Navy to Substitute Wood or Fiber for Brass Cups Re-sponsible for Death of Red Oross Nurses.
Washington, May 30.—To make impossible any repetition of the re-cent unprecedented accident on the American steamer Mongolia, in which two Red Cross nurses were killed, the brass type of powder cup used in American naval guns for a score of years, is to be abandoned for wood or fiber substitutes.

This, dealers declare, is what demoralizes markets, what causes high prices, and what may eventually force absolute control of the country's food supply by the gov-ernment.

The change will be a sweeping one, for great quantities of shells of the kind used on the Mongolia are be-ing supplied other merchant ships and all the vessels of the navy itself carrying small caliber guns.

### Gun Solely To Blame.

The special board of inquiry, which may hended by Captain F. A. Wil-ber, retired, found that the blame for the Mongolia accident apparently reated solely on the type of gun cup, the cups used being perfect and the tumers without fault.

Attached to the report was a state in the Admiral Earle, chief of ord-time, enphasizing that the shells intro of a new lot, carefully inspected for presions accidents and of a type adopted by the nave after extensive research and heretofore regarded as The board held sneeifically about the state of development of the shells all the old annumition responsible adopted by the nave after extensive research and heretofore regarded as The board held sneeifically about the state of development of the shells the state of the state of the shells all the old annumition responsible research and heretofore regarded as the state of the shells of the state of

The board held specifically that the nurses "were located in a position with reference to the gun, which 'or-dinarity would not have been consid-ered dangerous." They were 175 feet off and ten feet above the gun.

"No responsibility for the accident stackes to the commander of the semed guard or any member thereof," said the report.

# WILL CLOSE MONEY **MARKET TO POWERS**

United States, to Retain Financial Supremacy, Will Frown on Floating of Outside Bond Issues Here.

Washington, May 30 .- To enable the United States to retain its present supremacy in international finance throughout the war-an aim with which the entente powers are under-stood to be in full accord-and to emerge in a strong financial condition afterwards, officials have in mind the enforcement of a program, the salient features of which aref Virtual closing of American money markets to further foreign govern-ment bond issues throughout the war. Stabilizing business conditions, so far a possible by the contemplated international purchasing board. Centralization of the country's fi-nancial system, by the admission to the Federal Reserve system of thousands of strong trust companies ent supremacy in international finance

thousands of strong trust companies and state banks at present nonmembers.

### Work Along These Lines.

Virtually all financial plans of the government, including the flotation of the Liberty loan and the program of financing the entente government as well as the efforts to continue the c.u.try's foresent prosperity, are made with those features in mind. Closing of the money markets here to further issues of foreign govern-nici, t bonds is regarded as imperative

if the government is to remain matter of the inancial situation. To this end it is understood the government will notify bankers contemplating the underwriting of foreign bonds of its disconvent disapproval.

### To Close Market.

Great Britain borrowed what funds it needed from the Amer-

ican treasury instead. In line with this policy the govern-ment may find it necessary to induce better-Advertisement.

the government of Cuba to accept a loan of \$30,000,000 instead of raising this amount, as contemplated, by floating a bond issue here.

Stabilization Necessary. Stabilization of business conditions is regarded as essential by treasury officials in order to permit the coun-try to remain in a strong financial positions osition. With a commission spending as much as \$10,000,000,000 a year-the estimated extent of the proposed commission's purchasing powers-it is felt that virtually all lines of industry whose efforts contribute toward win-ning the war would be assured of steady employment at a fair profit and that producers in all lines would not run the risk of fluctuating markets.

### Fluctuation Necessary.

Fluctuation Necessary. A certian amount of fluctuation is regarded as desirable and this it is be-lieved would result from the opera-tion of the law of supply and demand. At the same time, with the commis-sion operating at full power, produc-ers would be enabled to estimate their requirements in raw material at a fairly stationary figure, it is thought, and would not run the hazard of pur-chasing at high prices to face a fall-ing market a few weeks later.
