#### NOVEMBER CIRCULATION

58,715 Daily-Sunday, 51,884 Verage disculation for the month, subscribed and avonu to by Dwight Williams. Circulation Manager.

# Subscribers leaving the city should have The Bee mailed to them. Address changed as often as requested.

In the language of "Met," Mr. Hitchbranch is mad. That's very evident.

By the way, which Christmes was it that was to have seen the boys out of the trenches?

It is plain from subsequent developments that Edgar Howard's shell squarely hit the blackhanders.

Having passed a dry Christmas in Omaha safely, the ordeal of the first dry New Year may come easier.

Still the Bolsheviki of the Mexican border could scarcely design a better plan than raiding is opposed wholly to the fee system as a method to facilitate involuntary suicide.

"Food will win the war." "Air supremacy will win the war." "Control of the ocean will win the war." All right, just so we win it.

Let the searchlight uncover the truth, whether it go to police dereliction, postoffice inefficiency or War department incompetency.

War bulletins "made in Germany" emphasize the steady development in that quarter of the art of concealing hurts and trumpeting successes.

No chaplains over 40 years. Seasoned ministers are not unwelcome in the army, but in the coming grand hike to Berlin, Washington realizes that only pulsing youth can keep the pace.

Christmas peace offers from Potsdam somehow failed to connect with the wire. The deliverances of Wilson and George doubtless forced a recall of the promised message for radical revision.

The proof of the pudding is in the eating. The nest refutation of the charge that "a political pirate" has been standing in the way of the Seventh regiment will be its acceptance as a part of the national army.

# Germany's disregard of terms of the armistice

More "Scraps of Paper."

with the Bolshewiki is not at all surprising under the circumstances. None outside of Russia has placed any cohfidence in the sincerity of the kaiser's flirtation with the Lenine and Trotzky dupes This does not lessen the advantage to German arms, gained by the respite on the Russian front, which permitted withdrawals of troops to are even our and throat clinics, dental clinics and i strengthen the Hindenburg line in France and Flanders. The Bolshevik is powerless to enforce any of his terms against the German, and if he has fallen a victim to the duplicity of the kaiser's party it is his irretrievable misfortune. That such an outcome was certain to follow the so-called peace negotiations could easily be foreseen, yet the move was wholly within the rights of the dominant faction of the numerous Russian divisions. It has a lesson for Americans, as establishing even more definitely the accuracy of the charge made against the German government, that it is not to be trusted in treaty or otherwise. Its whole course throughout the war has been one of utter disregard to obligations towards others, no matter in what form presented. The armistice agreement was mercly

another "scrap of paper," and is now in scraps.

#### The Pernicious Fee System.

At the end of a protracted litigation our Nebraska supreme court holds in favor of the contention of the clerk of the district court that under the law, as it existed up to last July, he could rightfully keep, in addition to his salary, one-half of the naturalization fees coming into his hands. On the general issue the decision of the court is a dogfall, since it had previously ruled against the clerk's claim that he was entitled also to hold receipts coming to him as insanity fees. The last legislature changed the law with the intention to limit the clerk's compensation strictly to the prescribed salary, so that,

unless this law too is attacked, the fee system is abolished for this office, at least for the future. of paying public officers because that system has invariably led to abuses beyond control. The Bee believes every public office which carries compensation should have a definite and fixed

salary limit which should be understood in advance and that every person seeking, or accepting, the office should take it without further. profiteering in the way of perquisites, fees or side lines. What we say applies not particularly to the position of clerk of the court any more than to other public officers. We know there are still several loopholes in the law by which such perquisites may be legally retained, but these holes should be plugged as soon as possible. We have made great progress in getting away from the discredited fee system and we should finish the job.

#### Over the Top for the Red Cross.

Local subscriptions to the Red Cross show that Omaha is going along in step with the sult. country in contributing to war aid. It must be gratifying to all that this should be so. The immensity of the sums subscribed for this and give up these Saturday pupils for a couple of similar purposes since the beginning of the war is splendid proof of the responsiveness of the Christian association. This prescription was suc-

## Curing Personalities By Frederic J. Haskin

Washington, Dec. 24-The amazing number a neuronal and psychopaths encountered in the armies of this war have demonstrated the tremendous need of the mental clinic in our civillife. In almost every city in this country there orthopedic clinics. The city hospitals maintain wards for all such cases. But it is only within the last few years that a few cities have established mental dispensaries where people could go and be treated free of charge for mental discases

In New York, Boston, Baltimore, Ann Arbor, Mich., and several other cities mental dispensaries have been introduced with encouraging success; in a few other cities hospitals have established free mental wards, but the instanceare all too few. In every community there are many persons who are in need of mental treat- ] ment, just as others are in need of throat treatment, but there is no provision for them. Nerve specialists there are plenty, but a nerve specialist is the one type of medical man who rarely undertakes philanthropic work-not that he is unwilling, but somehow people do not look for nerve diseases among the poor.

Yet more neurotics, morons, psychopaths and

feeble-minded persons are to be found among the

poorer classes than anywhere else. The Ameri-

orders. And, while these types are not peculiar to the poorer classes, they are most prolific under poor economic conditions. Here, where the struggle for existence is hardest ,where the strain is always felt and a man's personality is in constant conflict with his environment, is the great need for the mental clinic. One difficulty lies in the way of the mental clinic, however, which does not affect other clinics. This is the diffidence most people feel towards admitting any mental infirmity. About his sore throat or his hay fever or his lumbago a man will talk to you for hours, but let it once

be suggested that it is his personality which needs The Bee wants its position kept clear-that it | a little treatment and he energetically rises to his own defense. Thus it happens that patients are usually brought to the mental dispensary, and not attracted there. A mother brings her small son at the suggestion of an officer of the juvenile court: a woman is sent to the dispensary by her physician; still other cases are brought by social workers.

> Often, too, a person has no suspicion whatver that he is suffering from mental trouble. His symptoms may be anything from headaches to hallucinations. Indigestion is frequently caused by mental excitement instead of uncongenial food. Blindness and deatuess, palsies and even paralysis may be symptoms of mental disorder just as much as hysteria, hypochondria and tantrums. A music teacher for years used to have vomiting spells regularly every Saturday night. She tried all indigestion remedies to no avail. Then she happened to come under the observation of a psychiatrist, a friend of the family, He discovered that on Saturdays this young woman taught pupils in widely separated parts of the city, that she was constantly running to catch cars, and worrying over possible delays in her appointments. By evening her nerves were keyed to such a pitch that nausea was the re-

He explained the matter to the young woman's family, and got them to persuade her to months and to spend her Saturday afternoons in the gymnasium of the local Young Women's N. Y., August 11, 1834.

will push things to a speedy conclusion. As one  $X_{i}$  C. Runkin said public to all calls for help. drug addicts, vagrants, irresponsibles and delinquents, moreover, are victims of mental dis-

Prompt and vigorous measures should be taken to check the epidemic of "shudders" around Capitol square. The enfeebled condition of the state house renders the slightest shake perilous to the inside population.

If the meat packers and packing house employes can agree to arbitration terms for labor disputes during the war, so can other industries. And if arbitration can give us industrial peace during the war, why not after the war?

Jobs and more jobs crowd upon American artisans here and overseas. A hurry call for carpenters and bricklayers for American work in England and France electrifies the dormant current of wanderlust and foreshadows a quick response from the unattached.

A touch of the homey feeling no doubt crept into the Christmas festivities of the boys "somewhere in France." They would not be Americans without it. Imagine the priceless value of the experience. In the years to come "my Christmas with the army in France" will be a theme of surpassing interest around the home fires, on the platform and in the magazines.

### Reports of Germany being posted on the movements of American ships lack the element of surprise. Those who should exercise caution seem more disposed to disregard ordinary precautions. The New York Times tells of a notorious pro-German, convicted under the espionage act and released on parole, allowed to live on Staten island, where he may observe the daylight comings and goings of ships in the harbor.

The personnel of employed classes in this country already has undergone a marked change as a result of the nation's entering the war. Women in large numbers are taking places made vacant by drafted men and volunteers. Men over 45 are finding it much easier to procure remunerative employment. Thousands of women are taking preliminary training for positions which will be open to them later as the operation of the draft act widens.

The public employment bureau of the city of New York has just made an interesting statement of the situation. It finds that many kinds of employment hitherto reserved exclusively for men are now available to women. One of these is architectural drafting, another is the running of elevators in apartment and business houses, and still another automobile cleaning and driving.

One large New York downtown banking institution is filling its vacant clerical positions exclusively with women. Bankers are the largest employers of women as clerks. Some of the women are protesting against the number of hours they must work and are chafing at certain restraints which, they feel, constitute an assault on their dignity and liberty.

Some departments of factories are operated solely by women. These employes are paid the ame wages granted to men at the start. Railroad companies are engaging women in everincreasing numbers. The process is to "try them out" in a general way and then transfer them to the specialized work for which they seem best adapted.

To date few women have been asked to perform arduous physical tasks or to work at night. Special environment becoming to their sex.

Broadly speaking, the change is only in the experimental stage, but the results are encouraging that, if emergency requires, the women of America will rival in the faithfulness and exellence of their service their sisters abroad.

iailed. been and will continue to be the rule. But a

much more important phase of the subject is now getting consideration. The suggestion made by The Bee some weeks ago, advising closer coordination and control of war relief activities, is attracting careful attention. It is now soberly proposed by many that the work be turned over to the government for management and administration. The task is one of greatest magnitude and importance, and almost too great for a volunteer organization. No complaint is yet made as to the effectiveness of the work, but some thoughtful men and women incline to the belief that better results might be obtained with all work in connection with the war handled by the government. Relief will continue to be furnished liberally by the American people, but its quality

will not be affected by elimination of existing

#### Value of Congressional Inquiries.

duplications.

Committees of congress sitting at Washington during the holiday recess will provide suificient of sensational proceedings and disclosures to avert any likelihood of stagnation of interest in the war. These goings-on are an inevitable accompaniment of our national method of doing business. So far as the investigations already in progress are concerned, developments simply serve to emphasize statements heretofore made that the governmental machinery was inadequate to handling the great task of war preparation. It was not a lack of patriotism, but delay in getting to work that put such a tremendous burden on the little army machinery.

Bureaus chargeable with the management of military affairs, it is not denied, broke down or were unable to function at the required speed. Some of the blame may probably belong to congress, where the greatest of the delay occurred. Distinct and detailed information submitted by capable officers of the War college was ignored and the only serious effort to get ready for war , had as its outcome the resignation of Secretary of War Garrison, while congress continued to camouflage the most dangerous situation the government ever faced.

Politicians now confronted with the certainty of rebuke at the polls may seek to shift the blame to army and navy heads, but the best they can do is to share it with them. The value of the congressional inquiries will be found in the fact . that they will uncover enough to waken the people to the part the democratic statesmen had in leading the country up to the very brink in a state of unreadiness for campaign purposes. Ample warning was disregarded by them and the country is paying the bills.

Very little noise comes out of Japan regarding her present part in the world war. The country is doing its bit just the same. Besides munitions supplied to Russia during its fighting days "the Yankees of the east" loaned \$500,000,-000 to the allies and 1,000 Jap soldiers, naturalized in Canada, are among the Canadian forces shooting up the Huns on the west front.

A marked scarcity of "Scotch" in Britain threatens to reduce holiday hilarity in that quarter. A species of silent conscription transferred 1.000,000 gallons of the brand to the fronts. where facilities for fireworks approach perfection.

Of course the shortage in blankets, overcoats and woolens at the cantonments was of study in 30 high shouls of California since the wholly by oversight. It is the weather man who opening of the present school year. A rising should be held culpable for bringing winter on patriotic feeling against Germanism in any form | as usual in December

On the other hand, organic disturbances of one kind and another are often responsible for mental disorders. In fact, as medical science progresses, the mind and the body are discovered to be more and more closely allied. Thus a feeble digestion may be the cause of melancholia, or melancholia the cause of a feeble digestion. "The personality in face of difficulties," says Dr. C. Mache Campbell of Johns Hopkins hospital, "may find refuge in phantasics, deliria or hallucinations, but also in aches and pains and palsies; and the latter may be as truly evidence of mental disorder as the former. Under these circumstances the work of the

mental clinic is not so much to treat the patient, as to diagnose his personality and prescribe the proper environment for it. And the sooner that personality is placed in its proper environment, the quicker the cure. So the work of the psychiatrist of the mental dispensary must begin with school children. These are divided into two groups-the backward and the neurotic types.

Backwardness in children is usually, although tot always, due to some constitutional defect. sometimes it is adenoids; sometimes nearsightdness which prevents the child from seeing the blackboard, and again it is defective teeth. In this case the child is in need of a general dispensary and not the mental clinic. In the case of actual mental backwardness, however, due to incapacity or feeblemindedness the psychiatrist does the prescribing. The child must be trained in accordance with his abilities, he must be taught some simple employment that will keep his defective brain occupied and perhaps enable him o earn his own living.

Then the child's parents must be advised in the matter of training such a backward child. His conduct is in need of closer supervision than that of the normal child; he must be kept away from bad influences; from morbid habits and unscrupulous persons. A double responsibility also imposed upon the school teacher.

The neurotic child affords just as great : problem as the backward one. His symptoms, coording to Dr. Campbell, are "night terrors, tantrums of temper, pilfering, romancing, unex-plained monds and marked cruelty." There is little difficulty in detecting the neurotic child. School teachers have long been familiar with his type-the child who is constantly destroying the otherwise peaceful discipline of the schoolroom, paying no attention to his lessons and always teasing or bullying his companions. He is the child, who placed in a bad environment, becomes a delinquent, a drug addict, a criminal.

Hence, the psychiatrist must study this child well-his physical make-up, his mental abilities, his emotional vagaries and his capacity for self-Then he studies the child's environcontrol ment. What are his parents like? Whom does he play with? What are his interests? What, in a word, is the general atmosphere in which the child lives, and what would be its natural reaction on him? Much light is generally thrown on the child's case by a discussion with his parents and school teacher, to whom the psychiatrist may suggest certain measures of reform.

Thus the mental clinic offers an excellent solution to that problem which the war has shown to be reaching grave proportions-the problem of the psychopath. For years many people have been struggling along with their tempestuous temperaments, their personality was ailing like a throat or a tooth. With personality specialists and mental clinics rapidly increasing in numbers. here should soon he an appreciable diminution in chronic cases of "nerves."
