For this reason, young Richards volunteered to take Genrich's place.

Frank Lillie, who resides southeast of Beatrice, brought to the city yesterday several bushels of white corn, which he raised on his farm. The corn is well matured, and Mr. Lillie says that he expects a yield of from thirty to forty bushels per acre. Practically the entire corn crop of Gage county is out of the way of damage by frost.

TAYLOR TO RUN FOR GOVERNOR

Custer County Legislator Will Be Candidate to Represent Nonpartisan Movement.

Lincoln, Oct. 8.—(Special).—W. J. Taylor of Custer county is the man agreed upon as a candidate for governor by the men who held a conference last Monday at the Lincoln hotel and not J. N. Norton of Polk county, as first given out. Mr. Norton will be the candidate for lieutenant governor. The conference was attended by eight democrats and two representatives of the nonpartisan movement, the object being to secure an agreement on candidates for nomination on the democratic ticket satisfactory to the people behind the nonpartisan movement. It is understood that an agreement was reached as to other candidates.

The agreement to bring out W. J. Taylor for governor will probably make the state university people sit up and take notice. Mr. Taylor has not been very much in sympathy with the way they run the big school and in his two last terms in the legislature has made lots of trouble for the men who have tried to get the funds they felt necessary. It is not to be expected that they will get very enthusiastic over the proposition of "Taylor for governor."

VELVET GETTIN' up in the air may take a flyin' man to the top of his profession, but it's a mighty poor policy for the rest of us. That's nothin' like a pipe of VELVET to help a fellow keep both feet on the ground.

For a Calm, Cool Smoke—there is nothing like VELVET. There is nothing hot or hasty about VELVET, either in its making or its smoking. Every grain of VELVET that goes into your pipe has been aged in wooden hogsheads for at least two years. Those two years give to VELVET its mildness, its mellowness, its cool smoothness.

But your pipe will tell you more about VELVET than a page of print.
