

FARMERS WASTE SPUDS, IS CHARGE

Executive in Western Part of State Reports Carelessness in Harvest Results in Huge Waste.

Nebraska is the most wasteful state in the union in its method of handling its potato crop, in the opinion of E. P. Miller, who is in charge of potato distribution in Nebraska. Mr. Miller, western part of the state potato crop is badly handled, that wagons are backed up to a pile of potatoes and the potatoes are shoveled into the wagon, thus being badly cut, gashed and bruised. So much is this carelessness practiced, according to Mr. Miller, that in the eastern markets the Nebraska potato has a reputation as being always of inferior grade by reason of being cut and bruised.

Meat Cause of Lame Back and Kidney Troubles

Take a glass of Salts to flush Kidneys if your back is aching. Noted authority says Uric Acid from meat irritates the Bladder. Meat forms uric acid which excites and overworks the kidneys in their efforts to filter it from the system. Regular eaters of meat must flush the kidneys occasionally. You must relieve them like you relieve your bowels: removing all the acids, waste and poison, else you feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sour, tongue is coated and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment; the channels often get irritated, obliging you to get up two or three times during the night.
