## TRIPLE SEVEN BILL PROMISES BIG JOBS

Vic Wilson Advocates Law to

Lincoln, Feb. 20,-(Special.)-Railvay Commissioner Vic Wilson has prepared and sent to the newspapers and members of the legislature copies

and members of the legislature copies of a message which gives his reasons why H. R. 777 should become a law. He says in part:
"The bill bears the cuphonious number H. R. 777, and I intend to do everything in my power legitimately to secure its enactment into law. It proposes in substance to assess all of the expenses of valuing the properties of public service corporations, exthe expenses of valuing the properties of public service corporations, examining their books of account and records and investigating their service, upon the corporation whose affairs are being inquired into, the basis of expenses adopted being \$10 per day for the time of each employe of the commission engaged in such work. These employes consist of engineers and expert accountants for the most part, and the commission is a unit in its opinion that this per diem will pay their wages and traveling expenses. their wages and traveling expenses. The commission also concurs with me as to the wisdom and necessity for uch a measure.

Looks to Opposition.

"I expect opposition to the measure on the part of some of the corporations at least. Not because of porations at least. Not because of the expense to them particularly, but because of the effectiveness with which the commission can and will regulate them, if equipped in this fashion. It is my opinion that this measure will provide sufficient funds for all of the outside work of the commission and assuming that the legislature will appropriate sufficient funds for the inside work—the office wor—House Roll No. 777, if enacted into law, will absolutely preclude the commission from pleading a lark of funds with which to do its duty. Under the conditions now prevailing—the woeful shortage of funds with which to perform the duties already imposed upon the commission, I am opposed upon the commission, I am opposed upon the commission, I am opposed to any measure adding to those duties.

"Euphony" is Right.

"Euphony" is Right.

The "message" is a peculiar one in many ways in that it would cause the egislature to force the public utilities not only to come across with a charge of \$10 a day and all expenses for the mean selected by the commission to make investigations, but it would also force these utilities to pay this money in advance. If the legislature will only give the commission the right to hold up the corporations for the money the commission deems necesthe commission deems necesmonex the commission deems neces-sary to investigate, with the expense of the same, will not figure very much, but the 'effectiveness with which the commission will regulate them,' if given the right to hold them up first for the money and the right to go after them afterwards, is given them, every thing will go along as merry as a marriage bell—for the commission.

Good health is dependent on regularity in this important function, whenever there is the slightest indication of constipation a mild laxative should be taken to relieve the congestion and dispose of the accumulated waste. Cathartics or purgatives should not be employed, however; these are too violent in action and their effect is only temporary. A mild laxative such as the combination of simple laxative herbs with pepsin, known as Dr. Caldwell's Syrup Pepsin, the ideal remedy.
