GRAIN AND PRODUCE

Cash Corn is Unusually Weak and Takes Record Slump of Twenty-Four to Thirty-One Cents.

Omaha, August 11, 1917. The cash corn situation was extremely weak today. A few offerings of this cereal sold at an unusually heavy decline. The bulk of the offerings being quoted from 21c to 21c below the quotations of the previous day.

The heavy decline in corn was caused, in a large measure, by a noticeable absence of local demand for the few weeks, but the local demand was moderate and active and a few of the offerings were reported sold before the close of the cash session.

The oats market was fairly active with moderate heavy selling. The market reported a rather good inquiry for this article at prices ruling from unchanged to 1/2 cent lower.

There were no sales of No. 2 white or standard oats reported and the bulk of the offerings, which graded No. 3 white sold at 7 1/2c, white No. 4 brought 7c and No. 4 1/2c.

The better grades of white corn sold around 11c to 11 1/2c and the mixed sold generally at 10c to 10 1/2c. Receipts of No. 2 white were nominally unchanged and the trade in these cereals was dull with continued light arrivals.

Primary grain receipts were 81,000 bu. and shipments 49,000 bu., against receipts of 100,000 bu. and shipments of 114,000 bu. last year.

Primary corn receipts were 85,000 bu. and shipments 52,000 bu., against receipts of 100,000 bu. and shipments of 114,000 bu. last year.

Primary oat receipts were 1,000,000 bu. and shipments 400,000 bu., against receipts of 2,000,000 bu. and shipments of 900,000 bu. last year.

FACE DIFFICULTY

IN SEEDING WHEAT

Farmers Find Corn Rows Are Too Close Together to Use Standard One-Horse Drill.

Great difficulty is encountered in getting the fall wheat crop seeded in Nebraska this year. The corn rows are too close together to admit the standard one-horse drill between them.

The trouble has been looked into by the University of Nebraska, College of Agriculture, and the situation is believed to be serious. The authorities at the college of agriculture immediately canvassed the implement manufacturing concerns of the country to see if a narrower drill could be quickly manufactured for the market here, but were told this is impossible, owing to the shortage of steel, and the crowded condition of manufacturing in the country at the present time.

The situation arises out of the fact that much of the wheat was winter killed last winter and that this ground was listed into corn in the spring. Now the only way to get that corn land back into winter wheat is to go through it now with a one-horse drill between the rows and drill in wheat, which will come up now, lie dormant in the corn stalks through the winter, and then produce a crop in the spring.

However, the fact that corn was listed into the wheat land in the spring with no markings to go by, made it difficult to calculate the dis-

Munitions Manufacturers Engaged in Filling War Contracts Are in Need of Rehabilitation.

New York, Aug. 10.—Indications that various industrial concerns engaged in filling war contracts are in need of financial rehabilitation and a sharp reversal of the port constituted the primary factors of this week's irregular stock market.

Considerable alarm over the situation that has thus developed is felt by the authorities at the University of Nebraska, and by those farmers who have already purchased one-horse drills and found them useless in some of their fields.

Receipts continue light on both prairie hay and alfalfa. Demand good. Market firm and higher on all grades on both prairie hay and alfalfa.
