

SHIP FOOD FIRST, GRAIN MEN SHOUT

They Protest "Munitions First" Policy of Railroads to Commerce Commission.

"HUMANITY IS SUFFERING"

Acting in conjunction with similar organizations all over the United States, the Omaha Grain exchange has filed a protest with the Interstate Commerce commission, going on record with the commission as emphatically protesting "against the apparent policy of the railroads in handling first, munitions of war for the destruction of human life, when not only hundreds in the United States, but thousands upon thousands in Europe, need the necessities which sustain life, but which in transportation affords a smaller revenue to the railroads than munitions of destruction."

"We believe that when humanity is suffering throughout the world that foodstuffs should be given preference over the transportation of munitions."

The protest was sent by wire and it is understood that today in Washington the commission will receive hundreds of similar telegrams.

American Tractors To Plow in Britain; Help Beat U-Boats

London, Feb. 28.—"We want 2,000 American tractor plows for the use of a civilian army of night plowers which we are about to enlist throughout the British isles," said Sir Arthur Lee, director general of food production, to The Associated Press today. This new department, which is the outgrowth of Germany's submarine campaign, aims at the enlistment of several hundred thousand civilians to cultivate every available bit of soil. "We hope to make the tractor plows fill the gap caused by the shortage in labor," continued Sir Arthur. "For this reason we are going to import as many as we can from America. We are going to equip them with headlights for night plowing. Laborers can only work eight hours, but tractors can work twenty-four hours. They will be driven by tactical drivers and chauffeurs, who will be able to learn their mechanism in a few hours."

"Behind every plow will be a skilled farmer. They will be assisted by prisoners, conscientious objectors, members of the home defense forces and women. In this way we hope to produce enough food to make us independent of outside help as long as the war lasts. We do not believe we will be able to produce sufficient crops to feed the population in time of peace, but are confident we will be able to grow enough to stave off starvation during the war. For this we thank the German submarines. They already have given England an agricultural policy which is destined to make us to a large extent self supporting. The submarines, also, have revived rural life, given the farmers a minimum wage, and generally made our national defense more effective than a thousand speeches in Parliament."

The protest was sent by wire and it is understood that today in Washington the commission will receive hundreds of similar telegrams.

Always a car of character and unusual beauty—the new series Haynes "Light Six" embodies a number of refinements which make for even greater comfort and exclusiveness. But the engine is the same wonderful tried-and-true, high-speed motor, which has been setting the pace in the light six field for three seasons.

WITH CYLINDERS 3½ x 5, THIS MOTOR DEVELOPS MORE POWER THAN ANY OTHER MOTOR OF ANY MAKE OF EQUAL BORE AND STROKE.

This reserve power, coupled with rare ease of control, gives the Haynes "pep" and snap, responsiveness to the throttle, that no other car of its kind can equal.

One to sixty miles per hour on high—pick up of 30 miles within 7½ seconds from standing start—8000 miles to a set of tires, 400 miles to a quart of oil, 16 to 22 miles on a gallon of gasoline—these are definite figures of what the Haynes does in the hands of its users—and figures that give the Haynes a big margin of preference after searching comparison.

We cite the well known facts of Haynes performance, merely to convince you it's worth considering. Let us demonstrate and ACTUALLY SHOW YOU what the Haynes will do for YOU.
