

## RECRUITS ARE FAST GETTING INTO FORM

Embryo Soldiers Pour Into Fort Crook and at Once Take Up Work on the Parade Grounds.

Recruits are still pouring into Fort Crook. These are put into the recruit company there at first and later assigned to fill vacant places in other companies. Tuesday fourteen men came in from York, Neb., to join the Fourth. Though their uniforms have not been given them, they went right to work and were soon drilling hard on the parade ground. The parade ground is a picturesque scene these days with its squads of men marching and maneuvering.

Most of the companies are well trained by now and the friends who come out from the city never seem to tire of watching them. These spectators begin to appear early in the day and often there is a large group of them lining the parade ground.

## One Man Handles Case Tractor and Harvester

One man sitting on a harvester can successfully operate the harvester and the Case Oil tractor pulling the harvester. This is a saving of manpower toward which many of the tractors would like to work. Just as a man used to sit on a harvester and crack the whip over his mules, so that man can today sit on his harvester, not to crack the whip, but to operate the throttle and the steering apparatus of the Case. Every movement of the tractor and the harvester is controlled by the levers which are readily within reach of the operator.

This Case tractor also features a short turning capacity which enables the man to cut all the grain instead of leaving some uncut at the corners. By means of a unique hitch attachment, the guiding is accomplished automatically, so that the machine drawn behind follows properly at all times. The J. I. Case people are making a very prominent exhibit at the Fremont tractor show.

## Restaurant Man Seeks to Feed Garbage to Own Hogs

John W. Welch, proprietor of a string of restaurants, has filed injunction proceedings in district court against the city of Omaha and Carl Sorensen seeking to restrain them from interfering with his places in the disposal of their own garbage.

He says the garbage from his five restaurants is worth \$12,000 a year to him for his hog ranch near Omaha.

The city council passed a resolution June 25 providing for the removal of garbage under the contract system. The city was divided into nineteen districts. The Welch restaurants are in the First, Second and Third districts.

Sorensen according to the restaurant owner, made a bid for the garbage from these three districts and agreed to pay \$538.38 a month for the privilege.

Mr. Welch alleges the whole scheme of the city is for the purpose of selling the garbage for a large sum of money and not for the purpose of preserving the health of the inhabitants.

## Camp No. 120, M. W. A., To Give Its Annual Picnic

Omaha camp No. 120, Modern Woodmen of America, will hold its annual picnic at Lake Manawa Saturday. All members, their families and the members of camp No. 2, Royal Neighbors of America, have also been invited. All kinds of games, music and dancing will be on the program from 2 to 11 p. m. The famous drill team of the camp will give exhibition drills in the evening.

**SOCIETY WOMEN BRAVE DEATH IN FLIGHTS**—Members of the Papyrus club, a woman's organization at San Carlos, Cal., have formed a women's aviation corps—the only one in existence. Here is shown Mrs. Charlotte Alexander, a prominent club woman, after making a successful flight, 2,000 feet up.

MRS. CHARLOTTE ALEXANDER.

## Plowing Record is Made At Big Fremont Show

So bad were conditions Tuesday that the committee in charge of the Fremont Tractor demonstration decided it would be impossible to conduct plowing exhibitions.

The one tractor on the grounds that braved the gumbo mud was the Cleveland. Undaunted by the wet, this machine successfully plowed a large stretch of land eighty rods in length, hauling two fourteen-inch plows.

Its track enabled it to plow at an average speed of three miles an hour. A test furrow was made while the machine traveled at a rate of well over four miles to the hour.

Not only was the plowing quickly and cleanly done, but it was deep plowing, the land being turned up to an average depth of eight inches. The test was exceedingly gratifying to the makers of the Cleveland, for it demonstrated that a tractor properly designed and constructed can be worked under the most adverse circumstances. Which means that the farmer who uses such a tractor can work every day, irrespective of the elements.

## Paving Contractors Sue County Board on Contracts

Bauer & Donald, paving contractors, have filed suit for injunction in district court against the county board and the W. E. Callahan Construction company in an attempt to prevent them from carrying out a contract for one mile of paving let recently. They also ask the court to compel the county to award the contract for resurfacing and repairing a five-mile stretch of the Dodge street road, which they say they are entitled to by virtue of being the lowest bidders. It is the outgrowth of a paving row between Bauer & Donald and the Callahan company.

## Boy Hurt When Bicycle And Motor Car Collide

A collision between an automobile belonging to J. A. Edholm, 2403 North Twenty-fourth street, and a bicycle ridden by Eugene Fleischer, 2623 Corby street, Tuesday afternoon, resulted in injuries to the latter.

Fleischer was riding north on Twenty-second street when he collided with the auto. He was knocked from his bicycle to the pavement, suffering bruises about the body. Edholm picked the boy up and took him to Doctor Gifford's office at Twentieth and Lake, where his injuries were attended. He later went to his home.

and when he swore out a search warrant to aid in the locating of the liquor, armed with this, the police Tuesday found five bottles of stuff in the basement of a house a few doors away. It is charged that a woman, who has not yet been arrested, passed the liquor out of the Ritchie basement to the men, and that they planted it in the house where it was found.

## Congress Tires

## "More Miles Without Trouble"

You will get the same mileage and satisfying service from Congress Tires over all kinds of roads.

**CONGRESS TIRES** represent the Highest Quality at the Lowest Price—this because distribution is made entirely through jobbers, thus eliminating expensive branches and national advertising campaigns.

The money saved in this manner is put into the tire.

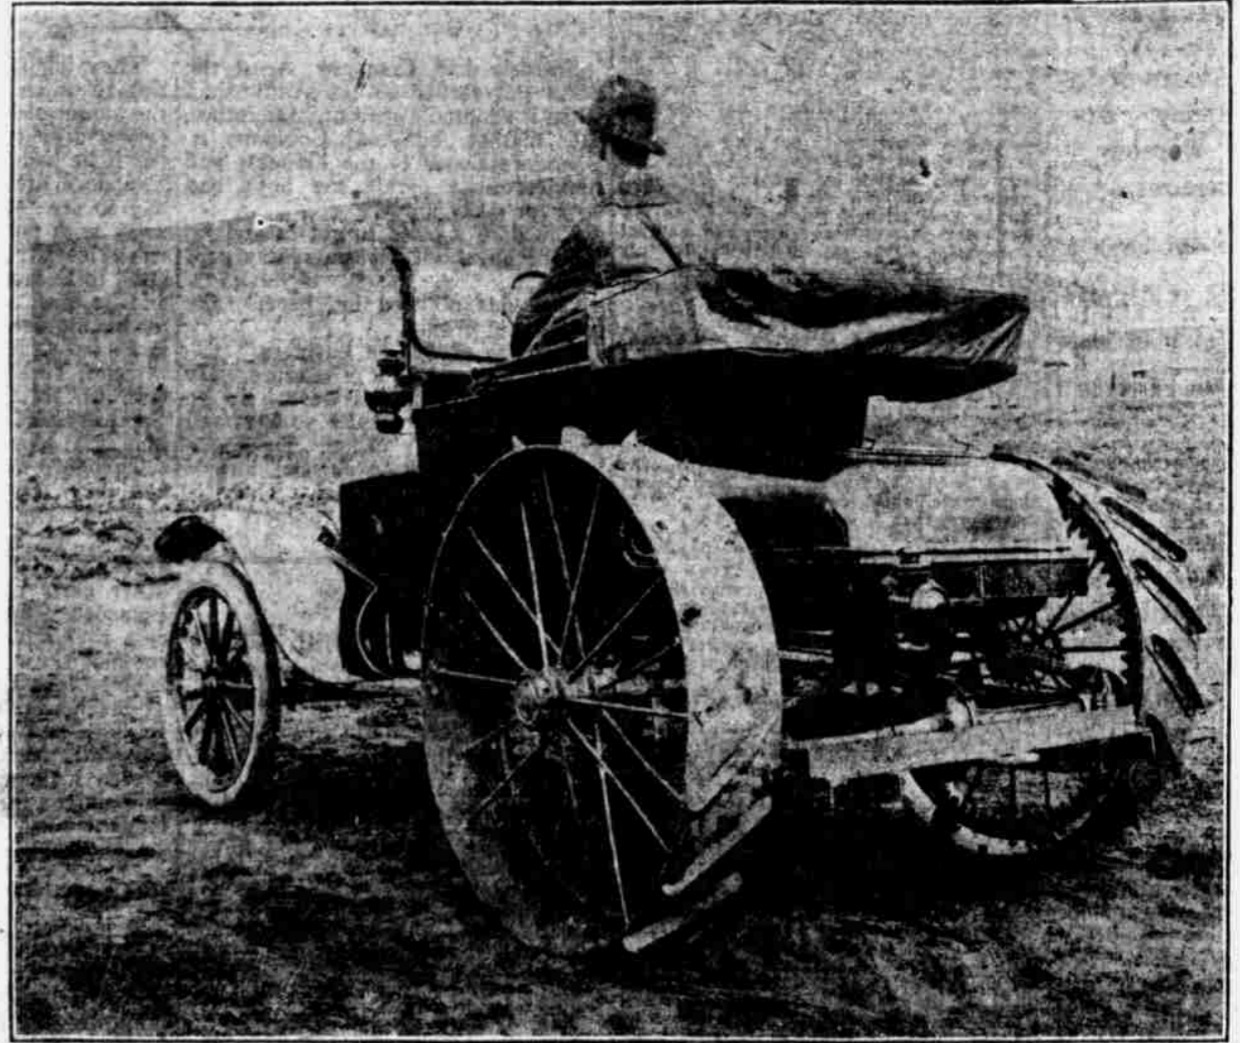

## AN IRON-CLAD GUARANTEE OF

3,500 miles goes with every casing bearing the name Congress.

Phone or write for interesting prices.

PLOW — HARROW — DISC — SEED — HARVEST — FARM — WITH

# KNICKERBOCKER FARM TRACTOR

FOUR-HORSE POWER AT ONE-HORSE COST — \$250 — And a Ford

**NO LOAD OR STRAIN ON FORD.** We build a cradle UNDER Ford in the shape of a trussed frame, which supports the entire load of drawbar pull and car, shortens wheelbase to only 84 inches, gives weight on traction wheels and saves Ford, the car having less work to do than when running on the road.

**Gear Ratio 48 to 1:** Equal to pull of 4 horses or 14 Ford cars. Drawbar pull 1,200 pounds.

**Traction Wheels:** 42-inch by 10-inch face, 45 inches over cleats. Made of cold rolled steel with spokes hot riveted at both ends.

**FITTED TO EMERGENCY WORK.** Farming requires intensive effort for six months during the heated period. The horse is not fitted for sustained effort and must have regular periods of rest.

**WAR TAKES HORSES.** The federal estimates for horses and mules during the coming year is 800,000. These must be replaced with power for farming. We offer a light, convertible power plant which will replace four horses, which eats only when working and which can be used either for farm or road requirements.

**DEALERS AND DISTRIBUTORS** wanted in open territory. Call at our Fremont headquarters or write for particulars.

**ENGINE COOLED AND OILED** by large, dependable radiator; positive circulating system; large patent fan, and sight feed oiler, all included as regular equipment, and guaranteed to keep engine cool.

**ECONOMICAL TO OPERATE.** A power plant you know all about, parts obtainable in every locality and at low cost.

**QUICKLY CHANGED** to power or speed at option, in 15 minutes, with a jack and a wrench.

**DOES NOT FRET OR WORRY.** Flies, hot sun, long days or intensive emergency work does not incapacitate Knickerbocker Farm Tractor.

**LIGHT WEIGHT WITH GREAT POWER.** Knickerbocker Farm Tractor weighs only 850 pounds and delivers a pull at drawbar of 1,200 pounds.

## WHAT OTHERS SAY OF US:

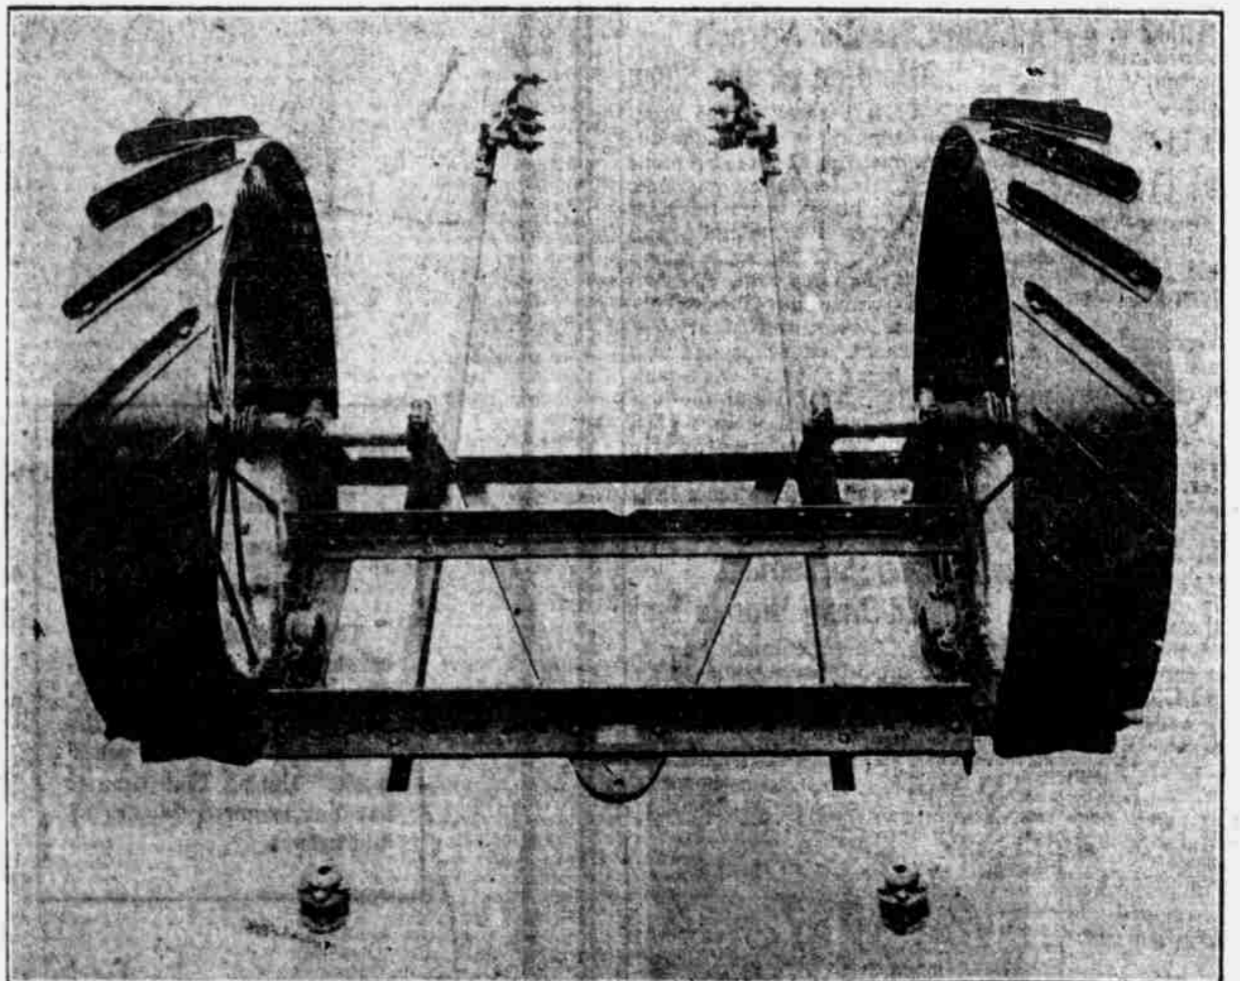

William E. Martin of Stittville, N. Y., writes: "Have done all the work without horses on my 111-acre farm, giving good satisfaction."

Sidney Coats, East Downingtown, Pa., writes: "We plowed two acres of ground with a two-bottom 12-inch plow, in one hour twenty-four minutes actual running time. We can plow a straighter furrow with it than with a horse-drawn plow in stony ground."

What others have done, YOU can do.

Ready For Delivery NOW!

# BRISCOE

The Car of the American People, Was Designed and Built by the Greatest French Engineers

WHEN the French designers were given an order to build a car for the great American people to cost under a thousand dollars and to have great power and greater mileage to a gallon of gasoline than any car in its class, great durability and comfort, they designed and built the Briscoe, which up until now is regarded as the most wonderful production in its class of motor cars.

The Briscoe has now twelve large factories controlled by the most progressive and strongest business men financially in the country.

Briscoe is made to sell for \$725, and has met every requirement of American people who are looking for the best car built for the money. Briscoe is exceptionally easy riding—full elliptic springs, ample leg room, is so simple in operation that it has become a great women's favorite and has made more mileage on a gallon of gasoline of any car offered the people today.

We have a splendid agency proposition and some open territory. We are putting on a live advertising campaign for our dealers.

Price, \$725
