Dr. Newell Dwight Hillis, congressional clergyman of New York, and Lawrence Chamberlain of New York, well known authority on bonds, are to be in Omaha June 9 to hold a big meeting concerning the sale of the bonds. They are touring the country making speeches at mass meetings boosting the sale of the bonds. Advance notice has been received by the Manufacturers' association here of their coming, and it is asked that the manufacturers here arrange a meeting for them. Premier Seeks Aid of Foe for New Government

Ottawa, Ont., June 2.—Premier Borden called upon Sir Wilfred Laurier, the opposition leader, late today, and asked his assistance in forming a coalition ministry.

It was reported upon reliable authority that the premier offered to allow Sir Wilfred to name half the members of the new government and to grant the liberals authority equal to that given the conservatives on all questions of administration.

The condition attached to the proposal was that if voluntary enlistment, after a fair trial, did not provide the number of men necessary to keep the five Canadian divisions now in overseas service up to strength, a measure of compulsory service should be put into effect.

Broussard Objects to War Tax on Louisiana Sugar

Washington, June 2.—The senate finance committee today heard protests on its revision of the house war tax bill.

Senator Broussard of Louisiana protested against the decision to levy a consumption tax of half a cent a pound on sugar. Although some senators thought the tax would be imposed only upon imported sugar, Chairman Simmons said that the committee intended to have the tax apply on all sugar, domestic or imported.

A new tax of 25 cents per primary horse power developed from public waters was suggested to the committee by Senator Bankhead of Alabama, who estimated it would raise \$1,500,000 this year and much more as hydro-electric development proceeds.

Another change recommended by Senator Kellogg was to exempt from taxation income received by corporations from other corporations to avoid double taxation.

Overseas Forces Cause Enlargement of "Y" Plans

New York, June 2.—Sending of a large expeditionary force overseas will make necessary considerable enlargement of the program of the national war work council of the Young Men's Christian association for activities among the troops, it was announced tonight.

Many additional buildings will have to be erected abroad.

The necessity of erection of a large auditorium in each of the principal camps in this country has been recognized and these auditoriums have been added to the program for 200 brigade buildings already authorized.

The total sum needed to carry through the enlarged program at the higher prices now ruling for materials and labor is expected to be upward of \$4,000,000. The original sum asked for was \$1,000,000 and this amount now is well in sight.

The Survival of the Fittest

GOODRICH BLACK SAFETY TREAD TIRES

EVOLUTION climbs on the bones of the weak. Only THE STRONG, THE BEST, survive the TEST. As true of TIRES as of cave men.

Goodrich Black Safety Treads are the FIT fabric tires that have survived the relentless TEST of the Goodrich Test Car Fleet.

To produce them hundreds of tires have been worn to the quick over millions of miles of the worst roads of America.

Goodrich never sells you an experiment. Be it a Goodrich rubber mat, a garden hose, or a Goodrich tire, it must prove itself by wear and tear test worthy of the Goodrich name.

A cruel test of tires—that test of Goodrich's Test Car Fleets.

Tested The Country Over

Six corps of heavy cars, light cars, hard running cars—take Goodrich Tires and maul their MERIT against teeth of sand, rock, and gravel. Two sets of drivers, speeding them sixteen hours a day, hammer them week after week on the anvil of the road.

Wherever climate and roads can test and tell something about tires, a Goodrich Test Car Fleet is grinding the TRUTH out of Goodrich tires.

While the Atlantic Fleet crunches through the hills and valleys of New York and New England, the Pacific Fleet hammers the granite highways of the Western coast.

While the Dixie Fleet braves the sun of the South, the Lake Fleet ploughs the sand stretches of Minnesota.

While the Prairie Fleet scours the roads around Kansas City, the Mountain Fleet battles the rocky trails of Yellowstone and Glacier Parks.

Throughout miles of roughing it, which run into millions, over roads which cross-hatch the map of the United States, Goodrich learns the TESTED VIRTUES of its tires.

Thus it settles the durability and resilience of the UNIT MOLDED TIRE—the unbroken curing Goodrich has always maintained was the BEST construction for fabric tires. Thus it settles the wearing strength of Black Tread, the toughest rubber known.

ALL THIS IS THE BEST IN TIRES BECAUSE IT HAS SURVIVED THE TEST.
