What You Pay For On A Long Distance Call. In making a long distance telephone call you have the use of more than merely the wires over which you talk.

Repairs Always Ready. Somewhere along the line, the branch of a tree, a strong wind or an electric storm may put the wires out of order.

The amount you are charged when you make a long distance call is to help maintain the line, to facilitate the payment of interest on the investment in the equipment used for long distance, to aid in the payment of taxes on the property and assist in paying the employees' wages.
