and to go near it is to court danger.

There is the paprika tongue, which likewise belongs to the feminine sex, which blisters where it touches. Many men find this piquant, before marriage, but they do not seem to admire it so much when they are presented with yards and yards of it upon their return home at 3 o'clock in the morning.

There is the smooth, flattering tongue that plasters you over continually with fulsome praise and compliments. It is an indication that the possessor of it is a cheerful worker, and that you will be the next victim.

A ready tongue is esteemed a great advantage, but when the day of trouble comes to us it is not the man who is a glib talker to whom we go for help and comfort. It is to the man with a halting tongue who stumbles over his words, or is dumb, but who gives us a clasp of the hand that means more than a whole dictionary full of fine words.

Undoubtedly the study of linguistology may be attended with much benefit, but the greatest thing anybody can discover is how to apply a brake to the tongue of those people whose talking apparatus runs away with them.

Names Left by Indians Heighten the Beauty Spots

By GARRETT P. SERVISS. I sing the praise of New York. Not in metre, to be sure, yet, in spirit, this is a song. I would make it a veritable psalm, if I could.

Hiawatha, the god of the sagacious red man, when he came down from heaven, chose the heart of New York for the "long house" of his people. His selection was approved by the still more sapient white man. The land of Hiawatha gleams with cities, villages, colleges, farms, and within the limits of the state that has grown up around the abandoned hearths of his children is gathered the population of a great kingdom, composed of kings, not subjects.

Hiawatha's Mohawks, Oneidas, Onondagas, Cayugas and Senecas have left their names—a robe of splendor in poetry over the lakes, hills and waterfalls, and match in beauty the scenes to which they cling—Chenango, Susquehanna, Unadilla, Cayuta, Cayadutta, Canandaigua, Canajoharie, Canastota, Canastota, Chittenango, Genesee, Horicon, Honnedaga, Oswego, Oswego, Ontario, Oneonta, Sacandaga, Saratoga, Schoharie, Niagara and Manahatta—are not these names that the Muses themselves would have chosen to be known by?

Regardless of what commonplace meanings they may have had for the Indians, do they not make the places that bear them dwell long and gratefully in the memory? Imperial New York! Could she have bestowed upon herself an Indian name, from among the legion of them which lay at choice, her baptismal fortune might have equalled Napoleon's.

Could any other river than the Hudson have been worthy to shape a harbor for the queen city of a world's commerce, and the metropolis of a nation of free, self-governing men? Providence works at long range, and makes no mistakes. It foresaw, and prepared a place for the capital of democracy. The city of New York is as many-sided as picturesque, as fascinating as the peerless state that has surrendered more than half its population to people this vast hive of humanity.

The rocks that bear its mighty piles, its domes, and pinnacles out-towering the pyramids, are braced upon the ribs of the planet. In the days of its youth, before civilization had claimed and transformed it, Manhattan could vie in beauty with an Aegean isle.

The majestic Palisades looked across it and remembered the link that bound them. They looked across today and are sunk in wonder over their ancient comrade. This is the age of riches; let me, then, sing of the wealth of New York. Not its civic wealth, not its gold-lined vaults, but its treasures yet to be grasped by human hands.

Much of the old land of the Iroquois is found as productive as ever when turned to newer uses. If the Empire state no longer excites wonder and envy by its enormous grain and corn crops, it leads the union in growing potatoes—the great dietary gift of America to the world. In small fruits, grapes and vegetables, it has few rivals. It can raise all the hay and produce all the milk it needs. Many of its new college-bred farmers are prosperous, and they have this splendid advantage—they are surrounded not by monotonous, endless prairies, or a distant frame of barren ridges, but by some of the noblest and most beautiful scenery on the earth.

Nujol For Constipation

Science Confirms the Lore of the Indians. Long before the coming of the white man, the Seneca Indians collected mineral oil from the surface of water in pits dug in the oil sands.

Today the twentieth century physician prescribes mineral oil as the safest, most rational treatment for constipation. Nujol is the modern version of the Indian specific. It is not a laxative or purgative. Its action is to soften the intestinal contents and so make natural movements easy.

Beware the Cold Storage Egg!

In his work on food and dietetics Doctor Robert Hutchinson says, "the absence of carbohydrates prevents eggs from being in any sense a complete food." This refers to the fresh egg—the egg with a clean bill of health. What would the Doctor say of the modern cold storage egg? At present prices two eggs cost ten cents—and the egg is not a complete food!
