

PURCHASE COAL FOR MUNICIPAL YARDS

Retail Coal Prices Will Be Fixed in a Few Days, Fuel Administrator Garfield Wires the City Council.

The municipal coal yard will be in operation within ten days. Ten cars of coal already are on the way to Omaha.

The coal yard ordinance will be introduced to the city council Saturday morning and the plan is to push it through the necessary legal process with all possible haste so that the muni plant will be in operation before the cold weather arrives.

Suggests Two Yards.
The coal yard committee, consisting of Mayor Dahlman and Commissioners Butler, Parks and Kugel, also will report progress Saturday morning.

The committee will suggest that two yards be established at once. One will be in the central part of the city and the other on the South Side. A trackage site at Twenty-sixth and Oak streets will be suggested for the South Side location.

The muni plant will be run strictly on a cash basis and efforts will be made to make deliveries direct from the car to the purchaser so far as this is possible.

Many Orders on File.
The muni plant already has received enough orders for coal to start business on quite an extensive scale. Over two score of communications have been received by the city dads asking that their orders for quantities ranging from one ton to five tons be placed on file now for immediate delivery as soon as the plant is under way.

Commissioner Butler this morning received a telegram from National Fuel Administrator Garfield in which he said retail prices would be fixed in a few days.

Married Twenty-Six Years, Asks Court for Divorce

Flora M. Bacon is suing Elmer E. Bacon for divorce in district court after more than twenty-six years of married life. She says he has failed to support her for the last twelve years. Cruelty is alleged as a side issue. They were married at Osceola, Ia., June 6, 1891.

MUCH BEER STOLEN FROM COURT HOUSE

Sneak Thief Who Has Been Operating for Weeks Takes Confiscated Brew From Basement Room.

Several cases of beer, part of the evidence in state case against Anton Larson, dairyman whose place was raided by Sheriff Clark last spring and thousands of gallons of liquor confiscated, have been taken from a strong room in the basement of the court house by the daring sneak thief who has been operating for several weeks.

Sheriff Clark discovered the theft when he acted on a "tip" and visited the store room for the first time in several days. He is checking up on the stored booze to ascertain just how many cases of beer were taken.

Nearly 1,200 cases were removed from the jail to the store room a few months ago. The expensive wines and liquors, part of the haul at the dairy farm are still under lock and key in the jail on the fifth floor of the big county building.

The case against Larson is pending in district court.

Has Master Key.
Court house attaches believe the latest raid of the mysterious sneak thief was made some time Thursday night. Sheriff Clark and district court judges are confident the prowler has a master key that will open any lock in the court house.

Evidence in an appeal liquor case and personal belongings of Judge Estelle were taken earlier in the week.

Rifle Desks.
Other articles have been stolen from offices in the court house recently. Desks in different offices have been opened at night and various personal belongings of clerks and stenographers stolen.

The county attorney's office was

Liberty Bonds Reach New High Figure

New York, Sept. 28.—Liberty bonds made another new high record at the outset of today's trading, selling at 100.16, two points above the previous high mark, reached yesterday.

broken into one night last week and umbrellas and other miscellaneous articles taken.

Sheriff Clark has detailed deputies to investigate the ownership of the mysterious master key.

Deputy county attorneys and others also are trying to run down the daring sneak thief.

"It will go hard with the individual who is stealing evidence and valuables from court house chambers and

offices if we get him," declared Sheriff Clark and County Attorney Magney.

Burning Daylight Ends at Union Pacific Headquarters

At Union Pacific headquarters the system of "burning daylight," as it has been called, will be discontinued October 1, so far as work hours are

concerned. After that date employees will commence work at 8 o'clock in the morning, work until noon, be given an hour off for lunch and, returning to their duties, work until 5 o'clock in the afternoon, with the Saturday work hours from 8 to 1 o'clock.

Under the "burning daylight" plan in force during the summer months, the work hours were from 7 in the morning until 4:30 o'clock in the afternoon, with an hour off between noon and 1 o'clock.

When clerks are called upon to work overtime at night the company will give them their suppers, allowing 65 cents a meal.

Electric Shocks for Those Who Signal City Hall "Lifts"

The new elevators in the city hall themselves are all right. They never

lay down as did the old ones and make the city employees take on the stairs. But the button caps on the elevator indicators have a habit of coming off and when one tries to push the button to bring the elevator to his floor he is likely to get an electric shock that jars him to his knees. Several caps have been lost and new ones ordered have not arrived.
