Coffee Market.

New York, July 21.—The market for coffee futures opened 8 to 10 points lower and continued weak throughout the entire session, with the close 18 to 25 points net lower and bottom for the day. Trade was not large, but sentiment was bearish, owing to the break of 5-16d in Rio exchange on London, together with the large Brazilian port and interior receipts and disappointing peace prespects. September broke from 8.10c to 7.94c and December from 8.20c to 8.03c. The official cables reported Santos spots 100 rels higher and Rio exchange 5-16d lower.
