The army recruiting office in the Army building is now in charge of Major H. E. Frith—until last week Captain Frith. Major Frith received his commission, together with his new position as head of the recruiting office, just after the departure of Colonel McKinley, who had been in charge of the office almost a year. Major Frith has been in Omaha several months. He came here from Illinois, and much of the success of bringing so many men into the ranks of the United States army is due to his efforts. He expects to continue to work along the same lines. The army recruiting office here has been sending 150 men a week to the army camps for enlistment.

THE WEATHER MAKES NO DIFFERENCE TO THE NEW EDISON

"The Phonograph With a Soul."

If it is stormy play it in the house. But during the hot spell move it out on the front porch. You will be surprised at the natural tones that come from it. You will not have to apologize to your neighbors, either. The nearest ones will all flock to their front porches to listen to it, and the ones farther away will ask you what prominent artist you have spending the summer with you. The best thing about the NEW EDISON is that it does not sound like a phonograph. Were you ever fooled by a "talking machine?" Come to our store and let us prove to your own ears that there is no difference between the Edison instrument and the voice of the living artist. The only real test.
