MINERAL SALTS OLD RELIABLE LAXATIVE Used For Years By Physicians

Sufferers from constipation may be divided into two classes: Those who neglect it—and find in a short time that they are victims of a daily headache, sour stomach, disordered kidneys, backache, rheumatism, and perhaps some organic upset that nothing short of an operation can relieve. And the others who make daily use of some harsh-acting cathartic that gives temporary relief and makes a slave of the person taking it. Common sense confirms the custom of thousands of physicians in using salts in the treatment of constipation and the many troubles which it causes. The most successful preparation of this kind has been a combination of three of these salts. In prescription form, this combination has been used by doctors for many years. These same old-fashioned salts, with the addition of certain fruit acids, may now be had from any good druggist under the trade name of Salinos (laxative salts). The name Salinos has been adopted because it is so much easier to pronounce than the long medical terms of the salts themselves and, besides, when Salinos is bought, you get the various ingredients in exactly the right proportions to do the greatest amount of good. The fruit acids, too, are helpful because they stimulate the kidneys. Salinos is pleasing to the taste and dissolves readily in cold water. Hot water, which so many people cannot take, isn't needed at all. Get a package today and try a little in a full glass of cold water tomorrow morning before breakfast. You'll feel better within an hour.
