Popularity Increases Demand

Owing to the popularity of Buick Valve-in-head motor cars, the great Buick factories at Flint, Mich., have been unable to satisfy the demand for these cars, even by practically doubling their production each year.

Notwithstanding this fact, however, they have not for one minute sacrificed quality to bring about this increase.

Buick reputation is due to the policy established with the production of the first Buick car—that of giving the owner the maximum of service for the minimum of cost.

Exhibited at the Show

The complete line of Buick 1917 Valve-in-Head motor cars, will be exhibited at the Omaha Automobile Show, February 26 to March 3.

The line comprises seven models—two roadsters, three touring cars (five and seven-passenger), and two closed cars, a three-passenger coupe and seven-passenger sedan—ranging in price from \$660 to \$1835, f. o. b. Flint, Mich.
