Use Cocoanut Oil For Washing Hair

If you want to keep your hair in ood condition, be careful what you

wash it with.

Most soap and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Just plain mulsified occoanut oil which is pure and entirely greaseless, is much better than the most expensive soap or anything else you can use for shampooing, as this can't possibly injure the hair. wash it with.

Simply moisten your hair with wa-ter and rub it in. One or two tea-spoonfuls will make an abundance of rich, creanty lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily, and removes every particle of dust, dirt, dandruff and ex-cessive oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to man-

You can get mulsified cocoanut oil at most any drug store. It is very cheap, and a few ounces is enough to last everyone in the family for months.—Advertisement.

TRAIN YOUR HAIR AS AN ACTRESS DOES

No class of people devotes as much time to beauty as do actresses, and no class must be more careful to retain and develop their charms. Inquiry develops the information that in hair care they find it dangerous to shampoo with any makeshift hair cleanser. The majority say that to have the best hair wash and scalp stimulator at a cost of about three cents, one at a cost of about three cents, one need only get a package of canthrox from your druggist; dissolve a teaspoonful in a cup of hot water and your shampoo is ready. This makes enough shampoo liquid to apply it to all the hair instead of just the top of the head. After its use the hair dries rapidly, with uniform color. Dandruff, excess oil and dirt are quickly dissolved and entirely disappear when you rinse the hair. After this your hair will be so fluffy that it will look much heavier than it is lits lustre and softness will also delight you, while the stimulated scalp gains the health which insures hair growth.—Advertisement.
