GRAIN AND PRODUCE

Cash Corn Jumps Up Three and a Half Cents and Wheat is Some Stronger.

OATS HOLD ABOUT FIRM

The cash grain situation was fairly active today and prices on all cereals were quoted substantially higher.

The wheat market was rather slow in comparison with corn, and while there was a pretty active inquiry for this cereal, the buyers were inclined to hold out for better prices.

The wheat market generally was quoted from steady to higher, the better grades of hard winter wheat being the most active.

The oats market was firm, and most of the offerings were unchanged to higher.

Barley was slow on account of light receipts, but the demand was good, and the market was quoted from steady to higher.

Primary wheat receipts were 792,000 bu. and shipments of 792,000 bu. against receipts of 7,150,000 bu. and shipments of 527,000 bu. last year.

Primary oats receipts were 1,109,000 bu. and shipments of 1,109,000 bu. against receipts of 833,000 bu. and shipments of 708,000 bu. last year.

Chicago Grain and Provisions: Wheat and Corn are Higher, but Course of Both is Erratic.

Table with columns for Wheat, Corn, and various grades and prices.

Chicago, Ill., April 9.—After smashing news today the high price record, wheat values had a severe break, due largely to realizing by holders who believed that the government report showed the winter crop was better than had been expected.

At first crop reports, especially from Kansas, were of a continued pessimistic character and the wheat market, although slightly and changeable to an extraordinary degree, had a general upward slant.

Trading showed signs of greater activity, but for the most part was evidently curtailed by the big margin calls, which were enforced in particular against month-end speculative buyers.

About the middle of the session, sellers began to be in a decided majority and from that time on the market was on the down grade, with only brief transient rallies.

It was a coincidence that with announcements of Austria's break with the United States, but any relation between the two events was scoffed at.

Aside from somewhat more hopeful winter crop reports, there was late what seemed to be the possibility of a possible bug increase of spring wheat seedling.

The posting of domestic weekly supply figures showing a big falling off in the total available stock had only a temporary effect in partly checking the final downward slide of prices.

Corn, like wheat, reached new top quotations, and then descended sharply. Selling and a general disposition to even out risk appeared to be chiefly responsible for the weakness which succeeded the early bulge.

Oats merely duplicated in a restricted way the action of wheat and corn.

Chicago Cash Prices—Wheat: No. 2 red, \$2.20 @ 2.25; No. 2 hard, \$2.15 @ 2.20; No. 2 hard, \$2.10 @ 2.15.
