Good Demand Strengthens the All Eyes in Wall Street Are Directed Toward the National Capital.

CONDITIONS ARE EASY

New York, April 2.—All eyes in Wall street were directed toward Washington today, the trend of events at the national capitol being the feature of paramount interest. The celerity with which congress proceeded to organize was viewed with general approval by conservative as well as specialitie interests. Monetary conditions remained casy, last Saturday's adverse bank statement being offset by the receipt of additional gold imports which were placed to the credit of the entents allies. Closing of the books on the offerings of the Pennsylvania Ralironal company's issue of \$50,000,000 bonds several days in advance of the appointed time because of over subscribing attested to the confidence of investors.

The uncertain state of the international situation was more strikingly exemplified in the complete withdrawal rates of exchanges on the Teutonic countries, presunalty in the absence of any demand. Quotations for sterling and lires were firm to strong, but frames receded a fraction, rubles gaining about as much.

Stocks were irregular at the opening except for those issues in which pools recently have been active. The entire list moved forward by noon, however, and was at highest levels in the last hour, the activity of that period deriving much of its momentum from short covering.

War shares and equipments dominated the list, Bethelehem Steel old stock rising 4th points to 148 and the new 6th to 1415, United States Steel made an extrems gain of 2th at 1158, with 1 to 3 points for affiliated lasues. Coppers and shippers were materially higher after early hesitation, and motors made up their early reaction before the close. Foremet specialises included Ohio gas, which rose? points to 149 %, with three for American woolen and 2 to 3 points for various unclassified issues. Rails were irregular, being handicapped by farther poor February statements of carnings. Total sailes, 65-00 shares. Heaviness of high grade rails made for an irregular bond market.
