PART SIX SOUTH OMAHA

VOL. XLVII-NO. 16.

OMAHA, SUNDAY MORNING, SEPTEMBER 30, 1917.

SINGLE COPY FIVE CENTS.

South Side, Bustling Omaha services. Suburb, Is Progressive Community of Thirty Thousand Population.

"Pep, push, pride and prosperity" is the keynote of civic life on the South Side.

Thirty thousand persevering and purposeful persons have made the South Side the most progressive place the South Side. A new Croatian church is being built at Thirty-sixth acres. It has 100 miles of graded streets. It has thirty-four miles of paved streets. It has fifteen miles of sewers; fourteen miles of doubletrack street railway; it is the terminal of two suburban railways; it has twelve packing houses and the largest tannery in the state. More than 10,-000 men are employed in its industries. The annual payroll is more than \$10,000,000. (South Side is the second largest hog and sheep market, and the largest feeder and range horse market in the world.)
South Side has twenty-four schools,

twenty churches and seven parks. It has five banks, which do an annual business of \$225,000,000.

The South Side is all this and more. These things are merely the setting—the stage property—for the 30,000 persons who live on the South

From All Nations.

People from every nation in the world live in South Side. Sometimes one class in school has twenty nationalities represented. Little colonies, which seem to be a handful of Europe brought over and dropped intact, are scattered here and there throughout the city. "Little Bohemia," near the Brown Park district, is the center for thousands of South Siders, of Bohemian descent. The church and the home customs are much the same as those of the old country. The majority of the Polish Polish Louis Cohn, president. Thirty-sixth and R streets, Most of these hard-working, clear-thinking people own their own homes. There are also settlements of Lithuanians, Slovenians, Croatians and Serbs.

That the boiling pot may boil more busily much stress has been given to Siders volunteered as soon as war the social settlement work on the South Side. The settlement house at 2827 Q street has kept in touch with all phases of life on the South Side. A garden club was organized last spring. Bushels of potatoes, tomatoes, beets, onions and carrots, which were exhibited at the settlement home last month, gave silent testimony as to the success of the organization, Girls and women have been taught how to sew and cook. Campfire Girls and Boy Scout clubs have been organized.

Settlement Worker Coming. Mrs. Marie Leff of Cleveland, O., will arrive October 1 to take charge of the settlement work. She speaks seven languages and is considered one of the most efficient settlement workers in America. Maurice Howard false glitter. It stands strong and is in charge of the boys' activities. powerful, daughter of Omaha, mis-Mrs. W. J. Wirts has charge of the tress of the prairies—the home of Mrs. W. J. Wirts has charge of the work with the girls. She is assisted by a number of the young society dear.

The advisory committee is: R. C. Howe, M. R. Murphy, C. B. Spangler and Everett E. Buckingham. The garden committee is: Mrs. Draper Smith, Mrs. Lowrie Childs, Mrs. Luther Kountze, Mrs. J. J. McMullen and Paul McAulay,

South Omaha was annexed to Omaha two years ago. Since annexation

ha two years ago. Since annexation South Omaha has had better schools, better homes, better streets and better parks. The spirit of progress, of big things in the making, permeates and X streets. A new business block is being built at Twenty-fourth and N streets by Ed Johnson. The new Omaha Roller Mills company has been remodeling its buildings at Twenty-ninth and C streets and will begin operations the first of the year.

Plan for Future. The future of South Omaha is pregnant with plans for continuing its growth. The Burlington company put in a new railroad station on West L street. New streets have been opened up and graded to the Rock Island station in Albright. It is expected that the Union Pacific will improve its 112 acres west of the main line from Madison street, South Side to Avery. This strip of South Side, to Avery. This strip of land is 600 feet wide and two miles long. The Burlington surveyors have been busy surveying in the district near Thirty-eighth and L streets and new improvements are expected there. South Siders are anxious to see the government pave the boulevard to

Fort Crook, The five improvement clubs of the South Side recently consolidated. They are seeking improvements in paving and in water service. The South Side clubs and their presidents are: East Side, F. S. Richardson, president; Southeast Side, J. J. Mahoney, president; Southwest Booster, W. J. W. J. Curan, president; South Side, George Merriman, president; Giles,

Has Patriotic Record.

These people of many nations give South Omaha a population of earnest, hard working people. They have an intense love of liberty which has caused many of the young men to enlist in the army. Hundreds of South was declared. Many others went willingly as soon as they were called. They are fine, up-standing, out-stepping young fellows and they are "do-ing their bir bravely.

Many South Siders have received commissions in the army. South Side women are busy making sweaters and hospital supplies for the

soldiers. They were successful in obtaining a muny drying plant, which was installed in the South Side High school. Many bushels of food have been conserved.

South Side is strong, virile. It is a place of true standards and vital issues. Toil and endeavor have made the South Side what it is. It has been hewn in the rough. There is no

King Hog to Show His Class At the Coming Swine Show

Prize Porkers from Coast to points to the show next week being bigger and better. There will be more Coast to Be at the South Side October Three to Ten.

When King Ak comes to town this tween 20,000 and 30,000. week he will quickly discover that he is not the whole show. As the puissant old monarch walks up and down held in the horse barns at the Union the streets he will be apprised of stock yards and in a building that is the fact that another king is competitive for the best lighted of any of its kind in the world. For the receping for the robes of royal purple tion of the hogs, 1,000 pens have been and this other king is likely to be constructed and \$15,000 in cash has enthroned to rule, not only over Quiv- been hung, up to be given out in era, but wherever the Stars and prizes to the entrants. Stripes flutter in the breezes.

Before the end of this week, unless there has been a mistake made in reading the signs, King Hog will be the sovereign before whom all the loyal subjects of this dynasty will

Seriously speaking, there is to be a Swine show in the city this week. It is to be held under the auspices and direction of the National Swine Growers' association and, according to the estimates of E. Z. Russell, the general superintendent, it will bring here between 1,600 and 1,700 hogs valued at fully \$1,000,000. In fact, it will be the most valuable collection of hogs ever brought together and shown under one roof.

National in Scope.

As its name indicates, the National Swine show is national in its scope. The organization includes the whole of the United States, or, rather, every state in the union where hogs are raised as one of the commercial com-

At the Omaha show twenty-two states will be represented by from 000 each and \$1,000 and \$2,000 hogs 200 to 250 exhibitors, with, of course, Nebraska and Iowa, on account of their closeness, leading in the number. National Swine Growers' association farmers who will buy animals for the has exhibited in Omaha. The first purpose of building up their herds. show was held last fall and was a Last year the sales of these animals most pronounced success. Everything run to into the tens of thousands of

exhibits than last year and the crowd in attendance will be much larger. This is indicated by the hundreds of let-ters that are being received daily at headquarters. Superintendent Russell puts the attendance at anywhere be-

Held in Horse Barns.

The National Swine show will be

The show doors will open the morning of Wednesday, October 3, and the exhibition will continue over until and including Wednesday, October 10. Night shows will be given next Friday and Saturday and Monday and Tuesday of the following week. The doors will be open Sunday, October 7, but on that date there will be no showing of animals.

That the school children of this and other cities may see the hogs and learn of them, Saturday, October 6, has been designated as children's day, and upon that occasion all children will be admitted to the show free of charge.

Six Classes of Hogs.

The high grade hogs of the United States are divided into really only six classes—the Poland-Chinas, the Duroc-Jerseys, the Chester Whites, the Berkshires, the Hampshires and the Spotted Polands. Of course there are others, but these are the standards and they are the ones that will be exhibited at the Omaha show. There will be hogs here that are worth \$10,-

will be as common as grass. Of course hundreds of the hogs will be for sale, and this fact is go This is the second time that the ing to bring to Omaha thousands of

The Bee Keeps Its Readers Posted Daily on the Condition of the Live Stock Market

Omaha is Second Live Stock Market for the Entire World

50 Per Cent.

BY BYRON DEMOREST.

Omaha is a great city-the greatest of its size in the country, in fact-in so many different lines that people of falling about 7 per cent short it is no this section are prone to forget that the second live stock market in the world is located here.

Since the market was opened back growth, and for the last few years has been second only to Chicago in point of size. It is only natural that this great growth should have taken place. Omaha is located right at the \$10.00. At the present time the porker very doors of some of the greatest farming and stock raising land in the country, and besides that is the most convenient market for the great range district which starts in the western part of Nebraska and extends clear on out to the coast.

Cattle Receipts Grow.

Figures are mighty dry reading for the average busy man, but there are some stories that can be told more vividly with them than in any other way, and this is one of them. Receipts of cattle, hogs and sheep at Omaha during the first nine months of this year numbered 5,555,000 head, an insome stories that can' be told more crease of about 120,000 over the first nine months of 1916.

Chicago during the same period has had 10,274,000 head of cattle, hogs and sheep while a year ago they had somewhere around 11,350,000, leaving the total receipts at the Windy City. the total receipts at the Windy City for the year so far 1,100,000 short the receipts of sheep at the six prinof 1916.

Kansas City, the third market, also shows a big falling off, having re-ceived 4,665,000 head of stock so far this year as compared with 4,949,000 head for the corresponding period a year ago. In other words, Omaha has materially strengthened its position as the second largest market in the country and has made a much better showing comparatively than its big rival, Chicago.

Production Increases.

ceived more cattle this year than they did in 1916. For the past two or three years there has been a material increase in production all over the middle and northwest and the natural increase in receipts at markets that this would bring about has been augmented by the wintering in the north of a great many southern cattle on account of drouths in the southwest. At Omaha cattle receipts have been 1,115,000 head, which is 175,000 more than were received last year during the same period. Despite this big increase in receipts, prices, as the average consumer will readily testify, demand has grown even more rapdemand is the principal factor in the or a profit. regulation of prices for live stock, or, in fact, any other commodity.

Demand Is Greater.

Thus with Europe at war for the past three years, and producing only a small fraction of the meat it needs, demand for this country's beef has become so broad that during the nine months so far this year cattle have a great deal, but the feeder demand advanced in value all the way from \$2.50 to as much as \$6.00 per hundred weight. Right now the best cornfed steers are going at \$17.00 per hundred and better, while January 1 the This is all as it should be.

asked that more live stock and betnothing will encourage the production of a commodity so much as its bringing profitable prices. Also nothing will induce a farmer to raise good tion in the cost of meat. bringing a big premium over common grades.

Cleaning Out Herds.

It is not to be expected that Oma- not much additional building of pens ha or any other market will have as and the like was done. The steady large supplies of cattle for several increase in receipts makes it apparent years to come as it is getting this that in the near future the present cayear, for stockmen are cleaning up pacity of the yards will not accommoan accumulation of several years and cutting down their herds, which had grown too large, to the safety point. Last winter, on account of an excessive number of cattle on the range arises. It is probable that whenever there were great losses of stock, and ranchmen are trying to keep these losses from occurring again if they

Less Hogs Produced.

Receipts at the principal markets of the country indicate that hog production for the year 1916-17 was a good deal smaller than for the previsor large that different estimates made ous twelve months. At the six prin- in the past have merely been concipal western markets approximately fusing, but this much can be said, 14,435,000 hogs have been offered the amount paid for live stock bought since January 1, a decrease of 1,400,- and sold on the market and for the 000 head as compared with receipts

during the correspondent period of. 1916. The greatest decrease has been ket was opened

This Market Shows Fine Increase, While Others Not So
Good; Price Paid Up

50 Per Cent

noted at Chicago where receipts for the year so far are 1,000,000 smaller than 1916. Omaha's receipts of hogs for the year to date are almost as large as a year ago, the run having been 2,350,000 head, as against 2,383,-000 in 1916.

Demand for pork and all hog prod-ucts has had the same experience as the demand for cattle, being greatly broadened by the requirements of the European nations. So with receipts wonder that hogs are now selling almost twice as high as they were at the start of the year.

Price is Doubled.

The increase has been made in two is soaring around 19c a pound and the top of the market which is paid for choice hogs for the eastern trade is flirting with the 20c mark.

Fewer Sheep Grown. Production of sheep has been on

the decrease at an alarming rate for several years. The settling up of a great deal of the old range country y farmers has deprived both cattle and sheepmen of their range lands. Cattle production has not suffered so much from this as most of these farmjust that much of a decrease in the number of sheep that can be pro-duced. The result is that while high prices which ordinarily would stimu-

This decrease iis vividly shown in cipal markets so far this year which amount to 6,587,000 as compared to

7,657,000 a year ago. Omaha a Feeder Market.

Omaha which has long had the reputation of having the best feeder market in the country has shown less of a decrease comparatively than either Chicago or Kansas City, decreases for the year so far at Omaha, Chicago and Kansas City being 123,000 head, 450,000 head and 207,000 head respectively. Receipts at Omaha since the range season opened July 1 have been quite a bit smaller than for 1916, but at that have been larger All the principal markets have rethan at any other market.

Packers Lose On Sheep. Sheep and lamb prices have been soaring all year, and while the in-creased value of wool has been partly responsible, mutton prices have also had to be raised a good deal. The fact is that packers have lost money on most of the sheep and lambs they have bought this summer. That will sound fishy to the average reader, but it is gospel truth nevertheless.

"Well, if they are losing money sheep, why do they buy them?" will be have been far higher than they ever the first question that will occur to were before. In other words, while the business man. Simply because in production has been on the increase, order to hold their trade packers have to supply a certain amount of mutton dly, and despite statements of agi- at the market price regardless of ators, etc., the old law of supply and whether that price represents a loss

> The recent high levels of sheep and lambs were due mainly to the fact that feeder buyers were taking nearly everything that came unto the market, even going so far as to take a good deal of fat stuff. Had packers been in the market alone they would certainly have reduced prices, an reduced them was so strong that packers had very little to say about what prices should

Consumers Must Settle.

There si no consolation for the consame kind of cattle was selling around sumer in the outlook for any kind of \$11.00 per hundred. This is represensumer in the outlook for any kind of tative of the amount of increase the risen along with the cost of everyvalue of all kinds of cattle has shown thing else and all kinds of feed are though the poorer grades have re- from 100 per cent to in some cases ceived the short end of the upturn. 200 and even 300 per cent higher than they were a year or two ago; so that Food Administrator Hoover has even though the government did try to regulate live stock prices, or ester live stock be produced. Now tablish a minimum price of any kind it would have to set that price high enough to make feeding profitable, and that would preclude any reduc-

Extensions in the yards themselves have not occupied much attention this year. Service to patrons was bettered anywhere it was possible, but date the business and the Stock Yards company is laying away each year a sum of money to carry out an extensive building plan when the need this is done much of the present equipment, which is considered the best in the country, will have to be entirely rebuilt.

There is not much use in trying to estimate the amount of business that the live stock market brings to Omaproducts of the packing plants has been at least 50 per cent larger than for any previous year since the mar-
