HOME-SCHOOL GARDEN

Lincoln, Jan. 27.—(Special).—Some 2,222 Nebraska boys and girls took part in home-school garden clubs conducted by the agricultural extension service of the University of Nebraska in co-operation with the United States Department of Agriculture, with schools, and with the children's own parents. This work was carried on in twenty-five towns in 1916.

As a result of this work 1,239 back yards of the state produced a garden, and 345 vacant lots that formerly grew nothing but weeds supplied vegetables for the table. One hundred and seventy persons acted as adult leaders, and 9,371 children and adults received instruction in gardening and canning as a result of the 387 demonstrations held. Also 150 garden club picnics were held, the total attendance being 5,212.

Receipts Good.
Of the 2,222 children who started the work, 1,405, or 63 per cent, had determination enough to complete the job, even to the last detail of submitting a written report and a financial report showing profit or loss for the year. The total receipts from the kiddies' gardens in twenty-four towns was \$11,745.40, in addition to \$1,781.13 worth of canned products, making a total income of \$13,526.53.

A profit of almost \$500 an acre, or \$1.13 per 100 square feet, was the average profit made by children whose financial statement showed balances on the right side of the ledger.

Most of the towns in which garden club work was carried on, as a result 1,005 boys and girls received recognition in the school room for their work. The workers in charge of the project try to interest both teachers and parents in the work, and much of the work is done in the home. This branch of extension service work has been described as the "connecting link" between home and school.

Plans are being made to co-operate with additional towns desiring to take up the work this year.

The plaintiff was formerly in the employ of the Sidney electric light and water plant and the suit grows out of charges alleged to have been made at the time of his discharge by Superintendent Hardy several months ago.

MERCHANT'S WIFE
ADVISES OMAHA WOMEN

"I had stomach trouble so bad I could eat nothing but toast, fruit and hot water. Everything else soured and formed gas. Dieting did no good. I was miserable until I tried buckthorn bark, glycerine, etc., as mixed in Adler's. ONE SPOONFUL benefited me INSTANTLY." Because Adler's empties BOTH large and small intestine, it relieves ANY CASE constipation, sour stomach or gas, and prevents appendicitis. It has the QUICKEST action of anything we ever sold. THE "JUPE TONNEAU" takes the center of the stage (barrel effect) even to the curved stave effect and the slightly narrower width at bottom—the hoop is carried out in the belt. Dame Fashion has been generous in her approval for this Spring's Coats—as there seems to be a variety of lengths, collars are varied enough to suit everyone and sleeves are also shown in a range of styles.

Pleats form an important feature in the newest styles and belts are shown on almost every model, holding the fullness a little more closely to the figure. Deep cuffs, broad collars (many of contrasting colors), are used. Stitchings, novelty buttons and pockets all lend to the charm of the newest models.
