

Make the bathroom comfortable to the half dressed child these frosty mornings by installing a wall type bathroom heater.

For that chilly room, that cold corner, that bleak hallway, a portable gas heater is the only practical and economical remedy.

For your unused fireplace the Radiant fire gas heater is the only practical heater.

To make your home comfortable these chilly mornings and evenings it is not necessary to build a fire in your furnace.

Use a Gas Heater

It is **CONVENIENT**, ever ready, gives instant heat and is easily adjusted to temperature wanted.

It gives **COMFORT**, suggests coziness and good cheer. No dirt, no waste of fuel in heating rooms desired.

It is **ECONOMICAL** when used as designed.

The **Radiantfire** is not a plaything or just intended as an auxiliary. It is capable of real heating service, powerful enough to warm the largest rooms or offices. Its beauty of design and finish makes it most appropriate for the finest homes. It is itself, a piece of household furniture in perfect harmony with the spirit of the modern home.

The Advantage of Radiant Heat

Radiant heat is heat derived from energy waves projected through the atmosphere from an incandescent mass. It carries its warmth directly to that body upon which the radiating heat waves fall and is, therefore, very different from so-called "convected heat" which merely warms the air surrounding it. It is radiant heat that you enjoy when seated in a sunny window on a winter's morning. This radiant sun-heat has traveled through the frigid temperature of outer space for 95,000,000 miles and yet bathes you in warmth upon a zero day. Again it is radiant heat that beats upon you through the car window as the train rolls by a pile of burning ties. It is radiant heat you feel also when seated close up to an open wood fire. And now at last and for the first time, this living radiant heat is made available for general heating in the home with gas fuel. It is beyond comparison the most healthful, satisfying type of heat because it warms the body, yet leaves the air in the room both pure and fresh for breathing. The room that is heated by the **Radiantfire** will never feel "close" and "stuffy."

Call at our office and let us demonstrate these heaters or call us up by phone and let our heating man call on you. His experience and service are at your command.
