"BIG TEN" GRID STARS GET SET FOR FINAL TEST

Four Strong Teams Prepare to Battle for Championship, With Month in Which to Complete Race.

(By Associated Press.) Chicago, Oct. 28.—With the close of the "Big Ten" football race less than a month away, coaches of the four leading eleven—Ohio State, Illinois, Minnesota and Chicago—tomorrow will begin to drive their charges through five days of the stiffest kind of training in preparation for crucial games of the season next Saturday.

Michigan Makes Rep. The victory stamps Michigan as one of the most powerful teams in the west, although it is not considered in "Big Ten" affairs this season, as it has only one conference game—Northwestern—on its schedule.

The Wolverines played a better defensive and offensive game than did Nebraska and fought doggedly when the Cornhuskers attempted to score. Chicago established itself in the conference race by defeating Northwestern, its traditional rival, 7 to 0, in the bitterest game played on Stagg field in years.

The victory indicates that the Chicago eleven will make a far more creditable showing in the race than the one of a year ago. The 27 to 0 triumph Illinois scored over Purdue indicates that Illinois and Chicago, which clash next Saturday, are practically of equal strength. After being held scoreless in the first half Illinois played brilliant football in the final periods and kept the ball in Purdue's territory.

Wisconsin had no trouble in taking Iowa into camp, 20 to 0. The Badgers outwitted their foe and made four successive marches down the field, but lost one opportunity to score through penalties. Wisconsin probably would have rolled up a bigger count, but kept its new formations under cover in preparation for Minnesota next Saturday.

The powerful Ohio state eleven made a track meet out of the game against Denison and rolled up a 67 to 0 score. Notre Dame was much too strong for the heavy South Dakota state eleven, which fell before a 40 to 0 count. South Dakota was unable to pierce the Notre Dame line and succeeded only once in making first down, a forward pass netting 25 yards.

The Michigan Aggies continued their losing streak Saturday, dropping the fourth game of their schedule to the University of Detroit, 14 to 0.

American Ship Founders During Gale in the Gulf

New Orleans, La., Oct. 28.—The American steamer Olympic, owned here, foundered during a heavy gale last Tuesday morning about 90 miles off Puerto, Mexico. A cablegram received today announcing the loss said one lifeboat containing eight of the crew was missing and was believed lost. Captain John A. Nelson of San Francisco with 12 of the crew managed to reach Puerto, Mexico, in a lifeboat yesterday.

The missing lifeboat was in charge of John B. Cefalu, purser, and a stockholder of the company owning the steamer. Vessels have been sent in search of the missing boat. The Olympic was bound from Frontera to Puerto, Mexico, was of 1,200 tons and valued at \$200,000, with a cargo worth \$250,000. Formerly it was in the Pacific trade.

Ninety Per Cent of All Canvassed Buy Bonds

Minden, Neb., Oct. 28.—(Special.)—Kearney county subscribed \$220,000 to the second Liberty loan, \$80,000 more than its quota. This is the report of the county chairman, F. R. Kingsley, jr., to whom much of the success for the heavy subscription is due. The campaign began with a thorough organization in each township. It is estimated that 90 per cent of the persons canvassed subscribed.

Montgomery Exceeds Quota.

Red Oak, Ia., Oct. 28.—(Special.)—Montgomery county "went over the top" \$115,000 in the canvass for the second Liberty loan. When the campaign closed subscriptions totaling \$942,500 had been taken. The quota for the county was \$931,000, and there was much rejoicing when at the close of the campaign it was found that the people of this county had again more than fulfilled the part assigned to them in meeting the government's call.

GRID TEAMS SHOW TRUE TO DOPE

Pennsylvania Holds Pittsburgh Better Than Last Year; Colgate Loses by a Missed Goal.

New York, Oct. 28.—Development of unexpected strength on the part of several elevens thought to be outclassed by more prominent rivals, was the feature of the week on eastern gridirons. While there were no torn upsets and in most cases victories were won in accordance with forecasts, the play of the vanquished teams surprised both loyal supporters and opposing combinations. This was particularly true of the Pittsburgh-Pennsylvania contest at Philadelphia. A year ago the Pittsburgh eleven triumphed over the Red and Blue, by a score of 20 to 0, yet on Saturday, with a far inferior squad to draw from, the Quakers covered themselves with glory by holding the invaders to a 14-to-6 victory, which tested the ability of the winners to the limit.

A missed goal from touchdown was the margin that defeated Colgate in its contest with Brown. The Brunonians swept the New York state collegians off their feet with the severity of their attack from the very start of the game.

Syracuse and the Navy ran rough shod over Tufts and Haverford, respectively, but the Army found Villanova a surprisingly strong opponent. Princeton's informal team won from Camp Dix Field artillery, but Camp Devens' team held Harvard's informals to a no score tie.

Flo Davis Dances Into Popularity On Bill at Gayety

Flo Davis, who is on the program at the Gayety this week as "Effie Vessant, bubbling with animation," is certainly rightly named. A high kicker and a skilled dancer she is from the word "go" and she accompanies her riot of life and effervescence with shrill yells that roused the big audiences yesterday to delight.

Other feminine leaders on the bill of "The Sightseers" are also of the first order. Shirley Laurence possesses a wonderful voice and Kattie Forsythe is some singer, too. They wear some dazzling costumes and are bright and sparkling from start to finish. The chorus is also up and doing every minute.

The show is a put on in 12 scenes. One of them is a short sketch, but full of surprises.

Will J. Kennedy, Harry P. Kelly and Jack Miller provide plenty of laughs. "The Carnival Four" sang with such sweetness that the audiences seemed never to weary of calling them back for more. "Buy a Bond" was one of the timely song hits.

Man and Woman Are Both Found Guilty In Mann Act Trial

R. E. Schoonover, traveling salesman, and Mrs. Addie Clemens, wife of a miner in Centerville, Ia., were found guilty of conspiracy to violate the Mann act. The woman was arrested at the Paxton hotel early in the summer. Schoonover was captured in Sioux Falls.

They were charged with traveling through a number of states. The woman's 10-year-old daughter was with them and proved a valuable government witness at the trial.

After Schoonover was arrested he escaped from a deputy United States marshal who was taking him from Sioux Falls to Ottumwa, Ia. He was captured at Chariton, Ia., by agents sent out by Marshal Eberstein, head of the Omaha federal bureau of investigation.

The present case is said to be the first in which a woman was convicted and sentenced for conspiracy to violate the white slave act.

Hockey Enthusiasts Get Together; Plan Schedules

New York, Oct. 27.—At a special meeting of the International Skating union held in this city, today arrangements were made for the control of amateur hockey under the auspices of the American Athletic union. The conference was attended by delegates of the various skating and hockey organizations of the east, middle west, Pacific coast and New England and tentative schedules for round robin and intercity play were considered. These schedules probably will be ratified and announced within the next 10 days or two weeks.

Chicago Switchmen to Ask \$5 a Day Minimum

Chicago, Oct. 28.—Switchmen of 10 railroads entering Chicago have decided to demand wage increases, which would make \$5 a day the minimum. The proposed scale would give a day helper \$5 and a day foreman \$5.30, while night workers would receive an additional 20 cents.

Three-Year Movie Actress Sells The Bee for Red Cross

Barbara Sabin, 3 1/2 years old, sold the "Bees" on downtown streets Saturday for the benefit of the soldiers. She handed out the papers from her own car which she has bought with her earnings as a movie actress and wore a Red Cross uniform.

Barbara has blue eyes and curly blonde hair, and is a delightful and unspoiled little girl with cunning winning ways that enabled her to sell many papers.

She is touring the larger cities in the interests of the soldiers and has had great success as a newsgirl.

DR. AKED TELLS OF TURKISH MURDERS

Noted Preacher Tells of Atrocities Which Have Been Inflicted on Armenians Servians.

Dr. Charles F. Aked, noted New York and San Francisco preacher and lecturer, spent a busy Sunday in Omaha churches.

At the First Methodist church, where he delivered a morning address, Dr. Aked was greeted with an overflow crowd and the enthusiastic gathering whetted the doctor's remarks until they fairly sparkled with facts and truth of present war conditions in Armenia and Servia.

Dr. Aked is crossing the continent in an effort to stimulate interest in assisting the starving people of those countries. He will deliver a final address this noon at the University club. Sunday afternoon Dr. Aked addressed a gathering of men at the Spoke Men's Christian association, and spoke to another overflow crowd at St. Mary's Congregational church Sunday evening.

This afternoon the ex-Fifth Avenue clergyman will depart for Des Moines, where he will deliver several addresses at Camp Dodge.

Million Starve to Death. Speaking of conditions in Turkey, Dr. Aked said: "What I tell you people today are facts. Get that firmly fixed in your minds at once. Don't let the slightest doubt of their authenticity exist. Over 1,000,000 people have starved in Armenia, Servia and Turkey. Over 1,000,000 have been brutally murdered under the Teuton guise of deportation. Thousands are starving every day—and that is the very reason I am here."

He has been estimated by relief authorities that to bring a ray of sunshine to those stricken people—mean a bare existence in the way of food—it will require a contribution of 6 cents from every person in the United States.

"There are over 200,000 people in Omaha—the Armenian and Servian relief committee is in your midst and the answer lies directly up to you. We Americans sit by our warm radiators—I am bringing this up to date by saying radiators instead of fire places—and stubbornly refuse to realize that, unless we wake up from our indifference, the same fate possibly may be meted out to us."

Dr. Aked cited several individual cases to bring the facts of the German atrocities out more strongly.

Dr. William J. Condon Is Cleared of Murder

New Brunswick, N. J., Oct. 28.—The jury trying the case of Dr. William J. Condon, army medical reserve captain, on the charge of murdering John W. Piper, Rutgers college student, returned a verdict today of not guilty.

URGES CALL FOR NEW RESIDENTS HERE

Edwin S. Jewell Declares Omaha Does Not Exploit Attractive Features; More Money Than People.

Edwin S. Jewell at the last meeting of the Omaha Real Estate board spoke of his experience in inviting and assisting in entertaining the convention of the National Building Owners and Managers recently in Omaha.

Mr. Jewell introduced his remarks by asking his audience to coin some phrase expressing Omaha. His phrase was "Omaha is an island of people entirely surrounded by food." He called attention to the fact that we are materialists in Omaha, and thinks we have a wrong view of what it takes to make a great city, where people will enjoy living and to which they enjoy coming. We emphasize, he said, the fact that Omaha is thirtieth in population and thirteenth in bank clearings. This, he insisted, is not to our credit. We are short on people, of whom we do not have enough to take care of the business we have and do not present inducements for people to come and make this their home. He said that in urging the recent convention to come to Omaha at the meeting in St. Louis last year they insisted they did not care to come to Omaha, and when asked why, stated that it was uninteresting—nothing to do when you get there—its hot. It was always necessary to urge them to come or stop off at Omaha. He thinks our publicity literature does not give Omaha a square deal. "We make a great deal out of just two exhibits—the stock yards and the smelter—both ill smelling, unpleasant and uncomfotable and neither of them elevating, restful or entertaining," he said.

Should Exploit Pleasant Features. "We have other features that ought to be exploited. Our people are unusually intelligent, hospitable and pleasant to meet and this ought to be impressed upon strangers. We have put our worst foot forward in past years in publicity."

The speaker urged that we have many other things that ought to be featured, in which we are better and can do better than other cities. Our history is romantic and fascinating—the Indian, pony express, the trails, all of these are intensely interesting and if we would talk them more people would stop to see the Military road, the Old Oregon Trail, the Bird Sanctuary recently created at Child's Point, the burial place of Fontenelle.

City Planning Urged. "Some cities become famous because they had the birth place or the home of some great man; others because of the natural scenery or attraction. Omaha has neither of these, but it can exploit instead the people." He also urged the need of our standing back of the city planning idea. This is sometimes criticized, because men think it costs something and do not see where they can make money out of it," he said "It is the idea that is making Cleveland famous, and also Detroit and other cities and leading the traveler to stop and spend days and sometimes make his home in these cities. Cleveland is the sixth city, larger because it has combined the idealistic with the materialistic and is famous as a pleasant place and more emphasis on beauty and quality, the finer life, and the possibilities of our people and our city, rather than only on that of money making."

Dye Makers Supply Domestic Needs and Ship Abroad. Washington, Oct. 28.—(Special Telegram.)—The American dye industry has not only grown big enough to supply practically all domestic needs, but is now exporting important quantities to other nations. In July nearly \$500,000 worth of aniline dyes were shipped abroad, according to figures published by the bureau of foreign and domestic commerce of the Department of Commerce.

This is the first time that separate statistics for aniline exports have ever been issued, the innovation resulting from the recent striking growth of the trade.

Of all the industries created or developed as a direct result of war conditions, none has shown more rapid progress than the American dyestuffs. From only seven establishments in which 328 pounds were engaged in producing 6,619,729 pounds of coal-tar colors, valued at \$1,126,699, in 1914, the industry has developed until now it not only supplies the domestic demand for colors, but has even invaded the foreign market in European, neutral and allied countries, Canada, Mexico, Argentina, Brazil, British India, and Japan.

No other article of commerce more vitally affects a greater number of industries than do coal-tar dyes, and very few articles rival them in complexity of manufacture. At the outbreak of the war the difficulties in the way of soon providing adequate do-

Foreign-Owned Sugar in New York Released For Sale

New York, Oct. 28.—Negotiations for the release of sugar stored in this vicinity and owned and paid for by foreign countries have been completed and 26,750 tons have been put on the market to relieve the shortage. It was announced today by George M. Rolph, chief of the sugar division of the federal food administration.

Stella Children Ride To School in Omnibuses

Stella, Neb., Oct. 28.—(Special.)—Bralton Union Consolidated school, ten miles northwest of Stella, owns three of the old-fashioned city omnibuses, which are used when the roads are too bad for motors.

The district bought these buses at Falls City, when motor buses were installed there. The district furnishes these buses to the drivers, and keeps them in repair. In good weather, pupils within two miles of the school must furnish their own transportation.

Rents Aviate When Costs Of Maintenance Increase

The Realtor, the organ of the Minneapolis Real Estate board, in a recent issue discussed the rental situation, the while covering the conditions quite as well in Omaha. In part the article runs as follows: "The necessity for the increased rentals for many types of both business and residence properties, which were put into force this fall, has been evident to realtors for a long time. During the summer there has been quite a general increase in rentals for residence properties, especially such as are heated. However, there has been no corresponding increase in rentals for business property."

"During the last five years rents have been practically static until this fall. This condition has been maintained in spite of a constant increase in maintenance costs for every type of property."

"During this period rentals for heated apartments have been practically stationary. Allowing for the usual differences of rental between new and old buildings, and the fluctuations which occur in different neighborhoods, the ordinary householder has, until this fall, been able to obtain an apartment or a house at practically the same figure in 1916-17 as in 1912."

"During this same period from 1912 to 1917, inclusive, maintenance costs of all kinds have risen with great rapidity. Everything necessary for the proper upkeep of property, including both labor and materials, has been steadily increasing in cost. Below is given a table which includes a few of the things in constant use in and about an office building and
