FRENCH PERFECT THE ALLIES' WEDGE

Successes in Flanders Open Way for Completion of Task of Driving Germans Out.

Washington, Oct. 17 .- French successes in Flanders, broadening the great wedge which the allies are relentlessly driving into the German line, are described as the outstanding feature of the week in the review of military operations for the week ending. October 13, issued today by the War department.

The allied offensive in Flanders continues methodically," says the review. "Assigned objectives attained with increasing regularity indicate efficient co-ordination of artillery preparation and infantry attacks. "The precision of the allied barrage s proved by the low casualties of the assaulting columns.

Typhoon Fire is Deadly.

"The deadly effect of allied artillery fire is confirmed to us by reports reaching us regarding the concern of the German high command at the new allied 'typhoon fire,' which is compelling the enemy to amend his tacti-cal disposition in an effort to meet the shock of shell rained upon his lines. "The success attained by the French forces operating north of the British sector, more particularly in the neighborhood of the Houtholst wood, have given the allied advance

in Flanders the needed elbow room "Breadth of front is an essential condition for operations which are to have far-reaching results, for confined to a narrow base a really important encircling movement can have no sustained value if along its entire length it can be flanked by artillery fire.

Wedge Being Driven Home. "The zone of operations in the Ypres salient, formerly too narrow for the proper disposition of large masses of troops, has now, by the French co-operation and their recent successful advance, so extended the line that fighting in what was the Ypres salient has changed in character. It is no longer to be considered a salient, but an even, extending wedge, progressively driven into the

German lines. The operations of the French during the last week are in fact com-plementary to the engagements which resulted in the capture of Messines by the British last June."

Meat Cause Of Lame Back And Kidney Trouble

Take a glass of Salts to flush Kidneys if your back is aching.

authority says Uric Acid Noted from meat irritates the Bladder.

Meat forms uric acid which excites and overworks the kidneys in their efforts to filter it from the system. Regular eaters of meat must flush the kid-neys occasionally. You must relieve them like you relieve your bowels; removing all the acids, waste and poison, else you feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness,—sour stomach sours, tongue is coated and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment; the channels often get irritated, obliging you to get up two or three times during the

night.

To neutralize these irritating acids and flush off the body's urinous waste get about four ounces of Jad Salts from any pharmacy; take a table-spoonful in a glass of water before breakfast for a few days and your kidneys will then act fine and bladder disorders disappear This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate sluggish kidneys and stop bladder igritation. Jad Salts is inexpensive; harmless and makes a delightful effervescent lithia-water drink which millions of men and women take now and then, thus avoiding serious kidney and bladder diseases .- Advertisement.

Seattle, Wash., Oct. 17 .- Seattle's ship yard strike was considered temporarily settled today and the strikers, numbering approximately 12,000, were expected to return to work Monday as a result of a patriotic appeal made to the men by the federal wage adjustment board.

Decision to return to work was reached at a meeting last night of the Metal Trades council, which called the strike. The council voted to instruct its members to return to work under conditions existing before the strike, and to leave their claims for higher wages and the closed shop in the hands of the government's adjustment board.

Thirteen of the fourteen unions affiliated with the council previously had voted to end the strike, but the fourteenth union, the boilermakers, decided to remain out. In view of the council's action, it was expected the boilermakers would reverse their de-
