

RIGHT TO FIX COST IS DISPUTED HERE

Grain Dealers Challenge Government's Legal Authority to Control Market.

"VIOLATES CONSTITUTION"

Omaha, one of the most important food distributing centers in the United States, sat up and took notice when Secretary of Agriculture Houston recommended to congress that the Council of National Defense be empowered to fix food prices.

This city is the foremost butter market in the world, the second largest grain market and the second largest live stock market.

Legislation tending to establish standard food prices affects materially the big business interests here.

Leroy Corliss and Charles Harding declare that fixing the prices of dairy products would tend to throw out of joint this city's butter and creamery business amounting to \$10,000,000 annually.

Demand to Be Gauge.

Grain men are unanimous in the opinion that economic demand will have far more to do with fixing cereal prices than any arbitrary standard of values the government may try to establish.

To Divert Union Trade

T. P. Shirley, secretary of the Douglas County Consumers' league, in a letter read last night at the meeting of the Central Labor union, urged members of the union and their families to divert their trade to the store owned by the Douglas County Consumers' league.

Must Consider Costs.

LeRoy Corliss, president of the Waterloo Creamery company, evaporated milk—I don't see how the government can fix a maximum price on any manufactured food without going back all along the line and fixing the price of every article that goes into the production and packing of that food, together with the labor costs.

Two years ago our one-pound tin cans cost us \$46 per 1,000. Today they cost us \$85 per 1,000. Even the paper labels on the cans now cost us \$1.13 per 1,000, while a year ago they cost us only 56 cents.

Milk Is Big Item.

Then there is the big item—milk. A year ago we paid \$1.20 per 100 pounds. Today it costs \$2.15. How can the government fix the price at which we must sell our evaporated milk without fixing the price of all the accessories we have to buy? How can it fix the price of our product without fixing the price at which the farmer must sell it to us?

And the moment it reduces the price the farmer gets, bang! he will quit shipping.

We in the creamery business think the best possible stimulus to production is the high prices the farmer is getting. You can preach production to the farmers till you're black in the face, but the thing that will stimulate them to produce more is big prices.

President Charles Harding, of Harding Creamery company—The fixing of food prices by the government is such an entirely new idea in this country that I could not venture an opinion as to what it would do to butter or anything else. If the government does fix the price of food stuffs, we will all have to govern ourselves accordingly. I should hardly think the government would do anything that would inflict unavoidable losses upon those in the business of manufacturing these products.

The margin of profit for the big dealers now is smaller than it was before the high prices came on. Everything all down the line costs us more now. Paper cartons for butter cost 100 per cent more. The 10-gallon cream cans we use are up 100 per cent, and so on down the line.

John W. Redick, publicity agent, Omaha Grain exchange—No matter what they do, they can't increase the surplus stocks of grain and foodstuffs. It is now entirely a matter of supply and demand and there is no longer any speculative element in cash grain. This was apparent Friday, when on the floor of the Omaha Grain exchange cash was sold at \$2.70, or 30 cents over the May option. This wheat was taken at this price on account of the demand and it was worth the money. Of course the government could fix a maximum price, but I doubt if a price lower than the actual market value would be taken into consideration.

Supply and Demand.

J. W. Holmquist, president Holmquist Elevator company—I don't think the government will take over the surplus stocks of foodstuffs. I don't think the necessity for such action has arisen, and if it should take them over, I don't see how prices could go much lower. Right now prices paid for cash grain indicate that speculation has been eliminated and that sales are made on the actual value of the commodities.

E. S. Westbrook, president Trans-Mississippi Grain company—If the government fixes the maximum price at which grain is to be sold and eliminates speculation, of course that would be the price that would maintain. However, if there should not be the consumptive demand, my judgment is that prices would have to decline to meet the ideas of the buyers who would be willing to hold for the maximum prices, or until another consumptive demand appeared. Right now there is no speculation in cash grain, every bushel offered fetching what it is actually worth for milling purposes.

Government Is Right.

C. S. Rainbolt, president Rainbolt Grain company—For a long time I have felt that the government would take over the surplus grain and food stocks. Ever since the declaration of war this action has been apparent and the government is right, for the first

Uhlans Cut Down Teuton Deserters

Amsterdam (Via London), April 20.—More than 500 German fusiliers, sailors and landsturmiers, tried to cross the Dutch-Belgian frontier near Cadzand, Holland, says the Handelsblad, but the attempted desertion was frustrated after the party had been pursued and fired on by Uhlans with machine guns. Thirty-eight of the deserters were wounded. The mounted guards along the frontier have been doubled.

essential is to feed our own people and the second to feed the allies. While the constitution does not provide for anything of the kind, the government can take over every bushel of grain in the country and fix the maximum or minimum price. If the government should take over the grain surplus, for a time it might interfere with the business of the Omaha grain market, but it would right itself later on.

R. C. Howe, general manager of Armour packing plants of the South Side, Secretary Houston's recommendation that the government regulate food prices will not be detrimental to farmers or stockmen. In taking over the packing plants the government will first see to it that the class of products demanded by the army and navy are supplied. Next production will be regulated to supply government requirements first, then those of the nation at large will be attended to.

Consumers' League Seeking To Divert Union Trade

T. P. Shirley, secretary of the Douglas County Consumers' league, in a letter read last night at the meeting of the Central Labor union, urged members of the union and their families to divert their trade to the store owned by the Douglas County Consumers' league.

Shirley estimates that \$10,000 is spent daily in Omaha stores by the families of members of the Central Labor union.

"Why not spend this money in stores which you yourselves own?" he asks. "This you can withhold profits from those who are hostile to you and put profits in your own pockets, thereby reducing the high cost of living."

C. L. Shamp, 3615 North Twenty-fourth street, recommended that all members of the Central Labor union join the Douglas County Consumers' league as a step of reprisal, against business men who interfere in labor disputes.

Shamp explained that stock in the Douglas County Consumers' league was controlled by "working men." Each owner of stock whose par value a share is \$10 has a voice and vote in conducting the league's affairs.

New Postmasters.

Washington, April 20.—(Special Telegram.)—W. V. Strobel has been appointed postmaster at Milburn, Butler county, Nebraska, vice Mr. B. Lakeman, resigned. Mrs. Laura P. Paag, at Myrand, Faulk county, South Dakota, vice T. J. Stevera, resigned.

ated iron when they feel weak or run-down and of doing themselves with habit-forming iron pills, to save what you eat, your food merely passes through you without doing you any good. You don't get the strength out of it, and as a consequence you become weak and sickly looking, just like a plant trying to grow in a soil deficient in iron. If you are not strong or iron, you will not make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-grain tablets of ordinary nuxated iron three times per day after meals for two weeks. Then test your strength again and see how much you have gained. I have seen and know of many people who were ailing all the while double their strength and endurance and entirely rid themselves of all symptoms of dyspepsia, liver and other troubles, in from ten to fourteen days' time simply by taking iron in the proper form. And this after they had in some cases been doctoring for months without obtaining any benefit. But don't take the old form of reduced iron, iron acetate, or tincture of iron which are a few cents. The iron demanded by Mother Nature for the red coloring matter in the blood of her children is, also, the iron that you must take.

THE CHILD'S APPEAL

Mother, why don't you take NUXATED IRON and be strong and well and have nice rosy cheeks instead of being so nervous and irritable all the time and looking so haggard and old? The doctor gave some to Susie Smith's mother and she was worse off than you are and now she looks just fine.

"There can be no healthy, beautiful, rosy checked woman without iron," says Dr. Ferdinand King, a New York Physician and Medical Author. "In my recent talks to physicians on the grave and serious consequences of iron deficiency in the blood of American women, I have strongly emphasized the fact that doctors should prescribe more organic iron—nuxated iron—for their nervous, run-down, weak, haggard-looking women patients. Pale, nervous, anemic, and sallow means anemic woman is pale, the flesh flabby, the muscles lack tone, the brain fails and the memory fails, and often they become weak, nervous, irritable, discontented and melancholy. When the iron goes from the blood of women, the runs go from their cheeks."

Dr. Ferdinand King, New York Physician, and Medical Author, tells physicians that they should prescribe more organic iron—Nuxated Iron—for their patients—says anemia—iron deficiency is the greatest curse to the health, strength, vitality and beauty of the modern American Woman—Sounding warning against use of metallic iron, which may injure the

do, corrode the stomach and do far more harm than good, advises use of only Nuxated Iron.

well as for nervous, run-down, and ailing patients. The manufacturers have such great confidence in nuxated iron that they offer to forfeit \$100 to any charitable institution if they cannot take any man or woman under 40 who lacks iron and increase their strength 100 per cent or over in four weeks' time, provided they have no serious organic trouble. They also offer to refund you \$100 if it does not double your strength and endurance in ten days' time. It is dispensed in this city by Sherman & McConnell Drug Co. and all good druggists.—Adv.

assimilated to you any good, otherwise it may prove worse than useless. "I have used Nuxated Iron widely in my own practice in most severe aggravated conditions with unfailing results. I have induced many other physicians to give it a trial, all of whom have given me most surprising reports in regard to its great power as a health and strength builder. "Man an athlete and prize fighter has gone down in ignominious defeat simply for the lack of iron. Dr. Schuyler C. Jacques, Visiting Surgeon of St. Elizabeth's Hospital, New York City, said: "I have never before given out any more information or advice for publication, as I ordinarily do not believe in it. But so many American women suffer from iron deficiency with its attendant physical weaknesses, nervous irritability, melancholy, indigestion, flabby, sagging muscles, etc., etc.—and in consequence of their weakened, run-down condition they are so liable to contract serious and even fatal diseases, that I deem it my duty to advise all such to take Nuxated Iron. I have taken it myself and given it to my patients with most surprising and satisfactory results. And those who wish quickly to increase their strength, power and endurance will find it a most remarkable and wonderfully effective remedy."

NOTE—Nuxated Iron, which is prescribed and recommended above by physicians in such a great variety of cases, is not a patent medicine or secret remedy, but one which is well known to druggists and whose iron constituents are widely prescribed by eminent physicians both in Europe and America. Unlike the old, inorganic iron products it is easily assimilated, does not injure the teeth, make them black, nor upset the stomach; on the contrary, it is a most potent remedy in nearly all forms of indigestion and nervousness. The manufacturers have such great confidence in nuxated iron that they offer to forfeit \$100 to any charitable institution if they cannot take any man or woman under 40 who lacks iron and increase their strength 100 per cent or over in four weeks' time, provided they have no serious organic trouble. Unlike the old, inorganic iron products it is easily assimilated, does not injure the teeth, make them black, nor upset the stomach; on the contrary, it is a most potent remedy in nearly all forms of indigestion and nervousness. The manufacturers have such great confidence in nuxated iron that they offer to forfeit \$100 to any charitable institution if they cannot take any man or woman under 40 who lacks iron and increase their strength 100 per cent or over in four weeks' time, provided they have no serious organic trouble. They also offer to refund you \$100 if it does not double your strength and endurance in ten days' time. It is dispensed in this city by Sherman & McConnell Drug Co. and all good druggists.—Adv.

NOTE—Nuxated Iron, which is prescribed and recommended above by physicians in such a great variety of cases, is not a patent medicine or secret remedy, but one which is well known to druggists and whose iron constituents are widely prescribed by eminent physicians both in Europe and America.
