This Will Interest Stomach Sufferers

Says Indigestion comes from an excess of hydrochloria

A well-known authority states that tomach trouble and indigestion is nearly always due to acidity—acid stomach—and not, as most folks believe, from a lack of digestive juices. He states that an excess of hydrochloric acid in the stomach retards digestion and starts food fermentation, then our meals sour like garbage in a can, forming acrid fluids and gases, which inflate the stomach like a toy balloon. We then get that heavy, lumpy feeling in the chest, we eructate sour food, belch gas, or have heartburn, flatulence, waterbrash, or nauses.

heartburn, flatulence, waterbrand, nauses.

He tells us to lay aside all digestive aids and instead, get from any pharmacy four ounces of Jad Salts and take a tablespoonful in a glass of water before breakfast while it is efferevescing, and furthermore, to continue this for one week. While relief follows the first dose, it is important to neutralize the acidity, remove the gas-making mass, start the liver, stimulate the kidneys and thus promote, a free flow of pure digestive interesting and continued in the shortest time breath Hyomei. Hyomei will end a cold in one day, it will relieve you of disgusting snuffles, hawking, spitting and offensive breath in a week. Hyomei is made chiefly from a soothing, healing, germ killing antiserest that comes from the eucalyptus forests of inland Australia, where estarrh, asthmis and consumption were never known to exist. Hyomei is pleasant and easy to breathe. Just pour a few drops into the hard rubber inhaler, use as directed and relief is almost certain.
