"And We'll A-Maying Go" --- Monday at Burgess-Nash

Keep Business Going as Usual---

The President of the United States and many wise economists of lesser note throughout the land emphasize the importance of UNINTERRUPTED AND INCREASED PRODUCTION—in the factories, in the mines, on the farms, and every other form of industry.

War cannot be successfully waged without internal prosperity; war time brings greater use for all commodities, not less. To frighten trade at the place of consumption is to smother it at the source of creation. To retard distribution would be to paralyze production.

It is important that our buying and selling be uninterrupted. Money should not be hoarded, but exchanged—circulated—kept moving. That process alone will save the country from internal hardship and outward menace.

A great store like this, whose reputation depends upon continued public confidence, may safely be depended upon to serve as an economical distributing center—its managers are ever alert to secure for its customers the best merchandise and the best values obtainable—to bring them to your door at the lowest possible cost above cost of production.
