Cattle-Receipts were not very heavy for a Friday, about 2,800 head, and the week's supply averages up about the same as a week ago. Quality was rather indifferent and the trade slow from the start with prices ranging anywhere from steady to 10c lower than Thursday. Compared with a week ago the good to choice beeves selling from \$12.00 to \$13.00 are quotably 10@15c from \$12.00 to \$13.00 are quotably 10@15c higher. On practically everything else the trade has been slow and uneven, largely 15@25c lower, with some of the commoner light weight steers showing a 25@40c decline. The same holds true as to cows and helfers the best grades being steady with a week ago, and the general run of butcher and canner stuff being about 25c off. No great change has taken place in the market great change has taken place in the market for stockers and feeders. Desirable grades of all weights rule about steady with a week ago, while common light and under weight grades are hard to move at sharply lower

Sheep-A liberal run of sheep and lambs for the week-end arrived this morning. Opening trade was slow. Packers seemed to be pretty well supplied, and the demand, though fair, was not as brisk as yesterday. A few loads of medium lambs, some holdovers, changed hands early at about steady prices. In-between stuff brought \$16.50@ prices. In-between stuff brought \$16.50@ 16.60, with heavier grades down to \$16.00 Toppy lambs were fairly well represented, Toppy lambs were fairly well represented, but remained unsold at midforencon. They will probably bring around \$17.00. Fat sheep supply was very limited. Nothing was sold early and the demand is fair with the undertone firm. A few feeders were on hand, meeting with a pretty good call from local and outside buyers. Although buyers and sellers did not get together, it looked like a good strong market. Prices looked about steady all around for the

Coffee Market. New York, Jan. 25 .- The market for coffee futures showed renewed strength and activity at the opening today, but the ad-vance into new high ground for the sea-son met considerable realizing and was not son met considerable realizing and was not fully maintained. First prices were 2 to 9 points higher with May selling up to 9.04c and December to 9.66c during the early session or about 7 to 10 points above last night's closing figures. Reports that the necessity for securing nitrates from Chile and other commodities might restrict imports of coffee were circulating on the early advance, which also reflected the increasing hope of peace. There appeared to be no change in the general character of the news, but the clearances reported from Brazil may have promoted the ten-

privately. At the auctions prices on mer-ino wools were off about five per cent, ac-cording to the general consensus of opinion. The opening of staple worsteds for next fall by the leading factor was at an advance of 50 to 75 per cent over last year, due to the increased cost of labor and raw materials.

Dun's Review of Trade. New York, Jan. 25 .- Dun's tomorrow will

With the recurrence of sovers storms and extreme cold in sections of the east and elsewhere the drastic measures adopted to ameliorate the traffic congestion have been fully effective and freight embargoes again have been resorted to as a means of expediting shipments of urgently needed war materials, foodstuffs and fuel. While numamellorate the traffic congestion have no erous exemptions were granted before the government's five-day industrial shutdown edict became operative, the restriction of production was in many instances extensive and the general Monday suspension of busi-ness over a wide area naturally lessened the volume of merchandise moving into con-sumptive channels. Recognition that sup-plies for strictly civilian uses will be more than ever difficult to obtain now that out-puts have been still further curtailed, has prompted efforts among some interests to over forward requirements at rising prices; yet sellers are increasingly reluctant to engage themselves ahead and not a few manu-facturers are so largely occupied with gov-ernment work that demands from the regular trade cannot even be considered
