WOODMAN CIRCLE OFFICERS OBJECT

Declare Criticism of Order in
Reports of Examiners From
Southern States Has Been
Unjust in Extremes.

(From a Staff Correspondent.)
Lincoln, Oct. 20.—(Special.)—Offi-
cers of the Woodman Circle are tak-
ing exceptions to articles published in
some of the papers of the state re-
garding the examinations of the soci-
ety, alleging that the report made
by the examiners was unfair and that
the society had been damaged greatly
by the publicity when the real facts
in the case would not warrant such a
statement.

They allege that "the examination
of the society was made by young
men, two of whom had never had any
experience in the examination of frat-
ernal societies and knew nothing
whatever of the practical management
and working of such societies. Their
criticism of the society was not only
unjust, but in many instances without
a single substantial foundation upon
which to make the same."

"If agents of the old line insurance
companies had made the examination
it could not have been made more to
their liking. The examiners valued
the certificates of the supreme forest
upon the exact basis that old line poli-
cies are valued. They ought to have
known that the law exempts fraternal
insurance companies from the opera-
tion of the law covering old line com-
panies."

Declare Rates Enough.
This is the charge made by the offi-
cers in a communication to the state
insurance commissioner.

The rates, according to the com-
munication, in the judgment of Mrs.
Manchester, supreme guardian, are
adequate for all purposes, present and
future, if the management continues
on the same economical basis that it
has during her term of office. To
substantiate this she takes the three
average months of 1917 showing the

income and disbursements of the soci-
ety. The total receipts received
from the members (not including in-
terest on investments) was \$512,359.90
and the total expenditures for mortu-
ary purposes for the same months was
\$311,672.99, leaving a net balance of
\$200,686.91 for general fund purposes,
which is more than adequate. The soci-
ety has an emergency fund of approxi-
mately \$6,000,000 in investments in
municipal bonds bearing a rate of in-
terest of 4.83 per cent.

Continuing, the communication says
that the cost of management has al-
ways been low. During the year 1916
it amounted to only \$1.11 per member,
which compares most favorably with
other societies similarly situated. In
1915 the society was thoroughly and
exhaustively examined and a para-
graph from the report reads: "The
examination of the records in this de-
partment (field work) disclosed the
fact that the cost of securing new
members is not excessive."

No Extravagance Used.
Sections of the report which criti-
cizes the furniture, pictures of the su-
preme guardian, theater tickets and
luncheons, the communication says,
are too frivolous to give more than a
passing thought. The officers are not
extravagantly furnished; the pictures
of the supreme guardian are offered as
prizes for new members and has been
the means of creating new interest in
the groves and been a valuable asset.
The luncheon given by the officers
were to visiting delegates and given
as a courtesy to them. The mileage
and per diem of the representatives of
the supreme forest is a matter over
which the executive officers have no
control, as the supreme forest is the
sole judge of those.

It is understood that the officers are
making a very searching investigation
of the matter and if the publication of
the same has put the society in a bad
light with the public that it may re-
sort to legal proceedings in order to
secure its former standing.

Christmas Package Planned for Every Soldier and Sailor

Washington, Oct. 20.—Every Ameri-
can soldier and sailor will have the
best Christmas the Red Cross can give
him. Each one in this country of
abroad will receive a Christmas pack-
age, approximating a value of \$1.50
and containing chewing gum, tobacco,
writing material, games, dried fruit,
candies, puzzles, knives, mouth organs
or other articles. Each package is to
be wrapped in a khaki-colored handker-
chief and tied with red ribbon.

To expedite preparation of these
million Christmas packages, Harvey
D. Gibson, general manager of the
American Red Cross, today apportioned
the making of the packages to the
13 Red Cross divisions into which
the country has been divided. The
work will be divided between the
2,800 Red Cross chapters and one-third
of the allotment will have to be
in the division warehouses by Novem-
ber 1.

Money for the purchase of the
packages is being raised through con-
tributions by individuals for this spe-
cific purpose. No part of the Red
Cross war fund will be used.

Young Lieutenant Commits Suicide

Vancouver, Wash., Oct. 20.—Lieut-
enant M. C. McCoy of the Four-
teenth infantry, stationed here, was
found dead early today in his tent at
the rifle range at Vancouver Lake,
four miles from the barracks. A bul-
let wound in his head was the cause
of death. His revolver lay beside
him. Ill health and despondency are
believed to have prompted his self-
destruction.

Lieutenant McCoy received his
commission several months ago at
Fort Sheridan. His father was Col-
onel Robert McCoy of the Sixth in-
fantry, Wisconsin National Guard,
before that organization was feder-
alized.

Two Model Cars Built in 19 Exclusive Styles With Many Special Features

The Mitchell fall line embraces two sizes of Sixes. It in-
cludes 19 new-style bodies—the largest line of like class in
motordom. It embodies 31 wanted features which are rarely
found in cars, countless new touches and many exclusive de-
signs. It offers a wealth of surprises.

Two Under-Prices
There are two sizes, two prices.
And both prices are below other
cars of their size and class.

Yet both cars are built to the
standard of 100 per cent over-
strength. That is twice our for-
mer margin of safety. Cars built
under this standard have proved
their ability to run 200,000 miles.

One has 31 extra features, and
the other almost as many. That
is, features, like a power tire
pump, which nearly all cars omit.

These things are due to John
W. Bates, the famous
efficiency expert. This
plant and equipment
which he designed has
cut labor cost in two.
And all the vast sav-
ings go into these ex-
tra values.
