New Hair Remover Works Like Magic (Positively Removes Roots and All)

No discovery of greater benefit to hair-disfigured womanhood has been made in recent years than the marvelous phenolite method. It is entirely unlike and much superior to electrical, depilatory or other methods, because it actually removes the hair entire, roots and all—before your very eyes—nearly instantly, harmlessly. Get a stick of phenolite, follow the simple directions, and you will be astonished and delighted—or the drugist will refund your money without question. It is odorless, non-irritating, and so harmless a child could safely use it. It leaves the skin so soft, smooth, hairless, that not the least sign of your former trouble remains.—Advertisement.
